2010-02-19

It is now trite knowledge that corporate criminal liability is laced with a large number of contradictions that seriously threaten its legitimacy. This book demonstrates that these contradictions may be avoided if courts consistently refer to an adequate mechanism of imputation. It proposes parameters for evaluating mechanisms of imputation and shows how an adequate mechanism may be determined. This distinctive book provides students and practitioners with an exposition of the current substantive and procedural corporate criminal law and considers other ways of regulating the activities of corporations than using the criminal law. It also addresses the distinction between internal knowledge and external knowledge with reference to pedigreed and non-pedigreed rules and shows how the concept of discursive dilemma may be employed to aggregate the acts and intents of agents for the purposes of imputing these acts and intents to accused corporations and holding them liable. This book is highly recommended for students of criminology, law and business. It should also be of interest to defence counsels, prosecutors and regulatory agencies that either represent and advise corporate defendants or seek to hold corporations accountable for the breach of criminal law standards.

**The Teaching of Criminal Law** - Kris Gledhill  
2016-08-19

The Teaching of Criminal Law provides the first considered discussion of the pedagogy that should inform the teaching of criminal law. It originates from a survey of criminal law courses in different parts of the English-speaking world which showed significant similarity across countries and over time. It also showed that many aspects of substantive law are neglected. This prompted the question of whether any real consideration had been given to criminal law course design. This book seeks to provide a

critical mass of thought on how to secure an understanding of substantive criminal law, by examining the course content that best illustrates the thought process of a criminal lawyer, by presenting innovative approaches for securing active learning by students, and by demonstrating how criminal law can secure other worthwhile graduate attributes by introducing wider contexts. This edited collection brings together contributions from academic teachers of criminal law from Australia, New Zealand, the United Kingdom, and Ireland who have considered issues of course design and often implemented them. Together, they examine several innovative approaches to the teaching of criminal law that have been adopted in a number of law schools around the world, both in teaching methodology and substantive content. The authors offer numerous suggestions for the design of a criminal law course that will ensure students gain useful insights into criminal law and its role in society. This book helps fill the gap in research into criminal law pedagogy and demonstrates that there are alternative ways of delivering this core part of the law degree. As such, this book will be of key interest to researchers, academics and lecturers in the fields of criminal law, pedagogy and teaching methods.

### **Law and Morality at War - Adil Ahmad Haque 2017**

The laws are not silent in war, but what should they say? What is the moral function of the law of armed conflict? Should the law protect civilians who do not fight but help those who do? Should the law protect soldiers who perform non-combat functions or who may be safely captured? How certain should a soldier be that an individual is a combatant rather than a civilian before using lethal force? What risks should soldiers take on themselves to avoid harming civilians? When do inaccurate weapons become unlawfully indiscriminate? When does 'collateral damage' to civilians become unlawfully disproportionate? Should civilians lose their legal rights by serving, voluntarily or involuntarily, as human shields? Finally, when should killing civilians constitute a war crime? These are the questions that *Law and Morality at War* answers, contributing to a cutting-edge international debate. Drawing on the concepts and methods of contemporary moral and legal philosophy, the book develops a normative framework within which the laws of war and international criminal law can be evaluated, criticized, and reformed. While several philosophical works critically examine the moral status of civilians and combatants, this book fills a gap, offering both an account of the laws of war and war crimes, and proposing how the law could be improved from a moral point of view. Finally, it explores when, if ever, the emotional pressures under which soldiers act should partially or wholly excuse their wrongful actions
