Clear and Present Thinking - Brendan Myers 2013-05

The product of a Kickstarter fundraising campaign, "Clear and Present Thinking" is a college-level textbook in logic

and critical thinking. Chapters: 1. Questions, Problems, and World Views 2. Good and Bad Thinking Habits 3. Basics of Argumentation 4. Fallacies 5. Reasonable Doubt 6. Moral Reasoning In an effort to reduce the cost of education for students, this textbook was funded by over 700 people through the Kickstarter online crowd-funding platform. This softcover edition is available here for the lowest reasonable price. All profits from the sale of this print edition will go towards funding future free or nearly-free college textbook projects.

Critical Thinking, Thoughtful Writing - John Chaffee 2011-01
CRITICAL THINKING, THOUGHTFUL WRITING begins with the premise that thinking well involves using language well, and vice versa. This rhetoric with readings--written by critical-thinking scholar John Chaffee and English professors Christine McMahon and Barbara Stout--provides thorough coverage of the writing process, going

beyond the traditional rhetoric to teach students how to evaluate sources, images, and arguments. Each chapter focuses on a critical-thinking skill--such as problem solving or analysis of complex issues--that is explored through "Thinking-Writing Activities" and thematically linked readings. The text helps students develop these skills through carefully sequenced pedagogy and a cross-disciplinary approach that asks them to complete writing assignments and critically evaluate readings drawn from a variety of disciplines. The Fifth Edition offers new readings, a new "Thinking Critically About New Media" feature in each chapter, and more photos, which emphasize visual rhetoric.

A Workbook for Arguments - David R. Morrow 2019-11-18
David Morrow and Anthony Weston build on Weston's acclaimed A Rulebook for Arguments to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include:

Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the Rulebook's rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the Rulebook, that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises, including commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of Workbook

contains the entire text of the recent fifth edition of the Rulebook, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today's students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates—including five new sets of exercises—trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue. *Principles of Management* Openstax 2022-03-25 Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and

controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives- cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Critical Thinking - Alec Fisher 1997

In this book, Alec Fisher aims to teach directly an important range of thinking skills. The skills are fundamental critical

(and creative) thinking skills, and they are taught in a way which expressly aims to facilitate their transfer to other subjects and other contexts. The method is to use 'thinking maps' which help improve thinking by asking key questions of students when they are faced with different types of problems. Alec Fisher explains the language of reasoning, how to understand different kinds of arguments and how to ask the right question. Other topics include: different patterns of reasoning and standards which apply in different contexts, how to clarify and interpret ideas, how to judge the credibility of claims, and how to decide whether a person really justifies their conclusions, given their audience. Particular attention is given to understanding casual explanations and evaluating decisions. THE book includes many examples and exercises which give extensive practice in developing critico-creative thinking skills.

Grand River and Joy - Susan Messer 2010-01-14

"With unsparing candor, Susan Messer thrusts us into a time when racial tensions sundered friends and neighbors and turned families upside down. The confrontations in *Grand River and Joy* are complex, challenging, bitterly funny, and--painful though it is to acknowledge it--spot-on accurate." ---Rosellen Brown, author of *Before and After* and *Half a Heart* "*Grand River and Joy* is a rare novel of insight and inspiration. It's impossible not to like a book this well-written and meaningful---not to mention as historically

significant, humorous, and meditative." ---Laura Kasischke, author of *The Life Before Her Eyes* and *Be Mine* Halloween morning 1966, Harry Levine arrives at his wholesale shoe warehouse to find an ethnic slur soaped on the front window. As he scavenges around the sprawling warehouse basement, looking for the supplies he needs to clean the window, he makes more unsettling discoveries: a stash of Black Power literature; marijuana; a new phone line running off his own; and a makeshift living room, arranged by Alvin, the teenaged tenant who lives with his father, Curtis, above the warehouse. Accustomed to sloughing off fears about Detroit's troubled inner-city neighborhood, Harry dismisses the soaped window as a Halloween prank and gradually dismantles "Alvin's lounge" in a silent conversation with the teenaged tenant. Still, these events and discoveries draw him more deeply into the frustrations and fissures

permeating his city in the months leading up to the Detroit riots. Grand River and Joy, named after a landmark intersection in Detroit, follows Harry through the intersections of his life and the history of his city. It's a work of fiction set in a world that is anything but fictional, a novel about the intersections between races, classes and religions exploding in the long, hot summers of Detroit in the 1960s. Grand River and Joy is a powerful and moving exploration of one of the most difficult chapters of Michigan history. Susan Messer's fiction and nonfiction have appeared in numerous publications, including Glimmer Train Stories, North American Review, and Colorado Review. She received an Illinois Arts Council Fellowship in prose, an Illinois Arts Council literary award for creative nonfiction, and a prize in the Jewish Cultural Writing Competition of the Dora Teitelboim Center for Yiddish Culture. The Armed Forces Officer
Richard Moody Swain 2017
In 1950, when he commissioned the first edition of *The Armed Forces Officer*, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

Logically Fallacious - Bo Bennett 2012-02-19

This book is a crash course in effective reasoning, meant to catapult you into a world where you start to see things how they really are, not how you think they are. The focus of this book is on logical fallacies, which loosely defined, are simply errors in reasoning. With the reading of each page, you can make significant

improvements in the way you reason and make decisions. Logically Fallacious is one of the most comprehensive collections of logical fallacies with all original examples and easy to understand descriptions, perfect for educators, debaters, or anyone who wants to improve his or her reasoning skills. "Expose an irrational belief, keep a person rational for a day. Expose irrational thinking, keep a person rational for a lifetime." - Bo Bennett This 2021 Edition includes dozens of more logical fallacies with many updated examples. Argument - John Woods 2004 This text is designed for the Critical Thinking and Logic courses found in philosophy and general education departments at both universities and colleges. The most unique feature of the text is its solid foundation in logic. The discussion of fallacies is integrated with logic in a way not seen in other texts. This treatment provides students with tools to evaluate their own and other peoples thinking

logically as well as analyze and assess an argument.

Discovery of Life After Death” gives credible evidence of life after death. The goal of “We Don’t Die” is to have people believe that their deceased loved ones are still near them, help them navigate through the grieving process and educate that we are ‘eternal souls having a human experience. It is unique because it teaches people about the grieving process, keeping relationships whole, gives awe inspiring exercises that the reader experiences that we must be ‘more than our bodies.’ It gets readers in touch with the purpose of their lives and gets them on the path to producing results. Readers will no longer fear death, their pain of losing someone will be lessened, they will have hope, faith, and powerful access to live a successful life.

Thinking Critically - John Chaffee 1991

Thinking Critically, 8/e, teaches the fundamental thinking, reasoning, reading, and writing abilities that students need for academic success. The text begins with basic skills related

to personal experience and then carefully progresses to the more sophisticated reasoning skills required for abstract, academic contexts. Thinking Critically introduces students to the cognitive process while teaching them to develop their higher-order thinking and language abilities. A number of distinctive characteristics make the text an effective tool for both instructors and students. Exercises, discussion topics, and writing assignments encourage active participation, stimulating students to critically examine their own and others' thinking.

The Legal Environment of Business - Nancy K. Kubasek 2009

Along with Moore & Parker's engaging writing style and the wealth of topical exercises and examples that are relevant to students' lives, Connect Critical Thinking helps ensure that students can come to class confident and prepared. What other course provides students with skills they can apply so broadly to success in school and success in life?

Ghost Boys - Jewell Parker Rhodes 2018-04-17

A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what

they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

PHILOSOPHY - BROOKE N.; BRUDER MOORE (KENNETH.) 2017

Gender Trouble - Judith Butler 2011-09-22

Since its initial publication in 1990, this book has become a key work of contemporary feminist theory, and an essential work for anyone interested in the study of gender, queer theory, or the politics of sexuality in culture. This is the text where the author began to advance the ideas that would go on to take life as "performativity theory," as well as some of the first articulations of the possibility for subversive gender practices. Overall, this book offers a powerful critique of

heteronormativity and of the function of gender in the modern world.

Good and Cheap - Leanne Brown 2015-07-14

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown

gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

Artificial Intelligence - Jerry

Kaplan 2016

Over the coming decades, Artificial Intelligence will profoundly impact the way we live, work, wage war, play, seek a mate, educate our young, and care for our elderly. It is likely to greatly increase our aggregate wealth, but it will also upend our labor markets, reshuffle our social order, and strain our private and public institutions. Eventually it may alter how we see our place in the universe, as machines pursue goals independent of their creators and outperform us in domains previously believed to be the sole dominion of humans. Whether we regard them as conscious or unwitting, revere them as a new form of life or dismiss them as mere clever appliances, is beside the point. They are likely to play an increasingly critical and intimate role in many aspects of our lives. The emergence of systems capable of independent reasoning and action raises serious questions about just whose interests they are permitted to serve, and

Downloaded from
constructivworks.com on

what limits our society should place on their creation and use. Deep ethical questions that have bedeviled philosophers for ages will suddenly arrive on the steps of our courthouses. Can a machine be held accountable for its actions? Should intelligent systems enjoy independent rights and responsibilities, or are they simple property? Who should be held responsible when a self-driving car kills a pedestrian? Can your personal robot hold your place in line, or be compelled to testify against you? If it turns out to be possible to upload your mind into a machine, is that still you? The answers may surprise you.

Cross-Cultural Psychology -

Eric B. Shiraev 2016-08-12

Written in a conversational style that transforms complex ideas into accessible ones, this international best-seller provides an interdisciplinary review of the theories and research in cross-cultural psychology. The book's unique critical thinking framework, including Critical Thinking

boxes, helps to develop analytical skills. Exercises interspersed throughout promote active learning and encourage class discussion. Case in Point sections review controversial issues and opinions about behavior in different cultural contexts. Cross-Cultural Sensitivity boxes underscore the importance of empathy in communication. Numerous applications better prepare students for working in various multicultural contexts such as teaching, counseling, health care, and social work. The dynamic author team brings a diverse set of experiences in writing this book. Eric Shiraev was raised in the former Soviet Union and David Levy is from Southern California. Sensation, perception, consciousness, intelligence, human development, emotion, motivation, social perception, interaction, psychological disorders, and applied topics are explored from cross-cultural perspectives. Understanding Global Sexualities - Peter Aggleton
2012-07-26

Over the course of the past thirty years, there has been an explosion of work on sexuality, both conceptually and methodologically. From a relatively limited, specialist field, the study of sexuality has expanded across a wide range of social sciences. Yet as the field has grown, it has become apparent that a number of leading edge critical issues remain. This theory-building book explores some of the areas in which there is major and continuing debate, for example, about the relationship between sexuality and gender; about the nature and status of heterosexuality; about hetero- and homo-normativity; about the influence and intersection of class, race, age and other

factors in sexual trajectories, identities and lifestyles; and about how best to understand the new forms of sexuality that are emerging in both rich world and developing world contexts. With contributions from leading and new scholars and activists from across the globe, this book highlights tensions or 'flash-points' in contemporary debate, and offers some innovative ways forward in terms of thinking about sexuality - both theoretically and with respect to policy and programme development. An extended essay by Henrietta Moore introduces the volume, and an afterword by Jeffrey Weeks offers pointers for the future. The contributors bring together a range of experiences and a variety of disciplinary perspectives in engaging with three key themes of sexual subjectivity and global transformations, sexualities in practice, and advancing new thinking on sexuality in policy and programmatic contexts. It is of interest to students,

researchers and activists in sexuality, sexual health and gender studies, especially those working from public health, sociological and anthropological perspectives. *Bastogne - The Story Of The First Eight Days*. L. A. Marshall 2014-06-13 [This edition benefits from numerous maps of the battlefields that the actions were fought over] "NUTS!" - Among the many military legends that abound from the fighting of the Second World War, the one word reply to a German summons to surrender must rank highly in terms of its resonance, importance and sheer grit. General McAuliffe decided that despite the odds and the lack of supplies and ammunition his troops would continue to hold the important communication hub of Bastogne during the Battle of

the Bulge. This dramatic, yet authoritative account brings all of the action to the fore as the Battered Bastards of Bastogne wrote their names into legend. "THIS STORY OF BASTOGNE was written from interviews with nearly all the commanders and staff officers and many of the men who participated in the defense of Bastogne during the first phase of that now celebrated operation—the days during which the American forces were surrounded by forces of the enemy... Thus it is essentially the account of how a single strong defensive force was built from separate commands of armor, airborne infantry and tank destroyers—a force convinced that it could not be beaten."-Introduction. [Reading Stephen King](#) - Brenda Miller Power 1997 Discusses using King's works in the classroom
