Effective Communication and Soft Skills - Nitin Bhatnagar 2011

Educational Games for Soft-Skills Training in Digital Environments - Elena Dell'Aquila 2016-12-14
The book explores advances in soft-skill training through the adaptation of traditional psycho-pedagogical methodology to digital and online settings. Several educational techniques are explored, such as role-playing, psychodrama and rule and drama-based games. The experiences reported in the book are the synthesis of several European projects, coordinated by the authors, aimed at applying known psycho-pedagogical training models to on-line, technology enhanced learning contexts in a broad range of applications and target groups. The specificity of such a psycho-pedagogical methodology, applied throughout all the discussed EU projects, is mainly represented by the importance of feedback and debriefing processes that can be conveyed to learners through different means, such as online group or individual chat with tutors, automatic reports and a psychologically informed scoring system. Tutors, either real or artificial, are seen as the key factor facilitating the training process. The ultimate objective of this book is to offer a theoretical framework where real examples, direct experiences and possible indications on how rule and drama-based multiplayer and single player games can support traditional practice for enhancing soft skills to a wide community of trainers, coaches, HR advisors, consultants and psychologists.

Voices from the Classroom: A Celebration of Learning - Vana Chiou 2021

Voices from the Classroom illustrates that teachers have a leading voice in the policies that impact their

students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms, from primary to higher education, and to provide a window into the perspective of teachers. Voices from the Classroom allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related, student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms: our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms, and the issues affecting them, are crucial to making teaching and learning better. We hope they can help drive real, positive change for students and teachers.

New directions in telecollaborative research and practice: selected papers from the second conference on telecollaboration in higher education - Saba Jager 2016-11-28

This collection of papers, consisting of 39 delegate contributions and three keynote articles from "New directions in telecollaborative research and practice: the second conference on telecollaboration in higher education" hosted by Trinity College Dublin in April 2016, offers a window on a rapidly evolving form of learning. Telecollaboration is used in many formats and contexts, but has as a defining feature the ability to unite learners from classrooms around the world in meaningful computer-mediated tasks and activities. This cross-disciplinary overview discusses telecollaboration in support of language and culture, teacher training, student mobility, and other disciplines and skills from a range of analytical perspectives. It will be of interest to anyone working in HE as an educator, researcher, educational designer, mobility officer, decision maker or administrator.

Innovations and Technologies for Soft Skill Development and Learning - Nagarajan, Suresh Kumar 2020-04-10

Traditional education revolves around the teaching of technical skills, especially within STEM fields. However, soft skills—broadly, communication and intrapersonal skills—are essential within all fields, especially those frequently involving research and collaboration. However, the focus on teaching students to be adept communicators and team members remains woefully underdeveloped. *Innovations and Technologies for Soft Skill Development and Learning* is a pivotal reference source that explores the mental and psychological growth of individual learners at different stages of education concerning soft skills and the need for innovation and creativity to lead a successful career. Highlighting topics including higher education, emotional intelligence, and student behavior, this book is ideally designed for educators, curriculum developers, instructional designers, administrators, policymakers, academicians, researchers, and students.

Employability & Competences - Vanna Boffo 2018-03-31

The book is the final report of the researches, discussions, conversations around and about the Project PRIN Employability & Competences which took place on March 9th--11th, 2017 within an International Conference at the University of Florence. It was the final event of the project PRIN2012LATR9N which aims were: «to design innovative programs for higher education, to promote personalized and learner-centered teaching and learning, to build on job competencies, to value talents to create new work opportunities, to support young adults during their employment emergency, as a response to socio-economic crisis and as a citizenship action». The research activities concerned the main phases of the students' academic life: career guidance upon entry, personalized teaching, career calling, professional vocation, profession building activities such as internships and work related experiences, and lastly job placement.

Regional Conference on Science, Technology and Social Sciences (RCSTSS 2014) - Mohd Amlia Abdullah 2016-07-29

This book features more than 95 papers that were presented at the bi-annual Regional Conference on Science, Technology and Social Sciences, RCSTSS 2014, which was organized by Universiti Teknologi MARA Pahang. It covers topics ranging from communications studies, politics, psychology, education, religious studies as well as business and economics. The papers, which have been carefully reviewed, include research conducted by academicians locally, regionally and globally. They detail invaluable insights on the important roles played by the various disciplines in science, technology and social sciences.

Coverage includes accounting, art and design, business, communication, economics, education, finance, humanity, information management, marketing, music, religion, social sciences and tourism. Throughout, clear illustrations, figures and diagrams complement the research. The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields. It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region.

Soft Skills - K Alex 2009-07

This book *Soft Skills* is like a companion, guiding the students, young men and women, at every step in the job market and corporate personnel. *Soft Skills* have become absolutely essential, both for the growth and success of an individual as well as the organization.

Accountant to Academic - An Unmapped Journey - A. V. Raman 2021-09-24

Raman's memoir chronicles the dramatic change in his profession as an accountant to launching him on the uncharted waters of management of research and development projects in Council of Scientific and Industrial Research and suggesting a fair and just appreciation of public passenger road transport system operated by State Road Transport Undertakings. His role as a trainer in these two diverse fields - scientific research, employing knowledge workers, and passenger road transport, employing blue-collar workers and a few managers - was daunting, which he meets with a suitably tailored approach in the design and delivery of training programmes. His research studies on Indian road transport operating under administrated fares and social costs and his seminal study of the US highways financing system should interest readers in the area of public policy reforms. His academic career spread over the whole gamut of teaching, research, consulting, guiding research students, administration of business schools and experience earlier in government and the public sector and brief but educative exposure to the Indian Parliamentary System vouch for his versatility. Raman's memoir should excite peers and students alike and serve as a model for future writers. Narrated with candour and humour, Raman's description of his early life in Delhi amidst government servants and his own failed attempt to become a bureaucrat, his pen picture of the Delhi's Madrasas, his family's musical legacy and religiosity and his values of accountability and integrity, ungrudgingly shared in this memoir, reveal his credentials as an engaging writer.

The CQ Press Career Guide for Global Politics Students - Peter Ubetaccio 2018-08-14

Turn your degree into a career! The CQ Press Career Guide for Global Politics Students helps you navigate your first steps toward a career in global politics or international relations. Research Handbook on University Rankings - Hazelkorn, Ellen 2021-12-10

Gathering unique and thoughtful contributions from leading international scholars, this timely Research

Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged. It presents an in-depth analysis that reflects the current state of research on rankings, their influence and impact.

Geotechnical and Geophysical Site Characterization - An-Bin Huang 2008-04-04

Geotechnical and Geophysical Site Characterization collects the papers presented at the Third International Conference on Site Characterization (ISC 3) that took place in Taipei from April 1-4, 2008. The subjects covered include new developments in mechanical in-situ testing and interpretation techniques, statistical analysis of test data, geo

Robotics in STEM Education - Myint Swe Khine 2017-07-10

This book describes recent approaches in advancing STEM education with the use of robotics, innovative methods in integrating robotics in school subjects, engaging and stimulating students with robotics in classroom-based and out-of-school activities, and new ways of using robotics as an educational tool to provide diverse learning experiences. It addresses issues and challenges in generating enthusiasm among students and revamping curricula to provide application focused and hands-on approaches in learning. The book also provides effective strategies and emerging trends in using robotics, designing learning activities and how robotics impacts the students' interests and achievements in STEM related subjects. The frontiers of education are progressing very rapidly. This volume brought together a collection of projects and ideas which help us keep track of where the frontiers are moving. This book ticks lots of contemporary boxes: STEM, robotics, coding, and computational thinking among them. Most educators interested in the STEM phenomena will find many ideas in this book which challenge, provide evidence and suggest solutions related to both pedagogy and content. Regular reference to 21st Century skills, achieved through active collaborative learning in authentic contexts, ensures the enduring usefulness of this volume. John Williams Professor of Education and Director of the STEM Education Research Group Curtin University, Perth, Australia

CTET & State TETs: Child Development and Pedagogy Paper 1 & 2 with Previous Year Question Papers - Savitri Devi Yerramsetty 2020-03-17

Students, Grade XI students, teachers and anyone who is interested in psychologists, theories, pedagogy concepts, concepts on child development etc. This book has been designed in such a way that learners with minimum English language skills will also comprehend the concepts. The book will definitely help you understand each and every concept very clearly and to get extraordinary score in CTET and other TETs in your first attempt itself.

Building Skills for Black Workers - Cecilia A. Conrad 2004

Building Skills for Black Workers assesses the current gap in education and training between African American and white workers, and explores possible remedies. This multi-author volume begins with an examination of the elementary and secondary education system (K-12) and concludes with an analysis of public and private worker training programs, addressing three broad questions: How do workers acquire the skills needed for upward mobility and career advancement? What is the current gap in education and training between black and white workers? And what strategies would reduce the gaps and improve the labor market outcomes for these workers?

Proceedings of the Second International Conference on the Future of ASEAN (ICoFA) 2017 - Volume 1 - Ahmad Nizan Mat Noor 2019-04-15

This book examines how business, the social sciences, science and technology will impact the future of ASEAN. Following the ASEAN VISION 2020, it analyses the issues faced by ASEAN countries, which are diverse, while also positioning ASEAN as a competitive entity through partnerships. On the 30th anniversary of ASEAN, all ASEAN leaders agreed to the establishment of the ASEAN VISION 2020, which delineates the formation of a peaceful, stable and dynamically developed region while maintaining a community of caring societies in Malaysia, Indonesia, Singapore, Brunei, Vietnam, Thailand, the Philippines, Myanmar, Laos and Cambodia. In keeping with this aspiration, Universiti Teknologi MARA (UitM) Perlis took the initial steps to organise conferences and activities that highlight the role of the ASEAN region. The Second International Conference on the Future of ASEAN (ICoFA) 2017 was organised by the Office of Academic Affairs, Universiti Teknologi MARA Perlis, to promote more comprehensive integration among ASEAN members. This book, divided into two volumes, offers a useful guide for all those engaged in research on business, the social sciences, science and technology. It will also benefit researchers worldwide who want to gain more knowledge about ASEAN countries.

Soft Skills to Advance Your Developer Career - Zsolt Nagy 2019-09-20

As a software developer, your technical skill set is in high demand. Devices and technology have become an integral part of our everyday lives and no digital organization can thrive without technical professionals on the payroll. However, career plateaus are inevitable in even the most high-demand field. Companies do not only need software developers; they need software developers with soft skills. In Soft Skills to Advance Your Developer Career, author Zsolt Nagy explores how emotional intelligence can give your software development career an edge. These subjects are not taught in school, and unfortunately the career advancement of many excellent developers can be blocked by their inability to effectively communicate their needs, assert themselves, and negotiate confidently. Throughout this book, Nagy shows you how to actively improve and prioritize your soft skills so that you can better represent the holistic interests of your team, obtain better working conditions, negotiate raises, and increase your variety of employment options by elevating your interviewing skills. Discover the obstacles standing between you and a fulfilling career by finding and improving strengths you may not have even known you had. Jump out of your box with Soft Skills to Advance Your Developer Career and leverage your expertise with effortless confidence at all stages of your professional journey. What You Will Learn Examine why software developer careers cannot be treated similarly as any other career path Understand the four soft-skills you need to advance your career Develop a strategy for your personal brand and align it with your career plan Realize the role of assertive communication, and the importance of giving and receiving feedback Create a plan for setting yourself up for a raise or promotion Discover techniques for acing the behavioral and coding interview Who This Book Is For Software developers who have the technical skills required for career advancement, but want a guide on how to manage their careers

Going Diverse: Innovative Answers to Future Challenges - Carmen Leicht-Scholten 2011-02-25

Organisations and institutions of higher education are more and more challenged by current economic, social and political conditions to react competitively and innovatively on new requirements, such as demographic change, globalisation or skilled labour shortage. In addition, universities and companies alike, have to compete for the most qualified staff. In order to produce more innovative solutions and to perform better, it is essential to integrate gender and diversity perspectives as important elements of organisational and human resources development. This anthology presents different theoretical and practical approaches, best practice examples and important aspects of gender and diversity management in organisations.
