Doing Nutrition Differently -

Allison Hayes-Conroy

2016-05-13

'Hegemonic nutrition' is produced and proliferated by a wide variety of social institutions such as mainstream nutrition science, clinical nutrition as well as

those less classically linked such as life science/agro-food companies, the media, family, education, religion and the law. The collective result is an approach to and practice of nutrition that alleges not only one single, clear-cut and consented-upon set of rules for

'healthy eating,' but also tacit criteria for determining individual fault, usually some combination of lack of education, motivation, and unwillingness to comply. Offering a collection of critical, interdisciplinary replies and responses to the matter of 'hegemonic nutrition' this book presents contributions from a wide variety of perspectives; nutrition professionals and lay people, academics and activists, adults and youth, indigenous, Chicana/o, Latina/o, Environmentalist, Feminist and more. The critical commentary collectively asks for a different, more attentive, and more holistic practice of nutrition. Most importantly, this volume demonstrates how this 'new' nutrition is actually already being performed in small ways across the American continent. In doing so, the volume empowers diverse knowledges, histories, and practices of nutrition that have been marginalized, recasts the objectives of dietary intervention, and most broadly, attempts to revolutionize the

way that nutrition is done.

Reinventing Pedagogy of the Oppressed - James D. Kirylo
2020-04-30

Since its publication in 1968 Paulo Freire's *Pedagogy of the Oppressed* has maintained its relevance well into the 21st century. This book showcases the multitude of ways in which Freire's most celebrated work is being reinvented by contemporary, educators, activists, teachers, and researchers. The chapters cover topics such as: spirituality, teacher identity and education, critical race theory, post-truth, academic tenure, prison education, LGBTQ educators, critical pedagogy, posthumanism and indigenous education. There are also chapters which explore Freire's work in relation to W.E.B Du Bois, Myles Horton, Martin Luther King, Jr., and Simone de Beauvoir. Written by leading first and second-generation Freirean scholars, the book includes a foreword by Ira Shor and an afterword by Antonia Darder.

Critical Perspectives in Food Studies - Mustafa Koc

2021-08-03

The market-leading interdisciplinary exploration of food and its essential place in our society by Canadian and international scholars. *Critical Perspectives in Food Studies* is a compelling examination of the shifting interpretations, perspectives, challenges, governance issues, and future visions that shape the study of food and food issues in Canada and around the world. With new chapters on a diverse range of current food-related issues, this third edition continues to bring students original contributions by Canadian scholars that will inspire readers to consider the varied and complex means by which we bring food to the table.

Bourdieu - Pierre Bourdieu 1993-08-15

Long a dominant figure in the French human sciences, Pierre Bourdieu has become internationally influential in the fields of sociology, anthropology, and cultural studies. A major figure in the development of "practice" as an organizing concept in social research, Bourdieu has emerged as the foremost advocate of reflexive social science; his work combines an astonishing range of empirical work with highly sophisticated theory. American reception of his works, however, has lacked a full understanding of their place within the broad context of French human science. His individual works separated by distinct boundaries between social science fields in American academia, Bourdieu's cohesive thought has come to this country in fragments. *Bourdieu: Critical Perspectives* provides a unified and

balanced appraisal of Bourdieu's varied works by both proponents and skeptics. The essays are written from the varied viewpoints of cultural anthropology, ethnomethodology and other varieties of sociology, existential and Wittgensteinian philosophies, linguistics, media studies, and feminism. They work around three main themes: Bourdieu's effort to transcend gaps between practical knowledge and universal structures, his central concept of "reflexivity," and the relations between social structure, systems of classification, and language. Ultimately, the contributors raise a variety of crucial theoretical questions and address problems that are important not only to understanding Bourdieu but to advancing empirical work of the kind he has pioneered. In an essay written especially for this volume, Bourdieu describes his own "mode of intellectual production" and the reasons he sees for its common misunderstanding. The

contributors are Hubert Dreyfus, Paul Rabinow, Charles Taylor, Aaron Cicourel, James Collins, William Hanks, Beate Kraus, Nicholas Garnham, Scott Lash, Roger Brubaker, and Loic Wacquant, and the editors.

Troubling Care - Pat Armstrong
2013

How can we plan, organise, distribute, and offer care in ways that treat both those who need it and those who provide it with dignity and respect?

Using the example of residential services, Troubling Care investigates the fractures in our care systems and challenges how caring work is understood in social policy, in academic theory, and among health care providers.

Critical Perspectives on Bell Hooks - Maria del Guadalupe Davidson 2009-03-04

Although bell hooks has long challenged the dominant paradigms of race, class, and gender, there has never been a comprehensive book critically reflecting upon this seminal scholar's body of work. Her written works aim to

transgress and disrupt those codes that exclude others as intellectually mediocre, and hooks' challenge to various hegemonic practices has heavily influenced scholars in numerous areas of inquiry. This important resource thematically examines hooks' works across various disciplinary divides, including her critique on educational theory and practice, theorization of racial construction, dynamics of gender, and spirituality and love as correctives in postmodern life. Ultimately, this book offers a fresh perspective for scholars and students wanting to engage in the prominent work of bell hooks, and makes available to its readers the full significance of her work. Compelling and unprecedented, *Critical Perspectives on bell hooks* is a must-read for scholars, professors, and students interested in issues of race, class, and gender.

The Industrial Diet - Anthony Winson 2013-05-15

The Industrial Diet chronicles

the long-term transformation of food from a natural resource into an edible commodity that far too often fails to nourish us. Anthony Winson reveals how a combination of technological changes, population growth, and political and economic factors helped constitute and transform mass dietary regimes from the nineteenth century to the present day, and he offers new evidence linking broad-based dietary changes with negative health effects. With its focus on the degradation of food and the emergent struggle for healthful eating, this book encourages us to reflect on the state of our food environments and to create realistic and innovative strategies that can lead to a healthier future.

Big Food- Simon N. Williams

consumption of unhealthy products, such as soft drinks and processed foods, continues to rise. The ongoing expansion of multinational food and beverage companies, or 'Big Food', is a key factor behind these trends. This collection provides critical insight into the global expansion of 'Big Food', including its incursion into low-and-middle income countries. It examines the changing dynamics of the global food supply, and discusses how low-income countries can alter the 'Big Food'-diet from the bottom-up. It examines a number of issues related to 'Big Food' marketing strategies, including the way in which they advertise to youths and the rural poor. These issues are discussed in terms of their public health implications, and their relation to public health activities, for example 'soda taxes', and the promotion of nutritionally-healthier products. This book was originally published as a special issue of Critical Public Health.

Health, Food and Social Inequality - Carolyn Mahoney
2015-02-20

Health, Food and Social Inequality investigates how vast amounts of consumer data are used by the food industry to enable the social ranking of products, food outlets and consumers themselves, and how this influences food consumption patterns. This book supplies a fresh social scientific perspective on the health consequences of poor diet. Shifting the focus from individual behaviour to the food supply and the way it is developed and marketed, it discusses what is known about the shaping of food behaviours by both social theory and psychology. Exploring how knowledge of social identities and health beliefs and behaviours are used by the

food industry, Health, Food and Social Inequality outlines, for example, how commercial marketing firms supply food companies with information on where to locate snack and fast foods whilst also advising governments on where to site health services for those consuming such foods disproportionately. Giving a sociological underpinning to Nudge theory while simultaneously critiquing it in the context of diet and health, this book explores how social class is an often overlooked factor mediating both individual dietary practice and food marketing strategies. This innovative volume provides a detailed critique of marketing and food industry practices and places class at the centre of diet and health. It is suitable for scholars in the social sciences, public health and marketing.

Critical Perspectives on Art History - John C. McEnroe
2002

Focusing on the dynamic connections between art history and real life, this introductory survey of Western art history introduces readers to the complexity of issues and approaches that characterize the discipline today in a unique, multi-perspective anthology that covers everything from the power of images to shape the way we know things, to the political and policy debates about the place of the arts in our society. Pairs short readings of contrasting views on specific issues and themes in art history, helping readers think critically about differences in interpretations and approaches, and realize that in our increasingly visual world, art history is a vital discipline that is closely tied to the most challenging debates in other disciplines and in society at large—including post-modernism, feminism, “political correctness” , multi-

culturalism, and censorship. Features readings from many diverse contributors with different backgrounds and experiences—including critics, literary scholars, political figures, journalists, and art historians. Separates readings into classical, medieval, renaissance and baroque, and modern periods. For art historians and general readers interested in a contemporary and dynamic study of the history of Western art and visual studies.

Critical Perspectives on Veganism - Jodey Castricano
2016-09-13

This book examines the ethics,

politics and aesthetics of veganism in contemporary culture and thought.

Traditionally a lifestyle located on the margins of western culture, veganism has now been propelled into the mainstream, and as agribusiness grows animal issues are inextricably linked to environmental impact as well as to existing ethical concerns. This collection connects veganism to a range of topics including gender, sexuality, race, the law and popular culture. It explores how something as basic as one's food choices continue to impact on the cultural, political, and philosophical discourse of the modern day, and asks whether the normalization of veganism strengthens or detracts from the radical impetus of its politics. With a Foreword by Melanie Joy and Jens Tuidor, this book analyzes the mounting prevalence of veganism as it appears in different cultural shifts and asks how veganism might be rethought and re-practised in the twenty-first century.

Preventing Dementia? -

Annette Leibing 2020-10-06

The conceptualization of dementia has changed dramatically in recent years with the claim that, through early detection and by controlling several risk factors, a prevention of dementia is possible. Although encouraging and providing hope against this feared condition, this claim is open to scrutiny. This volume looks at how this new conceptualization ignores many of the factors which influence a dementia sufferers' prognosis, including their history with education, food and exercise as well as their living in different epistemic cultures. The central aim is to question the concept

of prevention and analyze its impact on aging people and aging societies.

Critical Dietetics and Critical Nutrition Studies - John Coveney 2019-02-13

This second volume in the Food Policy series focuses on critical nutrition and dietetics studies, offering an innovative and interdisciplinary exploration of the complexities of the food supply and the actors in it through a new critical lens. The volume provides an overview of the growth of critical nutrition and dietetics since its inception in 2009, as well as commentary on its continuing relevance and its applicability in the fields of dietetic education, research, and practice. Chapters address key topics such as how to bring critical dietetics into conventional practice, applying critical diets in clinical practice, policy applications, and new perspectives on training and educating a critical nutrition and dietetic workforce. Contributing authors from around the globe also discuss the role of critical nutrition dietetics in industry,

private practice, and consultancy, as well the role of critical dietetics in addressing the food, hunger, and health issues associated with the world economic crisis. The authors designed the volume to be a reference work for students enrolled in undergraduate and postgraduate courses in Critical Nutrition, Critical Food Studies, and Critical Dietetics. Each chapter offers concise aims and learning outcomes, as well as assignments for students and a concise chapter summary. These features enhance the value of the volume as a learning tool.

Breaking Down Breaking Bad - Matt Wanat 2016-05-15

The story of Walter White's transformation from chemistry teacher to drug lord has captured the imagination of television viewers around the world. This collection of essays sets the series in the context of American culture, analyzing its reinvention of classic themes in literature. A protagonist who sets out on a quest and discovers things about himself

and the world is a common enough convention in American storytelling. Typically the hero encounters evil along the way and acquires worldly wisdom. Vince Gilligan, the creator of *Breaking Bad*, offers a dynamic variant of this quest, posing the question of how far a desperate man facing death will go in order to achieve a sense of self and financial security for his family. Going beyond the obvious ethical issues that have preoccupied viewers and critics alike, the essays in this book cut across disciplines, delve deeply into contemporary issues, and explore the pure pleasure and entertainment value of the series.

Critical Perspectives on Food Sovereignty Marc Edelman
2017-10-02

This volume is a pioneering contribution to the study of food politics and critical agrarian studies, where food sovereignty has emerged as a pivotal concept over the past few decades, with a wide variety of social movements, on-the-ground experiments, and policy innovations flying under its broad banner.

Despite its large and growing popularity, the history, theoretical foundations, and political program of food sovereignty have only occasionally received in-depth analysis and critical scrutiny. This collection brings together both longstanding scholars in critical agrarian studies, such as Philip McMichael, Bina Agarwal, Henry Bernstein, Jan Douwe van der Ploeg, and Marc Edelman, as well as a dynamic roster of early- and mid-career researchers. The ultimate aim is to advance this important frontier of research and organizing, and put food sovereignty on stronger footing as a mobilizing frame, a policy objective, and a plan of action for the human future. This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies.

Critical Perspectives in Rural Development Studies - Saturnino M. Borrás Jr.

Agrarian transformations within and across countries

have been significantly and dynamically altered during the past few decades compared to previous eras, provoking a variety of reactions from rural poor communities worldwide. The recent convergence of various crises - financial, food, energy and environmental - has put the nexus between 'rural development' and 'development in general' back onto the center stage of theoretical, policy and political agendas in the world today. Confronting these issues will require (re)engaging with critical theories, taking politics seriously, and utilizing rigorous and appropriate research methodologies. These are the common messages and implications of the various contributions to this collection in the context of a scholarship that is critical in two senses: questioning prescriptions from mainstream perspectives and interrogating popular conventions in radical thinking. This book focuses on key perspectives, frameworks and methodologies in agrarian change and peasant studies.

The contributors are leading scholars in the field of rural development studies: Henry Bernstein, Terence J. Byres, Saturnino M. Borrás Jr, Marc Edelman, Cristóbal Kay, Benedict Kerkvliet, Philip McMichael, Shahra Razavi, Ian Scoones and Teodor Shanin. This book was previously published as a special issue of the *Journal of Peasant Studies*. [Feminist Food Studies](#) - Barbara Parker 2019-08-21 This expansive collection enriches the field of food studies with a feminist intersectional perspective, addressing the impacts that race, ethnicity, class, and nationality have on nutritional customs, habits, and perspectives. Throughout the text, international scholars explore three areas in feminist food studies: the socio-cultural, the corporeal, and the material. The textbook's chapters intersect as they examine how food is linked to hegemony, identity, and tradition, while contributors offer diverse perspectives that stem from biology, museum studies,

economics, popular culture, and history. This text's engaging writing style and timely subject-matter encourage student discussions and forward-looking analyses on the advancement of food studies. With a unique multidisciplinary and global perspective, this vital resource is well-suited to undergraduate students of food studies, nutrition, gender studies, sociology, and anthropology.

Critical Perspectives on Leadership - J. Lemmergaard
2013-01-01

'All too frequently leadership is depicted as an unequivocal "good". Lemmergaard and Muhr's excellent collection disabuses us of this misleading view, serving as a timely and salutary reminder that leadership is often emotionally charged, toxic, dysfunctional or downright stupid. This book's critical message should be read and heeded by students and practitioners of leadership alike.' Peter Case, James Cook University, Australia 'The book provides a rich kaleidoscope of critical engagements with

leadership in all its complexity and ambiguity. The contributors to this collection do not deny the vital role that leadership can play nor the many ways in which it can affect the emotional dynamics of organizations for good and bad. What they do is to shift thinking away from the comforting but misleading simplicities of toxic leaders and inert followers, offering a welcome tonic to the critical study of leadership. The book will appeal to leadership scholars as well as to students and to reflective practitioners.' Yiannis Gabriel, University of Bath, UK This book offers a critique of the field of leadership studies, focusing on the dynamics between post-heroic leadership and the notion of functional and dysfunctional emotions. Situated in the field of critical leadership studies, the chapters of this book set out to challenge the general assumption that emotionality is the antithesis of rationality. The authors expand upon the existing discussions of

leadership emotions and reveal how toxicity and dysfunctionality are not merely simple, negatively coercive, or repressive phenomena, but can also have productive and enabling connotations. The book includes comprehensive overviews of traditional leadership thinking and in addition provides readers with critical reflections on concepts such as ignorance, authenticity, functional stupidity and vanity in leadership. As the book presents a series of critical perspectives on how emotions can be theorized in leadership studies, it is suitable for advanced courses in the subject, as well as being a highly interesting monograph for academics in the field.

Rilke's Sonnets to Orpheus - Hannah Vandegrift Eldridge 2019

Written in three weeks of creative inspiration, Rainer Maria Rilke's *Sonnets to Orpheus* (1923) is well known for its enigmatic power and lyrical intensity. The essays in this volume forge a new path in

illuminating the philosophical significance of this late masterpiece. Contributions illustrate the unique character and importance of the *Sonnets*, their philosophical import, as well as their significant connections to the *Duino Elegies* (completed in the same period). The volume features eight essays by philosophers, literary critics, and Rilke scholars, which approach a number of the central themes and motifs of the *Sonnets* as well as the significance of their formal and technical qualities. An introductory essay (co-authored by the editors) situates the book in the context of philosophical poetics, the reception of Rilke as a philosophical poet, and the place of the *Sonnets* in Rilke's oeuvre. Above all, this volume's premise is that an interdisciplinary approach to poetry and, more specifically, to Rilke's *Sonnets*, can facilitate crucial insights with the potential to expand the horizons of philosophy and criticism. Essays elucidate the relevance of the *Sonnets* to

Beyond Cyberpunk - Graham J. Murphy 2010-06-10

This book is a collection of essays that considers the continuing cultural relevance of the cyberpunk genre into the new millennium. Cyberpunk is no longer an emergent phenomenon, but in our digital age of CGI-driven entertainment, the information economy, and globalized capital, we have never more been in need of a fiction capable of engaging with a world shaped by information technology. The essays in explore our cyberpunk realities to soberly reconsider Eighties-era cyberpunk while also mapping contemporary cyberpunk. The contributors seek to move beyond the narrow strictures of cyberpunk as defined in the Eighties and contribute to an ongoing discussion of how to negotiate exchanges among information technologies, global capitalism, and human social existence. The essays offer a variety of perspectives on cyberpunk's

School Food, Equity and Social Justice - Dorte Ruge
2022-02-27

School Food, Equity and Social Justice provides contemporary, critical examinations of policies and practices relating to food in schools across 25 countries from an equity and social justice perspective. The book is divided into three sections: Food politics and policies; Sustainability and development; and, Teaching and learning about food. Bringing together an interdisciplinary group of academics with practitioner backgrounds, the chapters in this collection broaden discussions on school food to consider its educational and

environmental implications, the ideals of food in schools, the emotional and ideological components of schooling food, and the relationships with home and everyday life. Our aim is to provide enhanced insight into matters of social justice in diverse contexts, and visions of how greater equality and equity may be achieved through school food policy and in school food programs. We expect this book to become essential reading for students, researchers and policy makers in health education, health promotion, educational practice and policy, public health, nutrition and social justice education.

Africa's Green Revolution -

William G. Moseley 2017-10-02

This volume examines the dominant neoliberal agenda for agricultural development and hunger alleviation in Africa.

The text reviews the history of African agricultural and food security policy in the post-colonial period, across a range of geographical contexts, in order to contextualise the productionist approach embedded in the much heralded New Green Revolution for Africa. This strategy, supported by a range of international agencies, promotes the use of hybrid seeds, fertilisers, and pesticides to boost crop production. This approach is underpinned by a new and unprecedented level of public-private partnerships as donors actively work to

promote the private sector and build links between African farmers, input suppliers, agro-dealers, agro-processors, and retailers. On the consumer end, increased supermarket penetration into poorer neighbourhoods is proffered as a solution to urban food insecurity. The chapters in this volume complicate understandings of this new approach and raise serious questions about its effectiveness as a strategy for increasing food production and alleviating poverty across the continent. This book is based on a special issue of African Geographical Review.

Mexican-Origin Foods, Foodways, and Social

Movements - Devon Peña

2017-09-01

Winner, 2018 ASFS

(Association for the Study of Food and Society) Book Award, Edited Volume This collection of new essays offers groundbreaking perspectives on the ways that food and foodways serve as an element of decolonization in Mexican-origin communities. The

writers here take us from multigenerational acequia farmers, who trace their ancestry to Indigenous families in place well before the Oñate Entrada of 1598, to tomorrow's transborder travelers who will be negotiating entry into the United States. Throughout, we witness the shifting mosaic of Mexican-origin foods and foodways in the fields, gardens, and kitchen tables from Chiapas to Alaska. Global food systems are also considered from a critical agroecological perspective, including the ways colonialism affects native biocultural diversity, ecosystem resilience, and equality across species, human groups, and generations. Mexican-Origin Foods, Foodways, and Social Movements is a major contribution to the understanding of the ways that Mexican-origin peoples have resisted and transformed food systems. It will animate scholarship on global food studies for years to come.

Screwball Television - David Scott Diffrient 2010-04-13
Bringing together seventeen

original essays by scholars from around the world, Screwball Television offers a variety of international perspectives on Gilmore Girls. Adored by fans and celebrated by critics for its sophisticated wordplay and compelling portrayal of a mother-daughter relationship, this contemporary American TV program finally gets its due as a cultural production unlike any other, one that is beholden to Hollywood's screwball comedies of the 1930s, steeped in intertextual references, and framed as a "kinder, gentler kind of cult television series" in this tightly focused yet wide-ranging collection. This volume makes a significant contribution to television studies, genre studies, and women's studies. Screwball Television seeks to bring Gilmore Girls more fully into academic discourse not only as a topic worthy of critical scrutiny but also as an infinitely rewarding text capable of stimulating the imagination of students beyond the classroom.
