American Kulak - Marcus Sagire 2020-01-09
American Kulak offers a warning that socialism is on the rise in America, especially among the young. Marc Sagire makes a compelling case that every time any form of Marxism has been tried throughout history, it has resulted in economic calamity. Americans are flirting with

disaster, and no one will pay the price more than affluent professionals. While among America's higher income earners, the affluent professional lacks the vast resources to defend themselves the way the mega rich can; but they are still well off enough to be a target in the event the American government takes a radical turn

towards a Marxist economic system. There is a stark historical precedent for the affluent being persecuted by a Marxist regime. When the Bolsheviks seized power in Russia 100 years ago, an affluent class of peasants known as the Kulaks were specifically targeted for hostile mistreatment by the new Soviet government. It is entirely possible that the American affluent professional class could find themselves in a similar situation in the event America comes to be ruled by a neo-Marxist regime. It has happened before and can happen again. Marc Sagire walks the reader through all the potential avenues that such a regime could take were they afforded the opportunity. The book ends with a detailed discussion of the causes of the current ideological assent of socialism, and offers a series of utilitarian populist reforms that, while certainly not appetizing for the staunch free market advocate, would be preferable to the debasement of a Marxist regime. This book should be on the "must read" list for anyone

concerned with preserving America's economic traditions and heritage, as they are very much at stake.

Alfa Romeo 916 GTV and Spider - Robert Foskett 2013-03-01

Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble Fiat hatchback, would the cars ever be considered

'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model. Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa

Romeo.

2007-05-01

AMG of Germany have been successfully applying their magic to cars and engines since the 60s and the company's name also continued

to become more widely known. In 1988 AMG teamed with Daimler-Benz for its motor racing comeback in the German Touring Car Championship. It was a relationship that would continue to strengthen through the years, culminating in the merger of the two companies in 1999. The partnership with Mercedes-Benz has produced some exciting road cars plus the CLK-GTR built for the road and the track.

Pope Francis - Mario I. Aguilar 2021-12-31

This volume is about Pope Francis, the diplomat. In his eight years of pontificate, Pope Francis as a peacemaker has propagated the ideas of human and divine cooperation to build a global human fraternity through his journeys outside the Vatican. This book discusses his endeavours to connect and develop a common peaceful international order between countries, faith communities, and even antagonistic communities through a peaceful journey of human beings. The book analyses his speeches, and meetings as a diplomat of peace, including

his visits to Cuba and the United States, and his mediations for peace in Colombia, Myanmar, Kenya, Egypt, Turkey, Jordan, Jerusalem, the Central African Republic, Sri Lanka, and Bangladesh. It discusses the role of Pope Francis as mediator in different circumstances through his own writings, letters, and Vatican documents; his encounters with world leaders; as well as his contributions to a universal understanding on inter-faith dialogue, climate change and the environment, and human migration and the refugee crisis. The volume also sheds light on his ideas on a post-pandemic just social order, as summarised in his 2020 encyclical. A definitive work on the diplomacy and the travels of Pope Francis, this volume will be of great interest to scholars and researchers of religious studies, peace and conflict studies, ethics and philosophy, and political science and international relations. It will be of great interest to the general reader as well.

Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction National Aeronautics and Space Administration (NASA) 2018-07-23
Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the

airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Perspectives on Consumer Behavior
Włodzimierz Sroka 2020-06-26

This book explores key factors associated with

consumer behaviour, from both a theoretical and practical perspective. It particularly focuses on the consumer in the 21st century – educated and conscious, but also impatient, disloyal and capricious. The book is divided into three main parts: the first part discusses the theoretical and legal aspects of consumers' behaviour, analysing the government's role in regulating consumer behaviour and the role of the European Union. The second part then examines organisational strategies, such as omni-channel retailing and branding products. And lastly, the third part describes consumer behaviours in the context of individual products and services, from coffee to energy.

Dating Game - Danielle Steel 2009-02-25

In her 57th bestselling novel, Danielle Steel brilliantly chronicles the roller-coaster ride of dating the second time around—and tells a captivating story of the surprises one woman encounters when she's thrust into the terrifying, exhilarating world of the Dating Game. Paris Armstrong never saw it coming. With two grown children and a lovely home in Connecticut, Paris was happy with her marriage, her family, her life. So when her husband of twenty-four years said they needed to talk, Paris couldn't imagine what he was about to say. "I want a divorce," Peter tells her. Just like that, the husband she adored had dumped her for a younger woman. And just like that, Peter and his thirty-one-year-

old lover had made their plans for their future, leaving Paris to pick up the pieces of a shattered life. Within days, Peter was gone. And Paris was left to figure out how she intended to get through the next day, let alone the rest of her life. The task could not have been more painful. First came the tears. Then the excruciating attempts by well-meaning friends to “fix her up” with men who paled in comparison to Peter. Worse yet, she still loved him. Finally, Paris realized she was in a fight for her very survival. Drastic measures were called for. Even her shrink agreed. It was time to move—as far away as possible, just after Peter remarried. Paris had never felt, or been, more alone. Saying good-bye to the world she knew and loved, Paris heads west, to San Francisco, and discovers being single in a world full of men who were too young, too old, too married, or too good to be true. For Paris, the list seemed endless...the charming commitment-phobe...the drunken Neanderthal...the young Frenchman—so

adorably sexy she almost forgot about his age, and did, for a while. With her dating track record veering between disappointing and disastrous, and her daughter now engaged to a man Paris’s age, Paris finally comes to the conclusion that romance is not in her future. That’s when her small circle of offbeat, loving friends becomes more important than ever before. And a decision Paris makes only for herself changes her life once more. The secret, she discovers finally, is in finding the gifts in life’s unexpected twists and turns, and turning despair into freedom and loss into joy. In a poignant, wickedly funny novel about getting dumped and getting over it, about tackling life with both courage and laughter, Danielle Steel explores what it means to start over, whether you wanted to or not, and finding something better than you had before.
