**Environmental Information in Instructions
for Use of Consumer Products** - Ari Nissinen
2005-03-11

The European Union has highlighted the issue of
environmentally sound use of products in the
context of Integrated Product Policy, IPP.
Accordingly, consumers should have easy access
to understandable, relevant and credible
environmental information. Information about
product characteristics is available in different
forms and sources, but in many cases, relevant
environmental information is not available on
the product itself. The study described in this

report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.

A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! There's guitars and harpsichords! Bagpipes and cellos and trombones! How can he find the one that is just right for him out of all those options?
