Environmental Challenges in the Mediterranean 2000-2050

Antonio Marquina 2012-12-06

This book addresses six key factors that will affect environmental policies in the Mediterranean region during the next fifty years: population growth, climate change, soil erosion and desertification, water scarcity, food production, and urbanization and pollution. The authors assess these as potential sources of violent conflict. The interdisciplinary approach makes this a relevant and useful reference for a broad range of professionals, specialists and researchers.

Dutch Warships in the Age of Sail, 1600-1714 - James Bender

2014-12-01

This definitive study presents a complete account of the Dutch Republic's naval fleet during its golden age as a world power.

The Netherlands was by far the most important maritime power of the seventeenth century. It dominated seaborne trade with the largest merchant fleet in the world.

Born out of an 80-year struggle against Spain for independence, the Dutch republic relied on naval power to protect its freedom, promote its trade and defend its overseas colonies. Yet the ships that made up its fleets are among the least studied of any in the age of sail. This is partly because a decentralized administration of five separate admiralties, often producing ships of the same name at the same time, as well as competing systems of measuring ships, all lead to confusion and error. In this comprehensive volume, James Bander delivers the first definitive listing of all Dutch fighting ships—whether purpose-built, purchased, hired

or captured—from the heyday of the United Provinces. Each entry is complete with technical details and summaries of the ship's career. It also provides administrative, economic and technical background, and outlines the many campaigns fought by one of the most successful navies in history.

Building a Miniature Navy Board Model - Philip Reed
2017-02-15

Phillip Reed's latest building guide tackles what many regard as the ultimate expression of the ship model maker's art, the Navy Board model. His step-by-step construction of a miniature 1/192 scale model of the Royal George of 1715 demonstrates all the conventions of Navy Board framing and planking. With the aid of nearly 400 photographs, he takes the reader through every building stage. Methods of hull and deck framing, internal and external planking, and the construction of the complex stern are all covered. Reed also shows how to render the

multitude of decorative carvings on the figurehead, stern, and broadside. This is the first book in many years to cover the well-known and sought-after early eighteenth-century Navy Board models. The author takes the reader through every stage of the work with the aid of nearly 400 photographs. Methods of hull and deck framing, internal and external planking, the construction of the complex stern with its array of galleries, doors and windows, are all covered; and the rendering of the multitude of decorative carvings on the figurehead, stern and broadside is also demonstrated. A section showing, amongst others, his model of the siren, explains how the techniques used to frame Royal George can be adapted for ships of a later date, using single and double frames closer to full-size practice. Here is an invaluable manual from which any model maker can benefit from the lifetime's experience of one of the world's leading exponents of the art of miniature

shipbuilding.

SOVIET ARMOURER FORCE -

Ones and Zeroes - Dan Wells
2017-02-14

From Dan Wells, author of the New York Times bestselling Partial Sequence and the John Cleaver series, comes the second book in a dark, pulse-pounding sci-fi-noir series set in 2050 Los Angeles.

It means fame and fortune, or maybe it's a ticket out of obscurity or poverty. If you have a connection to the internet and four friends you trust with your life, anything is possible.

Marisa Carneseca is on the hunt for a mysterious hacker named Grendel when she receives word that her amateur Overworld team has been invited to Forward Motion, one of the most exclusive tournaments of the year. For Marisa, this could mean anything—a chance to finally go pro and to help her family,

stuck in an LA neighborhood on the wrong side of the growing divide between the rich and the poor. But Forward Motion turns out to be more than it seems—rife with corruption, infighting, and danger—and Marisa runs headlong into Alain Bensoussan, a beautiful, dangerous underground freedom fighter who reveals to her the darker side of the forces behind the tournament. It soon becomes clear that, in this game, winning might be the only way to get out alive.

Vera Vera Vera - Hayley Squires
2013-11-06

The boy who comes back from a war far away in a wooden box is glorified and called a hero. As the funeral plans are made in a small Kent town, his siblings squabble over who he was. Maybe the fanfare isn't needed for this heroic martyr. Vera Vera Vera is a blackly comic play about what we are willing to fight for. Her first work for the theatre, Hayley Squires is a bracing new voice,

clear eyed and loud, looking at violence, neglect and apathy. Depicting a gritty slice of social realism, Vera Vera Vera portrays the disjunction between the lives of the surviving family against the memories and patriotic commemoration for the dead. Looking at drug addiction, crime, verbal and domestic abuse, engrained racism, the characters' downtrodden and trapped lives are exposed with honesty and verve. This brave and uncompromising play questions both the validity of the myth of the martyred soldier and the true worth of survival for those left behind.

Wine and War - Donald Kladrup 2002-06-18

The remarkable untold story of France's courageous, clever vintners who protected and rescued the country's most treasured commodity from German plunder during World War II. "To be a Frenchman means to fight for your country and its wine." -Claude Terrail, owner, Restaurant La Tour d'Argent In 1940, France fell to the Nazis and almost immediately the German army began a campaign of pillaging one of the assets the French hold most dear: their wine. Like others in the French Resistance, winemakers mobilized to oppose their occupiers, but the tale of their extraordinary efforts has

remained largely unknown-until now. This is the thrilling and harrowing story of the French wine producers who undertook ingenious, daring measures to save their cherished crops and bottles as the Germans closed in on them. Wine and War illuminates a compelling, little-known chapter of history, and stands as a tribute to extraordinary individuals who waged a battle that, in a very real way, saved the spirit of France.

Dutch East India Company Shipbuilding - Wendy van Duivenvoorde 2015-03-30
Eight months into its maiden voyage to the Indies, the Dutch East India Company's Batavia sank on June 4, 1629 on Morning Reef in the Houtman Abrolhos off the western coast of Australia. Wendy van Duivenvoorde's five-year study was aimed at reconstructing the hull of Batavia, the only excavated remains of an early seventeenth-century Indiaman to have been raised and

conserved in a way that permits detailed examination, using data retrieved from the archaeological remains, interpreted in the light of company archives, ship journals, and Dutch texts on shipbuilding of this period.

Over two hundred tables, charts, drawings, and photographs are included.

Ocean Liners of the 20th Century - Gordon Newell

2017-01-12

With his vast collection of photographs and memorabilia, combined with his skill as a writer, Newell truly makes the ships and memories of them become living personalities. How Jack London, Count von Luckner, Sir Ernest Shackleton and all other intrepid adventurers of the sea would have gloried in this book; and present-day sea rovers, you, how you will glory in it! Here are the glamour, majesty and color of the most exciting things ever built—the mammoths of the sea. Gordon Newell's salty stories and fine photos bring these monarchs and superliners to life so

completely, that you hear once more the deep-throated whistle blasts as the ships knife their way out of the fog, one after another. "I am not recording affection for the Mauretania as President of the United States, but as civilian Franklin D.

Roosevelt who loves the sea, its ships and the men who sail them..." writes F.D.R. in his story "Queen with a Fighting Heart." Author Gordon Newell shares these sentiments. "The Kronprinz Wilhelm" he writes, "was not a ship to give up easily. Night was falling, the darkness would give her a fighting chance. The last of the fuel was shoveled into the furnaces. The worn-out engines were breaking their hearts for the ship...out of the night she came, the sky glowing red above the crowns of her belching funnels. The white glow of acres of foam at her bow. The guns of the British cruisers swung around."

Battleship Commander - Paul Stillwell 2021-10-15

This is the first-ever biography of Vice Admiral Willis A. Lee Jr., who served a key role during World War II in the Pacific. Recognizing the achievements and legacy of one of the war's top combat admirals has been long overdue until now. Battleship Commander explores Lee's life from boyhood in Kentucky through his eventual service as commander of the fast battleships from 1942 to 1945.

Paul Stillwell draws on more than 150 first-person accounts from those who knew and served with Lee from boyhood until the time of his death. Said to be down to earth, modest, forgiving, friendly, and with a wry sense of humor, Lee eschewed the media and, to the extent possible, left administrative details to others. Stillwell relates the sequential building of a successful career, illustrating Admiral Lee's focus on operational, tactical, and strategic concerns. During his service in the Navy Department from 1939 to 1942, Lee prepared the U.S. Navy for war at sea, and was involved in inspecting designs for battleships, cruisers, aircraft carriers, and destroyers. He sent observers to Britain to report on Royal Navy operations during the war against Germany and made plans to send an action team to mainland China to observe conditions for possible later Allied landings there. Putting his focus on the need to equip U.S. warships with radar and

antiaircraft guns, Lee was one of the few flag officers of his generation who understood the tactical advantage of radar, especially during night battles. In 1942 Willis Lee became commander of the first division of fast battleships to operate in the Pacific. During that service, he commanded Task Force 64, which achieved a tide-turning victory in a night battle near Guadalcanal in November 1942. Lee missed two major opportunities for surface actions against the Japanese. In June 1944, in the Marianas campaign, he declined to engage because his ships were not trained adequately to operate together in surface battles. In October 1944, Admiral William Halsey's bungled decisions denied Lee's ships an opportunity for combat. Continuing his career of service near the end of the war, Lee, in the summer of 1945, directed anti-kamikaze research efforts in Casco Bay, Maine. While Lee's wartime successes and failures make for compelling reading, what is here in this biography is a

balanced look at the man and officer.

Dimensions of Learning Teachers Manual, 2nd Edition - Robert J. Marzano
2009-06

The premise of Dimensions of Learning an instructional framework founded on the best of what researchers and theorists know about learning

is that five types, or dimensions, of thinking are essential to successful learning. These are (1) positive attitudes and perceptions about learning, (2) thinking involved in acquiring and integrating knowledge, (3) thinking involved in extending and refining knowledge, (4) thinking involved in using knowledge meaningfully, and (5) productive habits of mind. Dimensions of Learning is a valuable tool for reorganizing curriculum, instruction, and assessment. The authors discuss each of the five dimensions in detail and describe hundreds of teaching strategies that support them for example, how to help students construct meaning for declarative knowledge, internalize procedural knowledge, and see the relevance of what they are expected to learn. The authors provide many examples at the elementary and secondary classroom levels. Teachers of grades K-12 can use this information to improve teaching and learning in any

content area.

Tyre, Byblos, and Sidon - Charles River Editors 2017-11-17

*Includes pictures *Includes ancient accounts describing the cities *Includes a bibliography for further reading Of all the peoples of the ancient Near East, the Phoenicians are among the most recognizable but also perhaps the least understood. The Phoenicians never built an empire like the Egyptians and Assyrians; in fact, the Phoenicians never created a unified Phoenician state but instead existed as independent city-state kingdoms scattered throughout the Mediterranean region. However, despite the fact there was never a "Phoenician Empire," the Phoenicians proved to be more prolific in their exploration and colonization than any other peoples in world history until the Spanish during the Age of Discovery. The Phoenicians

were well-known across different civilizations throughout the ancient world, and their influence can be felt across much of the West today because they are credited with inventing the forerunner to the Greek alphabet, from which the Latin alphabet was directly derived. Nonetheless, the Phoenicians left behind few written texts, so modern historians have been forced to reconstruct their past through a variety of ancient Egyptian, Assyrian, Babylonian, Greek, and Roman sources. It's not even clear what the Phoenicians called themselves, because the name "Phoenician" is derived from the Greek word "phoinix," which possibly relates to the dyes they produced and traded (Markoe 2000, 10). The mystery of the ancient Phoenicians is further compounded by the fact that archaeologists have only been able to excavate small sections of the three primary Phoenician cities: Byblos, Sidon, and Tyre. A network of this size, with hundreds of colonies and thousands of

ships, had to be well-coordinated, and it was thanks to important cities along the Mediterranean coast. One of the most crucial cities in the system was hidden beneath the Greek, Roman, and Crusader ruins of Lebanon: the ancient city of Tyre. "Seated at entrance to the sea," according to the prophet Ezekiel, Tyre was constructed on a purportedly impenetrable island. As one of the oldest cities in the world, Byblos is a fascinating place, with its successive layers of debris representing millennia of human occupation. From the earliest times this coastal strip played a key role in connecting Arabia, Anatolia, Mesopotamia, Egypt, and the Aegean. Because of this, the history of the city cannot be told in isolation of its neighbors. From the Bronze Age Byblos had a special connection with Egypt, which ceased only with the invasion of the mysterious Sea Peoples at the end of the 2nd millennium BCE. Between the Phoenicians, Asia Minor, Israel, and Roman Palestine, it is not

surprising that many divergent religions have and continue to exist in the region. The history of Sidon, as with other Phoenician cities, constantly fluctuated between freedom and subjection. Its privileged, geographical position on the coast was the source of its commercial development and its openness to foreign cultures, but in doing so the prosperous city became coveted by numerous conquerors. It passed through the successive influence of Egypt, the neighboring Phoenician city-state of Tyre, and eventually flourished under Persian rule as the seat of a satrap for the whole Euphrates region. The Persian king frequently made use of the renowned Sidonian fleet during his military campaigns, and the kings of Sidon were greatly rewarded for their services. However, during the campaigns of Alexander the Great, Sidon opened its doors to the young Macedonian, who chose to depose the long lasting dynasty of Sidonian kings. It later became the

battleground between the Arab caliphates and European Crusaders during the Middle Ages in a conflict that in many ways continues to shape the region to this day.
