Humor, Seriously - Jennifer Aaker 2021-02-02
WALL STREET JOURNAL, LOS ANGELES TIMES, AND USA TODAY BESTSELLER •

Anyone—even you!—can learn how to harness the power of humor in business (and life), based on the popular class at Stanford's Graduate School of Business. Don't miss the authors' TED Talk, "Why great leaders take humor seriously," online now. "The ultimate guide to using the magical power of funny as a tool for leadership and a force for good."—Daniel H. Pink, #1 New York Times bestselling author of *When and Drive* We are living through a period of unprecedented uncertainty and upheaval in both our personal and professional lives. So it should come as a surprise to exactly no one that trust, human connection, and mental well-being are all on the decline. This may seem like no laughing matter.

Yet, the research shows that humor and laughter are among the most valuable tools we have at our disposal for strengthening bonds and relationships, diffusing stress and tension, boosting resilience, and performing when the stakes are high. That's why Jennifer Aaker and Naomi Bagdonas teach the popular course Humor: Serious Business at the Stanford Graduate School of Business, where they help some of the world's most hard-driving, blazer-wearing business minds infuse more humor and levity into their work and lives. In Humor, Seriously, they draw on findings by behavioral scientists, world-class comedians, and inspiring business leaders to reveal how humor works and—more important—how you can use more of it, better. Aaker and Bagdonas unpack the theory and application of humor: what makes something funny, how to mine your life for material, and simple ways to identify and leverage your unique humor style. They show how to use humor to rebuild vital connections;

appear more confident, competent, and authentic at work; and foster cultures where levity and creativity can thrive. President Dwight David Eisenhower once said, "A sense of humor is part of the art of leadership, of getting along with people, of getting things done." If Dwight David Eisenhower, the second least naturally funny president (after Franklin Pierce), thought humor was necessary to win wars, build highways, and warn against the military-industrial complex, then you might consider learning it too.

Creativity, Inc. (The Expanded Edition) - Ed Catmull 2023-06-13

The co-founder and longtime president of Pixar updates and expands upon his New York Times bestseller on creative leadership, reflecting on the management principles used to build Pixar's singularly successful culture, including what he got wrong—and how he made it right In 1986, Ed Catmull co-founded Pixar, a modest start-up with an immodest goal: to make the first-ever computer animated movie. Nine years later, Pixar released Toy Story, which went on to establish Pixar as one of the most successful and

innovative companies on earth. In 2014, Catmull shared the secrets behind the culture he helped build in Creativity, Inc., which has become a kind of bible for effective, nurturing leadership. His sometimes counterintuitive advice includes giving a mediocre idea to a great team (because they'll either fix it or come up with something better) and not worrying about preventing risks (because it's the manager's job to make it safe for others to take them). Now, Catmull is updating Creativity, Inc. to account for the years after it was published and to further illuminate the development of the unique culture at Pixar. Featuring a new introduction, two entirely new chapters, four new chapter postscripts, and a series of reflections at the end, this new edition details how Catmull built a culture that doesn't just pay lip service to the importance of things like honesty, communication, and originality, but commits to them. Although he once believed that core values were unnecessary to an organization, after surveying his employees, he

came up with four guideposts to center Pixar's work: community, innovation, ownership, and authenticity. As Catmull has discovered, pursuing excellence isn't a one-off assignment, but an ongoing, day-in, day-out, full-time job. And Creativity, Inc. explores how it is done.

Big data entrepreneur Allen Gannett overturns the mythology around creative genius, and reveals the science and secrets behind achieving breakout commercial success in any field. We have been spoon-fed the notion that creativity is the province of genius -- of those favored, brilliant few whose moments of insight arrive in unpredictable flashes of divine inspiration. And if we are not a genius, we might as well pack it in and give up. Either we have that gift, or we don't. But Allen shows that simply isn't true. Recent research has shown that there is a predictable science behind achieving commercial success in any creative endeavor, from writing a popular novel to starting up a successful company to creating an effective marketing campaign. As the world's most creative people have discovered, we are enticed by the novel and the familiar. By understanding the mechanics of what Gannett calls "the creative curve" - the point of optimal tension between the novel and the familiar - everyone

can better engineer mainstream success. In a thoroughly entertaining book that describes the stories and insights of everyone from the Broadway team behind Dear Evan Hansen, to the founder of Reddit, from the Chief Content Officer of Netflix to Michelin star chefs, Gannett reveals the four laws of creative success and identifies the common patterns behind their achievement.

The Contrarian's Guide to Leadership -

Steven B. Sample 2003-04-18

Sample—the man who turned the University of Southern California into one of the most respected and highly rated universities in the country—challenges many conventional teachings on the subject. Here, Sample outlines an iconoclastic style of leadership that flies in the face of current leadership thought, but a style that unquestionably works, nevertheless. Sample urges leaders and aspiring leaders to focus on some key counterintuitive truths. He offers his own down-to-earth, homespun, and often provocative advice on some complex and thoughtful issues. And he provides many practical, if controversial, tactics for successful leadership, suggesting, among other things, that leaders should sometimes compromise their

principles, not read everything that comes across their desks, and always put off decisions. *Embrace Your Weird* - Felicia Day 2019-10-01

Tip of the Spear - Ryan Hendrickson

2020-07-07

The inspiring true story of a US Special Forces soldier who was medically retired after stepping on an IED, and his incredible return to active duty. Sergeant First Class (SFC) Ryan Hendrickson is a brave, determined, and courageous soldier -- a Green Beret clearing the way for his twelve-man team while conducting combat operations against the Taliban. As the "tip of the spear," his role is to ensure the route taken by U.S. and Afghan troops are free of IEDs -- improvised explosive devices. Many soldiers do not survive their last step; those who do often lose at least one limb. While rescuing an Afghan soldier outside a mud-hut compound in 2010 -- knowing that he was in "uncleared" territory -- Ryan stepped on an IED with his right foot. The

device exploded, leaving his foot dangling at the end of his leg. American soldiers losing a limb is an all-too-common occurrence. But what makes Ryan's story different is that after undergoing two dozen surgeries and a tortuous rehabilitation, he was medically retired but fought to return to active duty. Multiple skin grafts to his leg and right foot successfully reattached his lower leg, and he was aided in his recovery by wearing a new prosthetic device known as an IDEO (Intrepid Dynamic Exoskeletal Orthosis). Once he passed a series of crucial physical tests, Ryan was able to rejoin the Green Berets within a year and physically perform his duties, redeploying to Afghanistan in March 2012. In 2016, he volunteered to return to Afghanistan with Bravo Company, 2nd Battalion, 7th Special Forces Group. During a firefight with the Taliban, he risked his life under heavy enemy fire to rescue three Afghan soldiers cut off from friendly forces and return the bodies of two dead Afghan soldiers under the

ethos that "no one gets left behind." For his heroic efforts on the battlefield, SFC Ryan Hendrickson was awarded a Silver Star, the nation's third-highest award for valor. An engaging and harrowing account, Tip of the Spear tells the amazing story of one Green Beret's indomitable spirit.

To Pixar and Beyond - Lawrence Levy

2017-03-02

A Sunday Times Best Book of the Year 2017 One day in November 1994, Lawrence Levy received a phone call out of the blue from Steve Jobs, whom he'd never met, offering him a job running Pixar, a little-known company that had already lost Jobs \$50 million. With Pixar's prospects looking bleak, it was with some trepidation that Levy accepted the position. After a few weeks he discovered that the situation was even worse than he'd imagined. Pixar's advertising division just about broke even, its graphics software had few customers, its short films didn't make any money and, on top of all that, Jobs was pushing to take the company public. Everything was riding on the studio's first feature film, codenamed Toy Story, and even then it would have to be one of the most successful animated features of all time... Full of wisdom on bringing business and creativity together, and recounting

the touching story of Levy's enduring friendship with Jobs, To Pixar and Beyond is a fascinating insider's account of one of Hollywood's greatest success stories.

Scaling Up Excellence Robert I. Sutton

2014-02-04

Wall Street Journal Bestseller "The pick of 2014's management books." -Andrew Hill, Financial Times "One of the top business books of the year." -Harvey Schacter, The Globe and Mail Bestselling author, Robert Sutton and Stanford colleague, Huggy Rao tackle a challenge that determines every organization's success: how to scale up farther, faster, and more effectively as an organization grows. Sutton and Rao have devoted much of the last decade to uncovering what it takes to build and uncover pockets of exemplary performance, to help spread them, and to keep recharging organizations with ever better work practices. Drawing on inside accounts and case studies and academic research from a wealth of industries--

including start-ups, pharmaceuticals, airlines, retail, financial services, high-tech, education, non-profits, government, and healthcare-- Sutton and Rao identify the key scaling challenges that confront every organization. They tackle the difficult trade-offs that organizations must make between whether to encourage individualized approaches tailored to local needs or to replicate the same practices and customs as an organization or program expands. They reveal how the best leaders and teams develop, spread, and instill the right mindsets in their people-- rather than ruining or watering down the very things that have fueled successful growth in the past. They unpack the principles that help to cascade excellence throughout an organization, as well as show how to eliminate destructive beliefs and behaviors that will hold them back. *Scaling Up Excellence* is the first major business book devoted to this universal and vexing challenge and it is destined to become the standard bearer in the field.

Misterying the VC Game- Jeffrey Bussgang
2010-04-29

Entrepreneurs who dream of building the next Amazon, Facebook, or Google can take advantage of one of the most powerful economic engines the world has ever known: venture capital. To do so, you need to woo, impress, and persuade venture capitalists to take a risk on an unproven idea. That task is challenge enough. But choosing the right investor can be harder still. Even if you manage to get backing, you want your VC to be a partner, not some adversary who will undermine your vision in order to make a quick return. Jeffrey Bussgang is one of a few people who have played on both sides of this high-stakes game. By his early thirties, he had helped build two successful start-ups-one went public, the other was acquired. Now he draws on his experience and unique perspective on the "other side" as a venture capitalist helping entrepreneurs bring their dreams to fruition. Bussgang offers

detailed insights, colorful stories, and practical advice gathered from his own experience as well as from interviews with dozens of the most successful players on both sides of the game, including Twitter's Jack Dorsey and LinkedIn's Reid Hoffman. He reveals how to get noticed, perfect a pitch, and negotiate a partnership that works for everyone. An insider's guide to the secrets of the world venture capital, Mastering the VC Game will prove invaluable for entrepreneurs seeking capital and successful partnerships.

Creativity, Inc. - Ed Catmull 2014-04-08

From Ed Catmull, co-founder (with Steve Jobs and John Lasseter) of Pixar Animation Studios, comes an incisive book about creativity in business—sure to appeal to readers of Daniel Pink, Tom Peters, and Chip and Dan Heath. *Creativity, Inc.* is a book for managers who want to lead their employees to new heights, a manual for anyone who strives for originality, and the first-ever, all-access trip into the nerve center of Pixar Animation—into the meetings, postmortems, and “Braintrust” sessions where some of the most successful films in history are made. It is, at heart, a book about how to build a creative culture—but it is also, as Pixar co-founder and president Ed Catmull writes, “an expression of the ideas that I believe make the best in us possible.” For nearly twenty years, Pixar has dominated the world of animation, producing such beloved films as the Toy Story trilogy, *Monsters, Inc.*, *Finding Nemo*, *The Incredibles*, *Up*, and *WALL-E*, which have gone

on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his founding Pixar with Steve Jobs and John Lasseter in 1986. Nine years later, *Toy Story* was released, changing animation forever. The essential ingredient in that movie’s success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on philosophies that protect the creative process and defy

convention, such as: • Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better. • If you don't strive to uncover what is unseen and understand its nature, you will be ill prepared to lead. • It's not the manager's job to prevent risks. It's the manager's job to make it safe for others to take them. • The cost of preventing errors is often far greater than the cost of fixing them. • A company's communication structure should not mirror its organizational structure. Everybody should be able to talk to anybody. • Do not assume that general agreement will lead to change—it takes substantial energy to move a group, even when all are on board.

Soundtracks - Jon Acuff 2021-04-06

Overthinking isn't a personality trait. It's the sneakiest form of fear. It steals time, creativity, and goals. It's the most expensive, least productive thing companies invest in without

even knowing it. And it's an epidemic. When New York Times bestselling author Jon Acuff changed his life by transforming his overthinking, he wondered if other people might benefit from what he discovered. He commissioned a research study to ask 10,000 people if they struggle with overthinking too, and 99.5 percent said, "Yes!" The good news is that in *Soundtracks*, Acuff offers a proven plan to change overthinking from a super problem into a superpower. When we don't control our thoughts, our thoughts control us. If our days are full of broken soundtracks, thoughts are our worst enemy, holding us back from the things we really want. But the solution to overthinking isn't to stop thinking. The solution is running our brains with better soundtracks. Once we learn how to choose our soundtracks, thoughts become our best friend, propelling us toward our goals. If you want to tap into the surprising power of overthinking and give your dreams more time and creativity, learn how to DJ the

soundtracks that define you. If you can worry, you can wonder. If you can doubt, you can dominate. If you can spin, you can soar.
