Revi t a l i z i n g C r i m i n o l o g i c a l Theory: - Steve Hall

2015-05-22

This book provides a short, comprehensive and accessible introduction to Ultra-Realism: a unique and radical school of criminological thought that has been developed by the authors over a number of years. After first outlining existing schools of thought, their major intellectual flaws and their underlying politics in a condensed guide that will be invaluable to all undergraduate and postgraduate students, Hall and Winlow introduce a number of important new concepts to criminology and suggest a new philosophical foundation, theoretical framework and research programme. These developments will enhance the discipline's ability to explain human motivations, construct insightful representations of reality and answer the fundamental question of why some human beings risk inflicting harm on others to

further their own interests or achieve various ends. Combining new philosophical and psychosocial approaches with a clear understanding of the shape of contemporary global crime, this book presents an intellectual alternative to the currently dominant paradigms of conservatism, neoclassicism and left-liberalism. In using an advanced conception of "harm", Hall and Winlow provide original explanations of criminal motivations and make the first steps towards a paradigm shift that will help criminology to illuminate the reality of our times. This book is essential reading for academics and students engaged in the study of criminology, sociology, criminological theory, social theory, the philosophy of social sciences and the history of crime.

Criminology Goes to the Movies - Nicole Rafter
2011-09-01

From a look at classics like *Psycho* and *Double Indemnity* to recent films like *Traffic* and *Thelma & Louise*, Nicole Rafter and Michelle Brown show that criminological theory is produced not only in the academy, through scholarly research, but also in popular culture, through film. *Criminology Goes to the Movies* connects with ways in which students are already thinking criminologically through engagements with popular culture, encouraging them to use the everyday world as a vehicle for theorizing and understanding both crime and perceptions of criminality. The first work to bring a systematic and sophisticated criminological perspective to bear on crime films, Rafter and Brown's book provides a fresh way of looking at cinema, using the concepts and analytical tools of criminology to uncover previously unnoticed meanings in film, ultimately making the study of criminological theory more engaging and effective for students while simultaneously demonstrating

how theories of crime circulate in our mass-mediated worlds. The result is an illuminating new way of seeing movies and a delightful way of learning about criminology. Instructor's Guide

Environmental Criminology and Crime Analysis - Richard Wortley 2013-05-13

Environmental criminology is a generic label that covers a range of overlapping perspectives. At the core, the various strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime, and a conviction that careful analyses of these environmental influences are the key to the effective investigation, control and prevention of crime. Environmental Crime and Crime Analysis brings together for the first time the key contributions to environmental criminology to comprehensively define the field and synthesize the concepts and ideas surrounding environmental criminology. The chapters are written by leading theorists and practitioners in the field. Each chapter will analyze one of the twelve major elements of environmental criminology and crime analysis. This book will be essential reading for both practitioners and undergraduate and

postgraduate students taking courses in this subject.

An Introduction to Criminological Theory -

Roger Hopkins Burke

2018-11-01

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth

part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action, desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including 'the myth of the crime drop', the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new

developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of criminological theory, making it essential reading for those studying criminology and taking courses on theoretical criminology, understanding crime, and crime and deviance

The Oxford Handbook of Criminological Theory -

Francis T. Cullen 2015-12

The Origins of Criminology

Nicole H. Rafter 2009-06-02

Criminology is a unique field of study which purports to bring

scientific knowledge to the world of crime and criminals. Tracing the intellectual origins of criminology to physiognomy, phrenology, and evolutionary theories, this book demonstrates criminology's background in new attitudes toward science and the development of scientific methodologies applicable to social and mental phenomena. The book brings together a collection of 19th-century texts from the key originators of the practice of criminology - selected, introduced, and with commentaries by the leading scholar in this area, Nicole.

Reaffirming Rehabilitation -

Francis T. Cullen 2013

Reaffirming Rehabilitation, 2nd Edition, brings fresh insights to one of the core works of criminal justice literature. This groundbreaking work analyzes the rehabilitative ideal within the American correctional system and discusses its relationship to and conflict with political ideologies. Many researchers and policymakers rejected the value of rehabilitation after Robert Martinson's proclamation that "nothing works." Cullen and Gilbert's book helped stem the tide of negativism that engulfed the U.S. correctional system in the years that followed the popularization of the "nothing works" doctrine. Now Cullen traces the social impact on U.S. corrections policy. This new edition is appropriate as a textbook in corrections courses and as recommended reading in related courses. It also serves as a resource for researchers and policymakers working in the field of corrections. The first edition continues to be used in corrections courses even though it is out of print.

This new edition makes the book readily available, along with rich new content in the introduction and concluding chapter. Introduces a new generation to the ongoing clash of political agendas and research-based corrections policies. Supports critical thinking about the role of rehabilitation in our society.

Criminological Theory Francis T. Cullen 2006

In this comprehensive anthology, Francis Cullen and Robert Agnew take readers on an excursion from past to present, reviewing classic and contemporary theories of crime. Students are introduced to the foundations of criminology and to the competing theories that will shape thinking about crime in the years ahead. Building on the success of the second edition, the third edition features nine new selections and adds two new parts: "Conservative Criminology" and "Environmental Criminology." The third edition also begins with a unique "Guide for Readers"--an essay

that helps students understand both the structure of criminological theory and how to use the book's readings most effectively. A brief introduction precedes each individual reading, alerting readers to key points and integrating the selection into the larger theme of the section. These introductions serve as a useful "road map" as students explore the ongoing intellectual developments, diverse views, and continuing debates that make the study of criminological theory an exciting adventure.

Race, Ethnicity, and Policing Stephen K. Rice 2010-03-01

From Rodney King and "driving while black" to claims of targeting of undocumented Latino immigrants, relationships surrounding race, ethnicity, and the police have faced great challenge. *Race, Ethnicity, and Policing* includes both classic pieces and original essays that provide the reader with a comprehensive, even-handed sense of the theoretical underpinnings, methodological challenges, and existing

research necessary to understand the problems associated with racial and ethnic profiling and police bias. This path-breaking volume affords a holistic approach to the topic, guiding readers through the complexity of these issues, making clear the ecological and political contexts that surround them, and laying the groundwork for future discussions. The seminal and forward-thinking twenty-two essays clearly illustrate that equitable treatment of citizens across racial and ethnic groups by police is one of the most critical components of a successful democracy, and that it is only when agents of social control are viewed as efficient, effective, and legitimate that citizens will comply with the laws that govern their society. The book includes an introduction by Robin S. Engel and contributions from leading scholars including Jeffrey A. Fagan, James J. Fyfe, Bernard E. Harcourt, Delores Jones-Brown, Ramiro Martínez, Jr., Karen F. Parker, Alex R.

Piquero, Tom R. Tyler, Jerome H. Skolnick, Ronald Weitzer, and many others.

Crime and Coercion - M.

Colvin 2000-09-01

In a major new theory of criminal behavior, Mark Colvin argues that chronic criminals emerge from a developmental process characterized by recurring, erratic episodes of coercion. Colvin's differential coercion theory, which integrates several existing criminological perspectives, lays out a compelling argument that coercive forces create social and psychological dynamics that lead to chronic criminal behavior. While Colvin's presentation focuses

primarily on chronic street criminals, the theory is also applied to exploratory offenders and white-collar criminals. In addition, Colvin presents a critique of current crime control measures, which rely heavily on coercion, and offers in their place a comprehensive crime reduction program based on consistent, non-coercive practices.

Introducing Criminological

Thinking - Jon Heidt

2014-11-28

Visual techniques for applying criminological theory to social science research

Introducing Criminological Thinking: Maps, Theories, and Understanding is an accessible and user-friendly criminological theory text for students, instructors and researchers. In addition to the unique use of concept maps, mind maps, and other visual techniques to consider theory-based inquiry, this text combines an exploration of the core elements of theory with relevant examples drawn from biology, psychology, sociology, critical traditions, and integrative efforts. Unlike in other theory texts, the chapters are arranged by level of explanation to help students understand how theories from different disciplines interact with each other as a foundation

for many contemporary criminological theories. Authors Jon Heidt and Johannes Wheeldon have developed a seven-step model to identify key aspects of different theories including their historical and social context, base assumptions, scope, problem foci, terms/concepts, related research, and practical ramifications. This text offers both a student-friendly theoretical discussion and accessible visual examples to explain criminological theory and its applicability to social science research.

Crimes of the Powerful -

Dawn Rothe 2016-03-31

As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities,

and result in more victimization than street crimes. Crimes of the Powerful: An introduction is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and

postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings.

Encyclopedia of

Criminological Theory -

Francis T. Cullen 2010-09-23

'Consistently excellent.... The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond' - Adam Tocock, Reference Reviews In discussing a criminology topic, lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on, as if assuming their student audience possesses the necessary background to appreciate and integrate the reference. However, university reference librarians can tell you this is

often far from the case. Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics - the who, what, where, how and why, if you will. And reference librarians often find it difficult to guide these students to a quick, one-stop source. In response, SAGE Reference is publishing the two-volume Encyclopedia of Criminological Theory, available in both print and electronic formats. This serves as a reference source for anyone interested in the roots of contemporary criminological theory. Drawing together a team of international scholars, it examines the global landscape of all the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses. In addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it

provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Coverage will include: contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory.

State, Power, Crime
Roy Coleman 2009-10-16

'Following the outstanding introduction by the authors there are fifteen excellent original articles devoted to an integrated theory of the relationship between the state and crime. This work is on the cutting edge of critical criminology. It is a must read.'
- William J. Chambliss, Professor of Sociology, The George Washington University, USA. 'This book is a superb compilation of original papers by an impressive roster of authors. While the articles cover a wide range of empirical issues, from Northern Ireland and corporate crime to youth crime and heterosexual

hegemony they all explore the implications, strategies and mechanisms of state power. There isn't a weak paper here: all are extensively documented, well written, persuasive and scholarly in the very best sense.' - Professor Laureen Snider, Queens University, Canada 'State, Power, Crime is a hugely important book for these times. Bringing together some of the most original minds in criminology it offers a critical analysis of the state, how it constructs crime, responds to it and, at times, engages in the very same. The book is essential reading for anyone interested in justice, freedom and equality.' - Paddy Rawlinson, London School of Economics Featuring contributions by many of the leading scholars in the field, this seminal text explores the key themes and debates on state power today, in relation to crime and social order. It critically evaluates a range of substantive areas of criminological concern, including terrorism, surveillance, violence and the

media. State, Power, Crime provides: "historical overviews of key theories about state power " assessment of the relationship between crime, criminal justice and the state " analysis of the development of law and order policy " discussion of the impact of structural fissures such as gender, race and sexuality " an overview of current research and writing " critical reflection on the future direction of research and analysis " advice on further reading. In 1978, with the publication of Hall et al's Policing the Crisis and Poulantzas's State, Power, Socialism, the complexity of the state's interventions in maintaining a capitalist social order were laid bare for critical criminological analysis. State, Power, Crime offers an up-to-date and comprehensive examination of the challenges posed by state power, in relation to both criminal and social justice.

What is Criminology? - Mary Bosworth 2012-05-31

Criminology is a booming discipline, yet one which can appear divided and fractious. In this rich and diverse collection of 34 essays, some of the worlds leading criminologists respond to a series of questions designed to investigate the state, impact and future challenges of the discipline: What is criminology for? What is the impact of criminology? How should criminology be done? What are the key issues and debates in criminology today? What challenges does the discipline of criminology face? How has criminology as a discipline changed over the last few decades? The resulting essays identify a series of intellectual, methodological and ideological borders. Borders, in criminology as elsewhere, are

policed, yet they are also frequently transgressed; criminologists can and do move across them to plunder, admire, or learn from other regions. While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community. In traversing ideological, political, geographical and disciplinary borders, criminologists bring training, tools and concepts, as well as key texts to share with foreigners. From such exchanges, over time, borders may break down, shift, or spring up, enriching those who take the journey and those who are visited. It is, in other words, in criminologys capacity for and commitment to reflexivity, on which the strength of the field depends.

Key Ideas in Criminology and Criminal Justice - Travis C. Pratt 2010-10-20

By focusing on key ideas in both criminology and criminal justice, this book brings a new and unique perspective to understanding critical research in criminology and criminal justice -- heretofore, the practice has been to separate criminology and criminal justice. However, given their interconnected nature, this book brings both together cohesively. In going beyond simply identifying and discussing key contributions and their effects by giving students a broader socio-political context for each key idea, this book concretely conceptualizes the key ideas in ways that students will

remember and understand.
