Biological Anthropology Craig Britton Stanford 2013

This textbook presents a survey of physical anthropology, the branch of anthropology that studies the physical development of the human species. It plays an important part in the study of human origins and in the analysis and identification of human remains for legal purposes. It draws upon human body

measurements, human genetics, and the study of human bones and includes the study of human brain evolution, and of culture as neurological adaptation to environment. The authors use the progressive term "biological anthropology" to mean "an integrative combination of information from the fossil record and the human skeleton, genetics of individuals and of populations, our primate relatives, human adaptation, and human

behavior."

Indians in Eden Bunny McBride 2010-04-01

When the Wabanaki were moved to reservations, they proved their resourcefulness by catering to the burgeoning tourist market during the 19th and early 20th centuries, when Bar Harbor was called Eden. This engaging, richly illustrated, and meticulously researched book chronicles the intersecting lives of the Wabanaki and wealthy summer rusticators on Mount Desert Island.

While the rich built sumptuous summer homes, the Wabanaki sold them Native crafts, offered guide services, and produced Indian shows.

God in Chinatown Kenneth J. Guest 2003-08

An insightful look into the central role of religious community in the largest contemporary

wave of new immigrants to New York Chinatown yet *God in Chinatown* is a path breaking study of the largest contemporary wave of new immigrants to Chinatown. Since the 1980s, tens of thousands of mostly rural Chinese have migrated from Fuzhou, on China's southeastern coast, to New York's Chinatown. Like the Cantonese who comprised the previous wave of migrants, the Fuzhou have brought with them their religious beliefs, practices, and local deities. In recent years these immigrants have established numerous specifically Fuzhounese religious communities, ranging from Buddhist, Daoist, and Chinese popular religion to Protestant and Catholic Christianity. This ethnographic study examines the central role of these religious communities in the immigrant incorporation process in Chinatown's highly stratified ethnic enclave, as well as the transnational networks established between religious communities in New York and China. The author's knowledge of Chinese coupled with

his extensive fieldwork in both China and New York enable him to illuminate how these networks transmit religious and social dynamics to the United States, as well as how these new American institutions influence religious and social relations in the religious revival sweeping southeastern China. *God in Chinatown* is the first study to bring to light religion's significant role in the Fuzhounese immigrants' dramatic transformation of the face of New York's Chinatown.

Canoe Indians of Down East Maine - William A. Haviland 2020-04-06

The story of those who inhabited coastal Maine thousands of years before the French arrived, and how their lives changed at the dawn of the seventeenth century. In 1604, when Frenchmen landed on Saint Croix Island, they were far from the first people to walk along its shores. For thousands of years, Etchemins—whose descendants were members of the Wabanaki Confederacy—had lived, loved and labored in

Down East Maine. Bound together with neighboring people, all of whom relied heavily on canoes for transportation, trade, and survival, each group still maintained its own unique cultures and customs. After the French arrived, though, these indigenous people faced unspeakable hardships, from “the Great Dying,” when disease killed up to ninety percent of coastal populations, to centuries of discrimination. Yet they never abandoned Ketakamigwa, their homeland. In this book, anthropologist William Haviland relates the challenging history endured by the natives of the Down East coast and how they have maintained their way of life over the past four hundred years. Includes illustrations

The Essence of Anthropology - William A. Haviland 2015-02-04

THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors

present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to

each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Cultural Anthropology: The Human

Challenge - William A. Haviland 2010-03-05

Offering compelling photos, engaging examples, and select studies by anthropologists in a variety of locations around the globe, this streamlined, market-leading text presents cultural anthropology in vivid, accessible terms showing students how the field is relevant to understanding the complex world around them. The authors present the fundamental concepts from a holistic perspective using three unifying themes to frame the text: 1) the varied ways humans face the challenges of existence, 2) the connections between culture and biology in shaping human beliefs and behavior, and 3) the impact of globalization on peoples and cultures

around the world. They also integrate coverage of race, class, gender, and ethnicity throughout the text, and in this edition, they have expanded the popular Globalscape feature to get students thinking about the consequences of globalization and (sometimes) their own behavior.

Furthermore, the text's strong supplements program provides instructors and students with a wealth of resources designed to enhance the teaching and learning experience. The Meaning of Myth in World Cultures

Michael Buonanno 2018-12-06

Mythology—circulated in sacred stories (myths)

and their reenactments (rituals)—is the basis of any society's religion, and religion is an essential key to identity. Mythology's meaning depends on the elaboration of identity in cultural metaphors that are at the same time ecological (arising from a society's environmental exploitation), sociological (based on indigenous social relations) and ideological (couched in terms of a society's worldview). But tellingly, these metaphors are embodied in anthropomorphic spirits, fostering a deep sense of identification with those spirits as well as with individuals who share in one's spiritual devotions. This study examines mythology from a global perspective, citing case studies in cultural traditions from Africa, Europe, Oceania, Native America and elsewhere.

Cross-Cultural Analysis Michael Minkov 2013
The first comprehensive and statistically significant analysis of the predictive powers of each cross-cultural model, based on nation-level variables from a range of large-scale database

sources such as the World Values Survey, the Pew Research Center, the World Bank, the World Health Organization, the UN Statistics Division, UNDP, the UN Office on Drugs and Crime, TIMSS, OECD PISA. Tables with scores for all culture-level dimensions in all major cross-cultural analyses (involving 20 countries or more) that have been published so far in academic journals or books. The book will be an invaluable resource to masters and PhD students taking advanced courses in cross-cultural research and analysis in Management, Psychology, Sociology, Anthropology, and related programs. It will also be a must-have reference for academics studying cross-cultural dimensions and differences across the social and behavioral sciences.

The Essence of Anthropology - William Haviland 2012-01-09

Filled with current examples, THE ESSENCE OF ANTHROPOLOGY brings to life anthropology's key concepts and their great relevance to

today's complex world. You'll learn about the varied ways culture helps humans adapt to face the challenges of existence, the connection between human culture and human biology, and the impact of globalization on peoples and cultures around the world. Furthermore, the book is packed with learning tools that demonstrate major concepts, offer interesting examples of anthropology's relevance to daily life, and guide your study to help you retain what you read. The Cambridge Handbook of Linguistic Anthropology - N. J. Enfield 2014-09-11

The field of linguistic anthropology looks at human uniqueness and diversity through the lens of language, our species' special combination of art and instinct. Human language both shapes, and is shaped by, our minds, societies, and cultural worlds. This state-of-the-

field survey covers a wide range of topics, approaches and theories, such as the nature and function of language systems, the relationship between language and social interaction, and the place of language in the social life of communities. Promoting a broad vision of the subject, spanning a range of disciplines from linguistics to biology, from psychology to sociology and philosophy, this authoritative handbook is an essential reference guide for students and researchers working on language and culture across the social sciences.

Cultural Anthropology - Kenneth J. Guest
2013-11-20

Covering the essential concepts that drive cultural anthropology today, Ken Guest's Cultural Anthropology: A Toolkit for a Global Age shows students that now, more than ever, global forces affect local culture and that the tools of cultural anthropology are essential to living in a global society. A "toolkit" approach encourages students to pay attention to big questions raised by anthropologists, offers study tools to remind readers what concepts are important, and shows them why it all matters in the real world.

Anthropology - Carol R. Ember 2006-04
[In this book, the authors] are interested not only in what humans are and were like; [but they are] also interested in why they got to be that way, in all their variety. When there are alternative explanations, [the authors] try to communicate the necessity to evaluate them logically as well as on the basis of the available

evidence. Throughout the book, [they] try to communicate that no idea, including ideas put forward in textbooks, should be accepted even tentatively without supporting tests that could have gone the other way. -Pref.

Human Evolution and Prehistory - William A. Haviland 2002-08

This is a brief text that offers a straightforward, balance presentation on views of human evolution, adaptation, and prehistory. It focuses on selected aspects of physical anthropology and prehistoric archaeology as they relate to the origin of humanity, the origin of culture, and the development of human biological and cultural diversity. Haviland's commitment to challenging student ethnocentrism is continued and reinforced in this new edition.

Watsuji Tetsurô's Global Ethics of

Emptiness - Anton Luis Sevilla 2017-08-31

This book is a rethinking of ethics and socio-political life through the ideas of Watsuji Tetsurô. Can we build a systematic philosophy of morality, society, and politics, not on the basis of identity and ego, but rather on the basis of selflessness? This book explores such an attempt by the leading ethicist of modern Japan. Using concrete examples and contemporary comparisons, and with careful reference to both English and Japanese sources, it guides the reader through Watsuji's ideas. It engages three contemporary issues in depth: First, how do we approach the moral agent, as an autonomous being or as a fundamentally relational being? Second, is it the individual or the community that is the starting point for politics? And finally, is ethics something that is globally shared or something fundamentally local? This book aims to be an informative and inspiring resource for researchers, students, and laypersons interested

in Buddhist thought.

Introducing Anthropology - Michael Alan Park
2005-06

Because of the increasing breadth and complexity of the field, most texts for introductory-level, general anthropology courses (so-called four-field courses) have tended to become longer and more detailed. In contrast, this concise book, authored by a physical anthropologist, offers a tightly managed amount of detail and a student-friendly narrative approach (explaining its topics through a clear sequence of ideas), while including all of the traditional topics in anthropology.

What Anthropologists Do - Veronica Strang
2020-06-24

What is Anthropology? Why should you study it? What will you learn? And what can you do with it? What Anthropologists Do answers all these questions. And more. Anthropology is an astonishingly diverse and engaged subject that seeks to understand human social behaviour. What Anthropologists Do presents a lively introduction to the ways in which anthropology's unique research methods and cutting-edge thinking contribute to a very wide range of fields: environmental issues, aid and development, advocacy, human rights, social policy, the creative arts, museums, health, education, crime, communications technology, design, marketing, and business. In short, a training in Anthropology provides highly transferable skills of investigation and analysis. The book will be ideal for any readers who want to know what Anthropology is all about and especially for students coming to the

study of Anthropology for the first time.

Decolonizing Anthropology - Faye Venetia Harrison 1997

Decolonizing Anthropology is part of a broader effort that aims to advance the critical reconstruction of the discipline devoted to understanding humankind in all its diversity and commonality. The utility and power of a decolonized anthropology must continue to be tested and developed. May the results of ethnographic probes--the data, the social and cultural analysis, the theorizing, and the strategies for knowledge application--help scholars envision clearer paths to increased understanding, a heightened sense of intercultural and international solidarity, and last, but certainly not least, world transformation.

Communication Between Cultures - Larry A. Samovar 2016-01-01

Packed with current research and examples, bestselling COMMUNICATION BETWEEN

CULTURES, 9E equips readers with a deep understanding and appreciation of different cultures while helping them develop practical communication skills. Part I introduces the study of communication and culture; Part II focuses on the ability of culture to shape and modify our view of reality; Part III puts the theory of intercultural communication into practice; and Part IV converts knowledge into action. This is the only text to consistently emphasize religion and history as key variables in intercultural communication. Compelling examples help readers examine their own assumptions, perceptions, and cultural biases--so they can understand the subtle and profound ways culture affects communication. The ninth edition offers expanded discussions of the impact of globalization, a new chapter on intercultural communication competence, and more coverage of new technology. Dancing Skeletons Katherine A. Dettwyler
2013-09-26

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, *Dancing Skeletons* presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population

control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest. *An Anthropology of Anthropology* - Robert

Borofsky 2019-03-21

The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

Theological Negotiation Douglas Farrow

2018-11-06

One of today's leading theologians tackles some of the most significant themes in contemporary theology. Douglas Farrow explores key theological loci such as nature and grace and justification and sanctification; introduces theological giants such as Anselm, Aquinas, Luther, and Barth; and examines contemporary questions about sacraments and unity. Throughout his explorations, Farrow invites readers to consider how to negotiate controversy in Christian theology, especially between Catholics and Protestants, arguing that theology

does its best work at the intersection of topics in dispute.

Indians and Anthropologists - Thomas Biolsi
1997-02-01

In 1969 Vine Deloria, Jr., in his controversial book *Custer Died for Your Sins*, criticized the anthropological community for its impersonal dissection of living Native American cultures. Twenty-five years later, anthropologists have become more sensitive to Native American concerns, and Indian people have become more active in fighting for accurate representations of their cultures. In this collection of essays, Indian and non-Indian scholars examine how the relationship between anthropology and Indians has changed over that quarter-century and show how controversial this issue remains. Practitioners of cultural anthropology, archaeology, education, and history provide multiple lenses through which to view how Deloria's message has been interpreted or misinterpreted. Among the contributions are

comments on Deloria's criticisms, thoughts on the reburial issue, and views on the ethnographic study of specific peoples. A final contribution by Deloria himself puts the issue of anthropologist/Indian interaction in the context of the century's end. The Discipline of Organizing: Professional Edition - Robert J. Glushko 2014-08-25

Note about this ebook: This ebook exploits many advanced capabilities with images, hypertext, and interactivity and is optimized for EPUB3-compliant book readers, especially Apple's iBooks and browser plugins. These features may not work on all ebook readers. We organize

things. We organize information, information about things, and information about information. Organizing is a fundamental issue in many professional fields, but these fields have only limited agreement in how they approach problems of organizing and in what they seek as their solutions. The Discipline of Organizing synthesizes insights from library science, information science, computer science, cognitive science, systems analysis, business, and other disciplines to create an Organizing System for understanding organizing. This framework is robust and forward-looking, enabling effective sharing of insights and design patterns between disciplines that weren't possible before. The Professional Edition includes new and revised content about the active resources of the "Internet of Things," and how the field of Information Architecture can be viewed as a subset of the discipline of organizing. You'll find: 600 tagged endnotes that connect to one or more of the contributing disciplines Nearly 60

new pictures and illustrations Links to cross-references and external citations Interactive study guides to test on key points The Professional Edition is ideal for practitioners and as a primary or supplemental text for graduate courses on information organization, content and knowledge management, and digital collections.
