Illuminating How Identities, Stereotypes and Inequalities Matter through Gender Studies - D. Nicole Farris 2014-04-30

This collection highlights and extends contemporary women's and gender studies by presenting theoretical analyses and innovative research conceptualizations, applications and methodologies via a diverse variety of popular-in-the-classroom topics, such as changing masculinities; comedic/dramatic portrayals of ethnicity and discrimination; stigma and differences within mainstream media gender stereotypes; intersections of gendered and sexual identities in social media and fundamental institutions. These topics emphasize relevant issues and nuances within popular culture, identities and perceptions and social problems and illustrate the breadth of gender studies and its applications, while the diverse methodologies like historical comparisons; ethnographic, demographic and statistical analyses, demonstrate its epistemology. Each chapter remains solidly founded in gender theory while making significant innovative contributions to the overall field.

Harry E. Burke and John M. Miller, Pioneers in Western Forest

Entomology - Boyd E. Wickman 2005

This history was compiled from the memoirs, diaries, and other personal documents of the two forest entomologists in charge of the first forest insect laboratories on the west coast. It traces the lives of the two pioneers from 1902 to 1952 as they pursued their careers in the USDA Bureau of Entomology, Division of Forest Insect Investigations. Cooperative bark beetle control projects with the USDA Forest Service, Park Service, and private timber owners guided much of their early activities. Later, when the laboratories were located on university campuses, cooperative research was undertaken with Forest Service Research Stations. The focus shifted to more basic research and, particularly, studies on the silvicultural management of bark beetle populations.

The Phonology of the Dialect of Aurland, Norway - George Tobias Flom 1915

Mercedes-Benz SL and SLC 107-Series 1971-1989 - Andrew Noakes

2017-11-20

As one of the most remarkable models that Mercedes-Benz has ever created, the 107-series was a sales success for nearly two decades and has been an automotive icon for far longer. Elegant styling, effortless performance and superior build quality are central to the appeal of the Mercedes-Benz R107 SL and C107 SL models. This book details the complete history of the model from its design in the late 1960s, its launch in 1971, its development through the 1970s and 1980s to the end of production in 1989. Accompanied by over 250 archive pictures and original images, Mercedes-Benz SL and SLC 107-Series 1971-1989 - The Complete Story reveals the story behind the racing SLs and the works rally SLCs, and provides a valuable guide to buying and running these cars. Superbly illustrated with 260 archive and original colour and black & white photographs.

Cultural Politics and Education - Michael W. Apple 1996-06-15

Michael Apple offers a powerful analysis of current debates and a compelling indictment of rightist proposals for change. Apple presents the causes and effects of further integrating schools into the corporate agenda, as well as current calls for a national curriculum and national testing, privatization and voucher plans, and fundamentalist religious pressures to censor textbooks. He demonstrates who will be the winners and losers culturally and economically as the conservative restoration gains in strength, bringing with it an even greater re-stratification of knowledge and students in terms of race, class, and gender.

Who Were The Babylonians? - Bill T. Arnold 2005

Who was Hammurapi, and what role did his famous "law code" serve in ancient Babylonian society? Who was the mysterious Merodach-baladan, and why did the appearance of his emissaries in Jerusalem so upset Isaiah? Who was Nebuchadnezzar II, and why did he tear down the Solomonic temple and drag the people of God into exile? In short, who were the Babylonians? This engaging and informative introduction to the best of current scholarship on the Babylonians and their role in biblical history answers these and other significant questions. The Babylonians were important not only because of their many historical contacts with

ancient Israel but because they and their predecessors, the Sumerians, established the philosophical and social infrastructure for most of Western Asia for nearly two millennia. Beginning and advanced students as well as biblical scholars and interested nonspecialists will read this introduction to the history and culture of the Babylonians with interest and profit. Paperback edition available from the Society of Biblical Literature (www.sbl-site.org).

Classification of Developmental Language Disorders - Ludo Verhoeven 2003-09-12

Chapters written by leading authorities offer current perspectives on the origins and development of language disorders. They address the question: How can the child's linguistic environment be restructured so that children at risk can develop important adaptive skills in the domains of self-care, social interaction, and problem solving? This theory-based, but practical book emphasizes the importance of accurate definitions of subtypes for assessment and intervention. It will be of interest to students, researchers, and practitioners in the field of developmental language disorders.

Beat Memories - Sarah Greenough 2010

The celebrated American poet Allen Ginsberg (1926-1997) began photographing in the late 1940s when he purchased a small, second-hand Kodak camera. For the next fifteen years he made intimate and often exuberant portraits of himself, his friends, and lovers, including the writers and poets Jack Kerouac, William Burroughs, and Gregory Corso as well as Beat personality Neal Cassady. He abandoned photography in 1963 and took it up again in the 1980s, when he was encouraged by photographers Berenice Abbott and Robert Frank to reprint his earlier work and make new portraits; these included more images of long-time friends as well as other acquaintances such as painters Larry Rivers and Francesco Clemente and musician Bob Dylan. Ginsberg's photographs form a compelling portrait of the Beat and counterculture generation from the 1950s to the 1990s, tracing their arch from youthful men to aging, often spent, figures. Far more historical documents, his photographs and the extensive inscriptions he added to them years later preserve what he referred to as "the sacredness of the moment", the often joyous communion of friends and the poignancy of looking back to intensely felt times. More than seventy prints, including a few "drugstore" prints made in the early 1950s, are brilliantly reproduced in this book, accompanied by Sarah Greenough's essay on Ginsberg's photography in relation to his poetry and other photographers of the time, a chronology of his photographic activity, and selections from interviews with Ginsberg between 1958 and 1996. AUTHOR: Sarah Greenough is senior curator and head of the department of photographs at the National Gallery of Art. She is the author of *Looking In: Robert Frank's: 'The Americans'* and numerous other publications on photography. SELLING POINTS: * Now available in paperback, this intimate "family album" is a revealing photographic look at the Beat Generation as chronicled by the movement's great poet, Allen Ginsberg. 70 tritones, 30 duotones, 5 colour images

Developing Students' Statistical Reasoning - Joan Garfield 2008-09-08
Increased attention is being paid to the need for statistically educated citizens: statistics is now included in the K-12 mathematics curriculum, increasing numbers of students are taking courses in high school, and introductory statistics courses are required in college. However, increasing the amount of instruction is not sufficient to prepare statistically literate citizens. A major change is needed in how statistics is taught. To bring about this change, three dimensions of teacher knowledge need to be addressed: their knowledge of statistical content, their pedagogical knowledge, and their statistical-pedagogical knowledge, i.e., their specific knowledge about how to teach statistics. This book is written for mathematics and statistics educators and researchers. It summarizes the research and highlights the important concepts for teachers to emphasize, and shows the interrelationships among concepts. It makes specific suggestions regarding how to build classroom activities, integrate technological tools, and assess students' learning. This is a unique book. While providing a wealth of examples through lessons and data sets, it is also the best attempt by members of our profession to integrate suggestions from research findings with statistics concepts and pedagogy. The book's message about the importance of listening to research is loud and clear, as is its message about alternative ways of teaching statistics. This book will impact instructors, giving them pause to consider: "Is what I'm doing now really the best thing for my students? What could I do better?" J. Michael Shaughnessy, Professor, Dept of Mathematical Sciences, Portland State University, USA This is a much-needed text for linking research and practice in teaching statistics. The authors have provided a comprehensive overview of the current state-of-the-art in statistics education research. The insights they have gleaned from the literature should be tremendously helpful for those involved in teaching and researching introductory courses. Randall E. Groth, Assistant Professor of Mathematics Education, Salisbury University, USA
