Management? It's Not What You Think! Henry Mintzberg 2010

Alot of things have been said about management over the years: that it's an art, not a science; that it's a science, filled with "best practices" and systematic steps anyone can use to get great results; that it's the fuel that powers successful organizations. Only one thing is for sure: there is no one, easy definition of whatever it is that managers do! Henry Mintzberg, one of today's most respected and controversial thinkers on management, has joined forces with other leading business figures to provide a provocative and unusual mix of writing on management. *Management? It's Not What You Think!* gets readers thinking as they never have before about the practice of management. Readers will find differing perspectives and plenty of food for thought--on topics including management terminology and buzz words; myths and maxims; MBAs; management fads; leadership; strategy; and much more. Presenting articles, book and journal excerpts, letters, web selections, and musings, these pieces will have readers pondering, laughing, and sometimes even crying (for poor old management itself!). This irreverent, highly relevant, and insightful book will inspire managers of all types, spark debate, and renew their passion and interest in doing what they do best... managing.

Managing - Henry Mintzberg 2009-09

A half century ago Peter Drucker put management on the map. Leadership has since pushed it off. Henry Mintzberg aims to restore management to its proper place: front and center. "We should be seeing managers as leaders." Mintzberg writes, "and leadership as management practiced well." This landmark book draws on Mintzberg's observations of twenty-nine managers, in business, government, health care, and the social sector, working in settings ranging from a refugee camp to a symphony orchestra. What he saw—the pressures, the action, the nuances, the blending—compelled him to describe managing as a practice, not a science or a profession, learned primarily through experience and rooted in context. But context cannot be seen in the usual way. Factors such as national culture and level in hierarchy, even personal style, turn out to have less influence than we have traditionally thought. Mintzberg looks at how to deal with some of the inescapable conundrums of managing, such as, How can you get in deep when there is so much pressure to get things done? How can you manage it when you can't reliably measure it? This book is vintage Mintzberg: iconoclastic, irreverent, carefully researched, myth-breaking. Managing may be the most revealing book yet written about what managers do, how they do it, and how they can do it better.

Managerial Behavior, Performance and Effectiveness - 1972

Rebalancing Society Henry Mintzberg 2015-01-05

Enough of the imbalance that is causing the degradation of our environment, the demise of our democracies, and the denigration of ourselves. Enough of the pendulum politics of left and right and paralysis in the political center. We require an unprecedented form of radical renewal. In this book Henry Mintzberg offers a new understanding of the root of our current crisis and a strategy for restoring the balance so vital to the survival of our progeny and our planet. With the collapse of the communist regimes of Eastern Europe, Western pundits declared that capitalism had triumphed. They were wrong—balance triumphed. A healthy society balances a public sector of respected governments, a private sector of responsible businesses, and a plural sector of robust communities. Communism collapsed under the weight of its overbearing public sector. Now the “liberal democracies” are threatened—socially, politically, even economically—by the unchecked excesses of the private sector. Radical renewal will have to begin in the plural sector, which alone has the inclination and the independence to challenge unacceptable practices and develop better ones. Too many governments have been co-opted by the private sector. And corporate social responsibility can't compensate for the corporate social irresponsibility we see around us “They” won't do it. We shall have to do it, each of us and all of us, not as passive “human resources,” but as resourceful human beings. Tom Paine wrote in 1776, “We have it in our power to begin the world over again.” He was right then. Can we be right again now? Can we afford not to be?

Growth-Oriented Entrepreneurship - Alan S. Gutterman 2018-08-30

This book provides an extensive introduction to research on growth-oriented entrepreneurship, and a number of different methods have been used to describe growth-oriented entrepreneurship; however, there is a consensus that there is a particularly desirable form of entrepreneurship that seeks to create and scale up businesses that will drive productivity growth, create new employment, increase innovation, promote business internationalization and achieve sustainable economic growth. Innovation is a condition of growth-oriented entrepreneurship that includes both the development and commercialization of new products and services and the development and implementation of new or improved processes that enhance productivity or reduce costs associated with manufacturing or distributing existing products. Innovation involves firms pursuing distinctive business strategies and doing new things in new ways to increase productivity, product development, sales and profitability, including finding and developing new ways of identifying the needs of new and existing customers and making and marketing products that satisfy those needs. The goal of the launch phase for growth-oriented entrepreneurial ventures is to reach the point of scale up and common goals and activities associated with the launch phase include market disruption and penetration; gaining access to capital and markets and mentorship opportunities; organizational growth through management capacity, systems, resources (i.e., people, product and assets) management; embedding organizational culture; development of stakeholder relationships; monitoring and evaluation; and governance and reporting. This book provides an extensive introduction to research on growth-oriented entrepreneurship and continues with an assessment of attempts to create the appropriate framework conditions for growth-oriented entrepreneurship to flourish and sustain including financial support; government policies; government programs; education and training; research and development transfer; commercial and professional infrastructure; internal market openness; access to physical infrastructure; cultural and social norms; and protection of intellectual property rights. The final chapter looks at growth-oriented

entrepreneurs in practice as they work to launch and grow emerging companies. This book is a unique compendium of research and analysis on a dynamic and important segment of entrepreneurship and will be useful to entrepreneurs, academics and policymakers.

Managers Not MBAs - Henry Mintzberg 2005-06-02

In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management.

Bedtime Stories for Managers - Henry Mintzberg 2019-02-05

If you're like most managers and things keep you up at night, now you can turn to a book that's designed especially for you! But you won't find talking rabbits or princesses here. (There is a cow, but it doesn't jump.) Henry Mintzberg has culled forty-two of the best posts from his widely read blog and turned them into a deceptively light, sneakily serious compendium of sometimes heretical reflections on management. The moral here is this: managers need to leave their castles and find out what's actually going on in their kingdoms. And like real bedtime stories, these essays have metaphors galore. So prepare to grow strategies

like weeds and organize like a cow. Discover the maestro myth of managing, find the soft underbelly of hard data, and learn why downsizing is bloodletting and your board should be a bee. Mintzberg writes, "Just try not to be outraged by anything you read, because some of my most outrageous ideas turn out to be my best. They just take a while to become obvious."

Frank and Lillian Gilbreth - Michael C. Wood 2003

The Bass Handbook of Leadership - Bernard M. Bass 2009-12-01

For thirty-three years and through three editions, Bass & Stogdill's Handbook of Leadership has been the indispensable bible for every serious student of leadership. Since the third edition came out in 1990, the field of leadership has expanded by an order of magnitude. This completely revised and updated fourth edition reflects the growth and changes in the study of leadership over the past seventeen years, with new chapters on transformational leadership, ethics, presidential leadership, and executive leadership. Throughout the Handbook, the contributions from cognitive social psychology and the social, political, communications, and administrative sciences have been expanded. As in the third edition, Bernard Bass begins with a consideration of the definitions and concepts used, and a brief review of some of the better-known theories. Professor Bass then focuses on the personal traits, tendencies, attributes, and values of leaders and the knowledge, intellectual competence, and technical skills required for leadership. Next he looks at leaders' socioemotional talents and interpersonal competencies, and the differences in these characteristics in leaders who are imbued with ideologies, especially authoritarianism, Machiavellianism, and self-aggrandizement. A fuller examination of the values, needs, and satisfactions of leaders follows, and singled out for special attention are competitiveness and the preferences for taking risks. In his chapters on personal characteristics, Bass examines the esteem that others generally accord to leaders as a consequence of the leaders' personalities. The many theoretical and research developments about charisma over the past thirty years are crucial and are explored here in depth. Bass has continued to develop his theory of transformational leadership -- the paradigm of the last twenty years -- and he details how it makes possible the inclusion of a much wider range of phenomena than when theory and modeling are limited to reinforcement strategies. He also details the new incarnations of transformational leadership since the last edition. Bass has greatly expanded his consideration of women and racial minorities, both of whom are increasingly taking on leadership roles. A glossary is included to assist specialists in a particular academic discipline who may be unfamiliar with terms used in other fields. Business professors and students, executives in every industry, and politicians at all levels have relied for years on the time-honored guidance and insight afforded by the Handbook.

The Work of Managers - Stefan Tengblad 2012-02-16

"...this book advances the "practice perspective," using behaviour and activities of successful, experienced, and skilled managers as the primary data for theorizing good management."--Cover.

The Individualized Corporation - Sumantra Ghoshal 1999-01-27

Based on six years of research and hundreds of interviews with managers at every level of companies such as Intel, ABB, Canon, 3M, and McKinsey, *The Individualized Corporation* explores the collapse of an outmoded corporate form and reveals the emergence of a fundamentally different management philosophy--one that forces on the power of the individual as the driver of value creation in the company and the importance of individuality in management. The image of the "Organization Man" as a cog in a corporate machine has become both dated and dangerous. Rather than try to force employees into a homogeneous corporate mold based on a company's strategy, structure, and system, world-renowned scholars and consultants Sumantra Ghoshal and Christopher Bartlett argue that managers must embrace a philosophy based on purpose, process, and people that focuses on developing and leveraging the individual's unique talents and skills--a company's most important source of competitive advantage. Without proposing a universal solution or a quick-fix prescription, this important book provides an indispensable guide for those who must lead their companies into the next century.
