A Taxonomy for Learning, Teaching, and Assessing - Benjamin Samuel Bloom 2001

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This

revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Health Financing in Indonesia - 2009-01-01

In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to

the configuration of the health financing system must be made. Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

A Practical Guide to Spoken English - Dr P.N. Gupta 2014-10-14

Teaching of English in India has been traditionally grammar based. The teacher teaches a good deal of grammar; assigns exercises in class or as homework and makes a lot of corrections. Such painstaking efforts on the part of the teacher are, of course, helpful in learning the language but does not much help the student to use the language in day-to-day conversation. Leaving aside the traditional method of dealing with grammar as an isolated subject, the present book offers a specific course in spoken English that focuses on the language of interaction and social exchanges. Its main emphasis is on developing communicative ability of the learner.

A Captain's Duty - Richard Phillips 2010-04-06

"I share the country's admiration for the bravery of Captain Phillips and his selfless concern for his crew. His courage is a model for all Americans." --President Barack Obama It was just another day on the job for fifty-three-year-old Richard Phillips, captain of the Maersk Alabama, the United States-flagged cargo ship which was carrying, among other things, food and agricultural materials for the World Food Program. That all changed when armed Somali pirates boarded the ship. The pirates didn't expect the crew to fight back, nor did they expect Captain Phillips to offer himself as hostage in exchange for the safety of his crew. Thus began the tense five-day stand-off, which ended in a daring high-seas rescue when U.S. Navy SEALs opened fire and picked off three of the captors. "It never ends like this," Captain Phillips said. And he's right. A

Captain's Duty tells the life-and-death drama of the Vermont native who was held captive on a tiny lifeboat off Somalia's anarchic, gun-plagued shores. A story of adventure and courage, it provides the intimate details of this high-seas hostage-taking--the unbearable heat, the death threats, the mock executions, and the escape attempt. When the pirates boarded his ship, Captain Phillips put his experience into action, doing everything he could to safeguard his crew. And when he was held captive by the pirates, he marshaled all his resources to ensure his own survival, withstanding intense physical hardship and an escalating battle of wills with the pirates. This was it: the moment where training meets instinct and where character is everything. Richard Phillips was ready.

Queenie - Alice Munro 2013-10-17

'Read not more than one of her stories a day, and allow them to work their spell slowly: they are made to last' Guardian When her father marries his second wife, Chrissy gets a new step sister. Three years older than her, Queenie is beautiful and kind, someone everybody wants to be friends with. Chrissy worships her. But when Queenie runs away at eighteen, their lives quietly diverge. Joyce Carol Oates has described

Alice Munro's work as 'tales of domestic tragicomedy that seemed to open up, as if by magic, into wider, deeper, vaster dimensions.' Queenie is Munro at her subtle, heart-breaking best. 'One of the great short story writers not just of our time but of any time' New York Times Book Review Markets and Cultural Voices - Tyler Cowen 2009-11-10

This intriguing work explores the world of three amateur artists. A native tradition, all of their painting is done in Mexico, yet, the finished product is sold almost exclusively to wealthy American art buyers. Cowen examines this cultural interaction between Mexico and the United States to see how globalization shapes the lives and the work of the artists and their families. The story of these three artists reveals that this exchange simultaneously creates economic opportunities for the artists, but has detrimental effects on the village. A view of the daily village life of three artists connected to the larger art world, this book should be of particular interest to those in the fields of cultural economics, Latino studies, economic anthropology and globalization.
