Guidelines for Cardiac Rehabilitation Programs - AACVPR 2020-03-04

Guidelines for Cardiac Rehabilitation Programs, Sixth Edition With Web Resource, presents the combined expertise of more than 50 leaders in the field of cardiac

rehabilitation (CR), reimbursement, and public policy to empower professionals to successfully implement new CR programs or improve existing ones. Developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR), this guidebook offers procedures for providing patients with low-cost, high-quality programming that

moves them toward a lifelong commitment to disease management and secondary prevention. Cardiovascular disease (CVD) is the principal cause of death worldwide. It is projected that by 2035, more than 130 million adults in the United States will have CVD. The challenge to CR professionals is to select, develop, and deliver appropriate rehabilitative and secondary prevention services to each patient tailored to their individual needs. Guidelines for Cardiac Rehabilitation Programs, Sixth Edition, is the definitive resource for developing inpatient and outpatient cardiac rehabilitation programs. The sixth edition of Guidelines for Cardiac Rehabilitation Programs equips professionals with current scientific and evidence-based models for designing and updating rehabilitation programs. Pedagogical aides such as chapter objectives, bottom line sections, summaries, and sidebars present technical information in an easy-to-follow

format. Key features of the sixth edition include the following: A new chapter on physical activity and exercise that helps readers understand how to develop and implement exercise programs to CVD patients A new chapter on cardiac disease populations that offers readers a deeper understanding of CVD populations, including those with heart valve replacement or repair surgery, left ventricular assist devices, heart transplant, dysrhythmias, and/or peripheral artery disease Case studies and discussion questions that challenge readers to consider how concepts from the text apply to real-life scenarios An expanded web resource that includes ready-to-use forms, charts, checklists, and logs that are practical for daily use, as well as additional case studies and review questions Keeping up with change is a professional necessity and keeping up with the science is a professional responsibility. Guidelines for Cardiac Rehabilitation Programs, Sixth

Edition, covers the entire scope of practice for CR programs and professionals, providing evidence-based information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of CVD on quality of life, morbidity, and mortality. Note: The web resource is included with all new print books and some ebooks. For ebook formats that don't provide access, the web resource is available separately.

Lif estyl e Mdi fication to Control H eart Di seas Donald Shepard 2010
Lifestyle Modification to

Control Heart Disease: Evidence and Policy is a review and critical examination of the scientific literature on cardiovascular lifestyle modification. This book provides systematic critiques of prior published research in order to clarify some of the debate around addressing coronary heart disease through lifestyle modification. It fills gaps in current published systematic reviews, particularly with respect to the cost-effectiveness of lifestyle modification; gender, racial and ethnic disparities in treatment of coronary heart disease; and multifactorial programs. It also explores existing research on disparities in coronary artery disease treatment and utilization and suggests potential solutions to address barriers at the system, provider and patient level. By summarizing research findings in a reader-friendly format, it assists health care practitioners in working with patients more effectively, improves students' background knowledge to enhance

preparation for clinical work, and sets a context for future researchers who want to continue to address key questions this area.
