The Other Side of Criminology - Gerardus Petrus Hoefnagels
2013-06-29

Didactically, a textbook of criminology should start at the beginning. The learning process, also an emotional process, begins in criminology with the concepts, views, emotions, attitudes and ideas we have regarding crime and criminals. Exploration of these underlying factors is one of the aims of the present book. We can free our thinking only by being aware of the significance of our own feelings and thoughts about a phenomenon like crime. 'That is the basic problem confronting us. In scientific thinking implicit postulates as to the *sensus communis*, unless recognized and 1 neutralized, grow into

idols.' The fight against crime is one example of such an idol. Crimes and criminals exist only by virtue of reactions to certain forms of behavior. For this reason this book will begin by examining the reactions of society to crime. Criminology is primarily a science of others than offenders. In this sense I invert criminology. The history of criminology is not so much a history of offenders, 2 as a history of the reactions of those in power.

Psychology: Core Concepts, 7/e provides rich coverage of the foundational topics taught for introductory psychology. Each major section of every chapter is organized around a single concept, called a Core Concept. The Core Concepts allow readers to draw connections across the chapter and see the big picture of psychology. Learning is then reinforced through focused application and critical thinking activities.

The 7th edition features an enhanced critical thinking emphasis, with new chapter-opening "Problems" and new end-of-chapter critical thinking applications that promote active learning. MyPsychLab is an integral part of the Zimbardo / Johnson / McCann Hamilton program. Engaging activities and assessments provide a teaching and learning system that helps students think critically. With MyPsychLab, students can watch videos on psychological research and applications, participate in virtual classic experiments, and develop critical thinking skills through writing. Psychology: Core Concepts, 7/e is available in a new DSM-5 Updated Edition. To learn more, click here. This title is available in a variety of formats - digital and print. eminent mathematician G. Polya, *How to Solve It* will show anyone in any field how to think straight. In lucid and appealing prose, Polya reveals how the mathematical method of demonstrating a proof or finding an unknown can be of help in attacking any problem that can be "reasoned" out—from building a bridge to winning a game of anagrams. Generations of readers have relished Polya's deft—indeed, brilliant—instructions on stripping away irrelevancies and going straight to the heart of the problem.

Total Performance Scorecard

Hubert Rampersad 2004-02-18

In the post-Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical, trustworthy organizational climate. 'Total Performance Scorecard' introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory. The TPS contains a personal balanced scorecard, which is tied to an organizational balanced scorecard. These

scorecards reflect not only performance goals but personal learning and growth goals as well, and the organizational scorecards also address organizational climate issues. Continuous improvement, change management, 360 degree feedback, and the learning organization are theories that the TPS makes use of in a very straightforward way. If implemented, the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance, all within a culture that supports integrity, personal growth, learning, and open communication. Nutrition and Feeding of Organic Cattle, 2nd Edition -

Robert Blair 2021-04-28

Organic cattle farming is on the increase, with consumer demand for organic milk and meat growing yearly.

Beginning with an overview of the aims and principles behind organic cattle production, this book presents extensive information about how to feed cattle so that the milk and meat produced meet organic standards, and provides a comprehensive summary of ruminant digestive processes and nutrition. Since the publication of the first edition, global consumers have increasingly become concerned with the sustainability of meat production. Here, Robert Blair considers the interrelationships of sustainable practices and profitability of organic herds, reviewing how to improve forage production and quality,

and minimizing the need for supplementary feeding using off-farm ingredients.

Biology and Ecology of Anguillid Eels - Takaomi Arai
2016-02-22

Anguillid eels have fascinated biologists for centuries due to their spectacular long-distance migrations between freshwater habitats and their spawning areas far out in the ocean. This book provides a long overdue update on the biology and ecology of anguillid eels and features comprehensive coverage of the key features of the genus *Anguilla*. It covers a broad spectrum of topics on the biology (taxonomy, phylogeny, evolution, reproduction, feeding, salinity adaptation) and ecology (life history, recruitment, migration) of anguillid eels. It also brings together important information on the state of eel fisheries, conservation, exploitation, and management. *Pharmaceutical Compounding and Dispensing* John F. Marriott 2010

Pharmacists have been responsible for compounding

medicines for centuries. Although most modern medicines are not compounded in a local pharmacy environment, there are still occasions when it is imperative that pharmacists have this knowledge. *Pharmaceutical Compounding and Dispensing* provides a comprehensive guide to producing extemporaneous formulations safely and effectively. This is a modern, detailed and practical guide to the theory and practice of extemporaneous compounding and dispensing. Fully revised and updated, this new edition will be an indispensable reference for pharmacy students and practicing pharmacists. Supplementary videos demonstrating various dispensing procedures can be viewed online at www.pharmpress.com/PCDvideos.

Amino Acids in Animal

Nutrition - J. P. Felix D'Mello 2003

Amino acid metabolism and nutrition of farm animals continues to be an active area of research. However, since the publication of the first edition, as *Amino Acids in Farm Animal Nutrition* (1994), there is now a need to take into account advances in the amino acid nutrition of a wider range of animals, including companion animals. In this new edition, the editor has attempted to retain chapter imparting strength to the first version, while introducing authors with new ideas and vision, as well as chapters on other animals such as cats and dogs. The book is thematically structured. Part 1 includes chapter of an introductory and general nature with applications to a wide range of animal species. The next four parts are species-related sections, including pigs, poultry, ruminants and other animals. The chapters in the final section cover applications and perspectives. The book has been written as a reference work for advanced

students as well as researchers in animal nutrition.

Nutrition and Metabolism - Michael J. Gibney 2003-11-17

Having ensured a basic knowledge in nutrition with Introduction to Human Nutrition, this book allows students to explore nutrition and metabolism across the various systems of the body rather than to deal in advanced

aspects of nutrition and metabolism on a nutrient by nutrient basis or by group of nutrients. Thus there is not an identifiable chapter on Vitamin A; this vitamin is covered in all of these chapters: The Nutrient Requirements of Tissues and Organs, The Sensory System, Molecular aspects of Nutrition, The Reproductive System, The immune and inflammatory System and Under-nutrition. Nutrition & Metabolism provides the student with the detailed information they need about how different nutrients effect and are required by different parts of the body. This allows the student to concentrate on parts of the body at one time rather than concentrating on each individual nutrient or mineral, making the information more assessable and easier to digest. relationship between women of both the European and the Indonesian population and the colonial state in the former Netherlands Indies in the first half of the twentieth century. Based on new data from a variety of sources: colonial archives, journals, household manuals, children's literature, and press surveys, it analyses the women-state relationship by presenting five empirical studies on subjects, in which women figured prominently at the time: Indonesian labour, Indonesian servants in colonial homes, Dutch colonial fashion and food, the feminist struggle for the vote and the intense debate about monogamy of and by women at the end of the 1930s. An introductory essay combines the outcomes of the case studies and relates those to debates about Orientalism, the construction of whiteness, and to questions of modernity and the colonial state formation.
