World Development Report 2019 - World Bank 2018-10-31

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

Credit Default Swaps in Bankruptcy Proceedings under US Law - Angeliki Mavridou 2017-12-03

Die negativen Auswirkungen stiller CDS-Kurzpositionen auf das "Kapitel 11" Verfahren des US-amerikanischen Insolvenzrechtes wurden in Wirtschaftsstudien ausführlich untersucht und belegt. Um die sich daraus ergebenden widrigen Umstände im Rahmen des "Kapitel 11"-Verfahrens zu mindern, führte der US-Gesetzesgeber mittels der 2011 modifizierten

Bankruptcy Rule 2019 eine entsprechende Anmeldepflicht ein, die sich jedoch nur auf Gläubigerkomitees bezieht. Die Studie untersucht vor diesem Hintergrund, ob die limitierte Anmeldepflicht ausreicht, um die gemeinschaftliche Befriedigung der Gläubiger eines Schuldners nach den Rechtsprinzipien und Vorschriften des US-amerikanischen Insolvenzrechtes zu gewährleisten: Stille CDS Einzelgläubigerpositionen werden auf ihre Rechtmäßigkeit hinsichtlich des insolvenzrechtlichen Gleichberechtigungsgebots sowie der Vorschriften des "Kapitel 11" Verfahrens bzgl. der rechtlichen Annahme und Bestätigung eines Insolvenzplanes geprüft. Sich daraus ergebenden potentiellen Rechtswidrigkeiten werden vor dem Hintergrund einer Erweiterung der gegenwärtigen Anmeldepflichten diskutiert.

Bionanocomposites - Carole Aimé 2017-09-05
Beginning with a general overview of nanocomposites, *Bionanocomposites: Integrating Biological Processes for Bio-inspired Nanotechnologies* details the systems available in nature (nucleic acids, proteins, carbohydrates, lipids) that can be integrated within suitable inorganic matrices for specific applications. Describing the relationship between architecture, hierarchy and function, this book aims at pointing out how bio-systems can be key components of nanocomposites. The text then reviews the design principles, structures, functions and applications of bionanocomposites. It also includes a section presenting related technical methods to help readers identify and understand the most widely used analytical tools such as mass spectrometry, calorimetry, and impedance spectroscopy, among others.

Community Impact Assessment - 1996
This guide was written as a quick primer for transportation professionals and analysts who assess the impacts of proposed transportation actions on communities. It outlines the community impact assessment process, highlights critical areas that must be examined, identifies basic tools and information sources, and stimulates the thought-process related to individual projects. In the past, the consequences of transportation investments on communities have often been ignored or introduced near the end of a planning process,

reducing them to reactive considerations at best. The goals of this primer are to increase awareness of the effects of transportation actions on the human environment and emphasize that community impacts deserve serious attention in project planning and development-attention comparable to that given the natural environment. Finally, this guide is intended to provide some tips for facilitating public involvement in the decision making process.

Handy Reference Guide to the Fair Labor Standards Act (Federal Wage-hour Law) ... - United States. Wage and Hour and Public Contracts Divisions 1963

Learning Strategies - John Nisbet 2017-09-13
Originally published in 1986, designed for teachers and those concerned with the education of primary and secondary school pupils, *Learning Strategies* presented a new approach to 'learning to learn'. Its aim was to encourage teachers to start thinking about different approaches to harnessing the potential of young learners. It was also relevant to adult learners, and to those who teach them. Thus, although about learning, the book is also very much about teaching. *Learning Strategies* presents a critical view of the study skills courses offered in schools at the time, and assesses in non-technical language what contributions could be made to the learning debate by recent developments in cognitive psychology. The traditional curriculum concentrated on 'information' and developing skills in reading, writing, mathematics and specialist subjects, while the more general strategies of how to learn, to solve problems, and to select appropriate methods of working, were too often neglected. Learning to learn involves strategies like planning ahead, monitoring one's performance, checking and self-testing. Strategies like these are taught in schools, but children do not learn to apply them beyond specific applications in narrowly defined tasks. The book examines the broader notion of learning strategies, and the means by which we can control and regulate our use of skills in learning. It also shows how these ideas can be translated into classroom practice. The final chapter reviews the place of learning strategies

in the curriculum.

Eager to Learn National Research Council
2001-01-22

Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers and learners every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and

continuing development of teachers. *Eager to Learn* presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

Boundaries - Christine E. Gudorf 2010-04-15
In this expanded and revised edition of a fresh and original case-study textbook on environmental ethics, Christine Gudorf and James Huchingson continue to explore the line that separates the current state of the environment from what it should be in the future. *Boundaries* begins with a lucid overview of the field, highlighting the key developments and theories in the environmental movement. Specific cases offer a rich and diverse range of situations from around the globe, from saving the forests of Java and the use of pesticides in developing countries to restoring degraded ecosystems in Nebraska. With an emphasis on the concrete circumstances of particular localities, the studies continue to focus on the dilemmas and struggles of individuals and communities who face daunting decisions with serious consequences. This second edition features extensive updates and revisions, along with four new cases: one on water privatization, one on governmental efforts to mitigate global climate change, and two on the obstacles that teachers of environmental ethics encounter in the classroom. *Boundaries* also includes an appendix for teachers that describes how to use the cases in the classroom.

Policies and Practices for Mental Health in Europe - 2008

This WHO report, co-funded by the European Commission, gives an overview of policies and practices for mental health in 42 Member States in the WHO European Region. Nearly all countries have made significant progress over the past few years, and several are among the leaders in the world in such areas as mental health promotion, mental disorder prevention, service reform and human rights. Nevertheless, this report also identifies weaknesses in Europe: some systematic, such as the lack of consensus on definitions and the absence of compatible data collection, and others that show great variation across countries, such as the stage of community services development and the level of investment in various areas. It also identifies

gaps in information in areas of strategic importance for the development of mental health policies. This report is a baseline against which progress can be measured towards the vision and the milestones of the Mental Health Declaration for Europe.

Nikola Tesla Nikola Tesla 2018-07-26

History is written by the victors. But that is no comfort to those crossed out by the editor's pen. For years, science textbooks equated electricity and light with one man, Thomas Edison, while the genius whose pioneering electrical technologies truly power the modern world languished as a minor note in scientific history. Before the turn of the 20th century, electricity remained a mere scientific curiosity. Nikola Tesla, arguably more than anyone else, changed that. But Nikola's pioneering research in electricity represents only a portion of the scientific and technical innovations that elevated him to science godhood. Tesla not only expanded and revolutionized the work of his predecessors, he also leapfrogged ahead of his contemporaries to the next step. *Nikola Tesla: My Life, My Research* has three parts: Tesla's autobiography; Tesla's major research programs explained in simple words; and an eighty-page collection of rare photographs taken at several stages of Tesla's life; from his birth certificate, to the first photograph ever taken by phosphorescent light, to the last known photograph before Tesla's death, in 1943.

Jewish Spain - Tabea Alexa Linhard 2014-06-04
What is meant by "Jewish Spain"? The term itself encompasses a series of historical contradictions. No single part of Spain has ever been entirely Jewish. Yet discourses about Jews informed debates on Spanish identity formation long after their 1492 expulsion. The Mediterranean world witnessed a renewed interest in Spanish-speaking Jews in the twentieth century, and it has grappled with shifting attitudes on what it meant to be Jewish and Spanish throughout the century. At the heart of this book are explorations of the contradictions that appear in different forms of cultural memory: literary texts, memoirs, oral histories, biographies, films, and heritage tourism packages. Tabea Alexa Linhard identifies depictions of the difficulties Jews faced in Spain and Northern Morocco in years past as integral to the survival strategies of Spanish Jews, who used them to make sense of the confusing and harrowing circumstances of the Spanish Civil War, the Francoist repression, and World War Two. *Jewish Spain* takes its place among other works on Muslims, Christians, and Jews by providing a comprehensive analysis of Jewish culture and presence in twentieth-century Spain, reminding us that it is impossible to understand and articulate what Spain was, is, and will be without taking into account both "Muslim Spain" and "Jewish Spain."

Quality Control in Criminal Investigation - Xabier Agirre Aranburu 2020-11-09
Edited by Xabier Agirre Aranburu, Morten Bergsmo, Simon De Smet and Carsten Stahn, this 1,108-page book offers detailed analyses on how the investigation and preparation of fact-rich cases can be improved, both in national and international jurisdictions. Twenty-four chapters organized in five parts address, inter alia, evidence and analysis, systemic challenges in case-preparation, investigation plans as instruments of quality control, and judicial and prosecutorial participation in investigation and

case-preparation. The authors include Antonio Angotti, Devasheesh Bais, Olympia Bekou, Gilbert Bitti, Leïla Bourguiba, Thijs B. Bouwknecht, Ewan Brown, Eleni Chaitidou, Cale Davis, Markus Eikel, Shreeyash Uday Lalit, Moa Lidén, Tor-Geir Myhrer, Trond Myklebust, Matthias Neuner, Christian Axboe Nielsen, Gilad Noam, Gavin Oxburgh, David Re, Alf Butenschøn Skre, Usha Tandon, William Webster and William H. Wiley, in addition to the four co-editors. There are also forewords by Fatou Bensouda and Manoj Kumar Sinha, and a prologue by Gregory S. Gordon. The book follows from a conference at the Indian Law Institute in New Delhi, and is the main outcome of the third leg of a research project of the Centre for International Law Research and Policy (CILRAP) known as the 'Quality Control Project'. Other books produced by the project are *Quality Control in Fact-Finding* (Second Edition, 2020) and *Quality Control in Preliminary Examination: Volumes 1 and 2* (2018). Covering three distinct phases - documentation, preliminary examination and investigation - the volumes consider how the quality of each phase can be improved. Emphasis is placed on the nourishment of an individual mindset and institutional culture of quality control.

The Antinomies Of Realism - Fredric Jameson
2013-10-08

The Antinomies of Realism is a history of the nineteenth-century realist novel and its legacy told without a glimmer of nostalgia for artistic achievements that the movement of history makes it impossible to recreate. The works of Zola, Tolstoy, Pérez Galdós, and George Eliot are in the most profound sense inimitable, yet continue to dominate the novel form to this day. Novels to emerge since struggle to reconcile the social conditions of their own creation with the history of this mode of writing: the so-called modernist novel is one attempted solution to this conflict, as is the ever-more impoverished variety of commercial narratives - what today's book reviewers dub "serious novels," which are an attempt at the impossible endeavor to roll back the past. Fredric Jameson examines the most influential theories of artistic and literary realism, approaching the subject himself in terms of the social and historical preconditions for realism's emergence. The realist novel combined an attention to the body and its states of feeling with a focus on the quest for individual realization within the confines of history. In contemporary writing, other forms of representation - for which the term "postmodern" is too glib - have become visible: for example, in the historical fiction of Hilary Mantel or the stylistic plurality of David Mitchell's novels. Contemporary fiction is shown to be conducting startling experiments in the representation of new realities of a global social totality, modern technological warfare, and historical developments that, although they saturate every corner of our lives, only become apparent on rare occasions and by way of the

strangest formal and artistic devices. In a coda, Jameson explains how "realistic" narratives survived the end of classical realism. In effect, he provides an argument for the serious study of popular fiction and mass culture that transcends lazy journalism and the easy platitudes of recent cultural studies.
