Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The European Union - Kristin Archick 2019-09-15

The European Union (EU) is a political and economic partnership that represents a unique form of cooperation among sovereign countries. The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a

Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system—especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU. Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

Since it was first published in 2010, it has been cited in judicial decisions and has been adopted in campus-wide and community-wide reads; it helped inspire the creation of the Marshall Project and the new \$100 million Art for Justice Fund; it has been the winner of numerous prizes, including the prestigious NAACP Image Award; and it has spent nearly 250 weeks on the New York Times bestseller list. Most important of all, it has spawned a whole generation of criminal justice reform activists and organizations motivated by Michelle Alexander's unforgettable argument that "we have not ended racial caste in America; we have merely redesigned it." As the Birmingham News proclaimed, it is "undoubtedly the most important book published in this century about the U.S." Now, ten years after it was first published, The New Press is proud to issue a tenth-anniversary edition with a new preface by Michelle Alexander that discusses the impact the book has had and the state of the criminal justice reform movement today.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

University Physics is designed for the two- or three-semester calculus-based physics course. The text has been developed to meet the scope and sequence of most university physics courses and provides a foundation for a career in mathematics, science, or engineering. The Mueller Report - Robert S. Mueller 2019-04-26

This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The

mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

Funny in Farsi - Firoozeh Dumas 2004-01-13

NEW YORK TIMES BESTSELLER • Finalist for the PEN/USA Award in Creative Nonfiction, the Thurber Prize for American Humor, and the Audie Award in Biography/Memoir This Random House Reader's Circle edition includes a reading group guide and a conversation between Firoozeh Dumas and Khaled Hosseini, author of *The Kite Runner*! "Remarkable . . . told with wry humor shorn of sentimentality . . . In the end, what sticks with the reader is an exuberant immigrant embrace of America."—San Francisco Chronicle In 1972, when she was seven, Firoozeh Dumas and her family moved from Iran to Southern California, arriving with no firsthand knowledge of this country beyond her father's glowing memories of his graduate school years here. More family soon followed, and the clan has been here ever since. *Funny in Farsi* chronicles the American journey of Dumas's wonderfully engaging family: her engineer father, a sweetly quixotic dreamer who first sought riches on Bowling for Dollars and in Las Vegas, and later lost his job during the Iranian revolution; her elegant mother, who never fully mastered English (nor cared to); her uncle, who combated the effects of American fast food with an army of miraculous American weight-loss gadgets; and Firoozeh herself, who as a girl changed her name to Julie, and who encountered a second wave of culture shock when she met and married a Frenchman, becoming part of a one-couple melting pot. In a series of deftly drawn scenes, we watch the family grapple with American English (hot dogs and hush puppies?—a complete mystery), American traditions (Thanksgiving turkey?—an even greater mystery, since it tastes like nothing), and American culture (Firoozeh's parents laugh uproariously at Bob Hope on television, although they don't get the jokes even when she translates them into Farsi). Above all, this is an unforgettable story of identity, discovery, and the power of family love. It is a book that will leave us all laughing—without an accent. Praise for *Funny in Farsi* "Heartfelt and hilarious—in any language."—Glamour "A joyful success."—Newsday "What's charming beyond the humor of this memoir is that it remains affectionate even in the weakest, most tenuous moments for the culture. It's the brilliance of true sophistication at work."—Los Angeles Times Book Review "Often hilarious, always interesting . . . Like the movie *My Big Fat Greek Wedding*, this book describes with humor the intersection and overlapping of two cultures."—The Providence Journal "A humorous and introspective chronicle of a life filled with love—of family, country, and heritage."—Jimmy Carter "Delightfully refreshing."—Milwaukee Journal Sentinel "[*Funny in Farsi*] brings us closer to discovering what it means to be an American."—San Jose Mercury News

#1 NEW YORK TIMES BESTSELLER • We all have dreams—things we fantasize about doing and generally never get around to. This is the story of Azar Nafisi's dream and of the nightmare that made it come true. For two years before she left Iran in 1997, Nafisi gathered seven young women at her house every Thursday morning to read and discuss forbidden works of Western literature. They were all former students whom she had taught at university. Some came from conservative and religious families, others were progressive and secular; several had spent time in jail. They were shy and uncomfortable at first, unaccustomed to being asked to speak their minds, but soon they began to open up and to speak more freely, not only about the novels they were reading but also about themselves, their dreams and disappointments. Their stories intertwined with those they were reading—Pride and Prejudice, Washington Square, Daisy Miller and Lolita—their Lolita, as they imagined her in Tehran. Nafisi's account flashes back to the early days of the revolution, when she first started teaching at the University of Tehran amid the swirl of protests and demonstrations. In those frenetic days, the students took control of the university, expelled faculty members and purged the curriculum. When a radical Islamist in Nafisi's class questioned her decision to teach *The Great Gatsby*, which he saw as an immoral work that preached falsehoods of "the Great Satan," she decided to let him put *Gatsby* on trial and stood as the sole witness for the defense. Azar Nafisi's luminous tale offers a fascinating portrait of the Iran-Iraq war viewed from Tehran and gives us a rare glimpse, from the inside, of women's lives in revolutionary Iran. It is a work of great passion and poetic beauty, written with a startlingly original voice. Praise for *Reading Lolita in Tehran* "Anyone who has ever belonged to a book group must read this book. Azar Nafisi takes us into the vivid lives of eight women who must meet in secret to explore the forbidden fiction of the West. It is at once a celebration of the power of the novel and a cry of outrage at the reality in which these women are trapped. The ayatollahs don't know it, but Nafisi is one of the heroes of the Islamic Republic."—Geraldine Brooks, author of *Nine Parts of Desire*

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
