Incorporates sample scenarios to illustrate concepts and allow the reader to apply them. Integrates discussion questions and exercises designed to facilitate thoughtful application and critical thinking skills. Addresses all aspects of learning, including "cognitive" (e.g., critical thinking), "affective" (e.g., caring), and "psychomotor" (e.g., technical skills). Provides actual examples of tools to be used for documenting student performance and approaches for stimulating student involvement and critical thinking. Includes a separate chapter on Clinical Faculty as Clinical Coach that discusses how learning is facilitated in the clinical setting with the guidance of an effective teacher. Features a Clinical Toolbox that contains a variety of supplemental resources,

including sample approaches for teaching and evaluation, suggestions for preparing anecdotal notes, and relevant reference material.

Incorporates issues related to computer access of patient data banks for students, and the federal regulations mandated by HIPAA and their clinical education implications.

Critical Thinking Skills for Healthcare - Stephanie McKendry 2015-07-15

Thinking critically is an essential skill, both for students and for the modern, evidence-based, healthcare practitioner. You need to be able to find, understand and evaluate the evidence that underpins your assignments, clinical decision making and practice. The good news is that you use all of these skills in everyday life. You don't believe every advert you see or respond to every spam email. It's just a question of taking these critical skills and having the confidence to apply them to your academic work. This book will help you do just that. It will enable you to: - recognise your existing ability to be a critical thinker - spot logical flaws and inconsistencies in arguments - consider health issues from multiple perspectives, weighing up the strengths and weaknesses of a case - build a convincing argument in assessments - develop a range of critical skills for successful study and healthcare practice. Critical Thinking Skills for Healthcare is an essential resource for all health professionals in training.
