The Jingshan Report - China Finance 40 Forum Research Group
2020-01-14

The Jingshan Report is a collection of research papers on key issues for China's financial opening, including reform of the RMB exchange rate regime, management of cross-border capital flows and financial support for the Belt and Road Initiative. Authored by leading experts in the relevant fields, the report examines the evolution, current status and problems with the financial opening policy over the past four decades, and puts forward policy recommendations on how to steadily push forward China's financial opening.

The Routledge Handbook of Financial Geography Janelle Knox-Hayes
2020-12-14

This handbook is a comprehensive and up to date work of reference that offers a survey of the state of financial geography. With Brexit, a global recession triggered by the COVID-19 pandemic, as well as new financial technology threatening and promising to revolutionize finance, the map of the financial world is in a state of transformation, with major implications for development. With these developments in the background, this handbook builds on this unprecedented momentum and responds to these epochal challenges, offering a comprehensive guide to financial geography. Financial geography is concerned with the study of money and finance in space and time, and their impacts on economy,

society and nature. The book consists of 29 chapters organized in six sections: theoretical perspectives on financial geography, financial assets and markets, investors, intermediation, regulation and governance, and finance, development and the environment. Each chapter provides a balanced overview of current knowledge, identifying issues and discussing relevant debates. Written in an analytical and engaging style by authors based on six continents from a wide range of disciplines, the work also offers reflections on where the research agenda is likely to advance in the future. The book's key audience will primarily be students and researchers in geography, urban studies, global studies and planning, more or less familiar with financial geography, who seek access to a state-of-the art survey of this area. It will also be useful for students and researchers in other disciplines, such as finance and economics, history, sociology, anthropology, politics, business studies, environmental studies and other social sciences, who seek convenient access to financial geography as a new and relatively unfamiliar area. Finally, it will be a valuable resource for practitioners in the public and private sector, including business consultants and policy-makers, who look for alternative approaches to understanding money and finance.

Innovation in Emerging Markets - J. Haar 2016-11-16

Innovation is sweeping the globe at breakneck speed, and emerging markets are where tremendous growth and opportunity reside. Jerry

Haar and Ricardo Ernst delve into the forces and drivers that shape innovation in emerging markets and present case studies, along with a summation of the key features and outlook for innovation over the next decade.

Efficiency and Competition in Chinese Banking - Yong Tan
2016-10-27

Efficiency and Competition in Chinese Banking gives a comprehensive analysis of the industry, including cost, technical, profit, and revenue efficiency. The Chinese banking industry is of global importance. The book estimates the competitive condition of the sector using the Boone indicator, Panzar-Rosse H statistic, Lerner index, and concentration ratio. The author investigates the impact of competition on efficiency in Chinese banking while controlling for comprehensive determinants of bank efficiency. This title complements Yong Tan's previous book, Performance, Risk, and Competition in the Chinese Banking Sector, also published by Chandos. Analyzes efficiency in the Chinese banking industry Presents a robust analysis of competition in the Chinese banking sector, using four competition indicators Considers the impact of competition on efficiency Explores the competitive conditions of different banking markets including deposit market, loan market, and non-interest income market

An Introduction to Global Financial Markets - Stephen Valdez 2017-09-16
This textbook provides an accessible introduction to finance and financial markets around the world. Requiring no previous knowledge of the subject, the authors comprehensively cover a broad range of different types of banking, markets, foreign exchange and derivative products. Incorporating recent events and current developments in finance, contemporary, international examples are used throughout to illustrate this fast-moving subject area. With Stephen Valdez's decades of experience as a financial trainer and Philip Molyneux's academic experience, they are the perfect team for this accessible and applied textbook. This textbook is core reading for second and third year undergraduate students studying modules in financial markets and institutions as part of business and management degree courses. In

addition it is suitable for use on MBA finance courses. New to this Edition: - Provides updated and expanded coverage of the global financial crisis of 2007-08 and its aftermath - Explains and contextualises the major structural and regulatory reforms of global banking and financial markets - A new design to make it more student-friendly, such as illustrative boxes that explain key financial issues

US-China Relations in the Twenty-First Century - Michael Tai 2015-04-24
The relationship between the United States and China will be of critical importance to the world throughout the twenty-first century. In the West China's rise is often portrayed as a threat and China seen in negative terms. This book explores the dynamics of this crucial relationship. It looks in particular at what causes an international relationship to be perceived negatively, and considers what can be done to reverse this, arguing that trust is a key factor. It goes on to discuss US and Chinese rhetoric and behaviour in three key areas - climate change, finance, and international security. The book contends that, contrary to much US rhetoric, China's actions in these areas is often much more flexible and accommodating than the US position, and that the Chinese are much more knowledgeable about, and understanding and appreciative of, the United States than vice versa.

Global Finance in Emerging Market Economies - Todd A. Knoop 2013
This title focuses on the important characteristics of financial systems in emerging market economies and their differences from those in developed countries. The book surveys both theoretical and empirical research on finance in emerging economies, as well as reviewing numerous case studies.

The Handbook of Mergers and Acquisitions - David Faulkner 2012-06-07
With its inception at the end of the nineteenth century as a means of consolidation and reorganization, mergers and acquisitions (M&A) have since become quasi-institutionalized as one of the primary strategic options for organizations, as they seek to secure their position in an ever more competitive and globalizing market place. Despite the optimism surrounding M&A as strategic moves, research on post-merger company performance suggests that most firms engaging in M&A activity do not

achieve the sought-after performance targets, either immediately or in the years following the deal. What is it that drives M&A activity when research results do not support the performance expectations of these undertakings? Alternatively, have M&A scholars got it all wrong in the way that M&A performance is measured? Is the topic too complex, enduring, and multifaceted to study? The Handbook argues that the field of M&A is in need of a re-rooting: past research needs to be critically reviewed, and fundamental assumptions revisited. A key issue preventing efforts in the practice and study of M&A from achieving dynamic syntheses has been the disciplinary gulf separating strategy, finance, and human relations schools. The Handbook aims to bridge the hitherto separate disciplines engaged in the study and practice of M&A to provide more meaningful results. Toward this end, the Handbook brings together a set of prominent and emerging scholars and practitioners engaged in the study of M&A to provide thought-provoking, state of the art overviews of M&A through four specific 'lenses' - strategic, financial, socio-cultural, and sectorial approaches. By summarizing key findings in current research and exploring ways in which the differing approaches could and should be 'synthesized', it aims to highlight the key issues facing M&A practitioners and academics at the dawn of the third millennium.

Investigating the Performance of Chinese Banks: Efficiency and Risk Features - Yong Tan 2016-10-19

This book applies econometric techniques to test the relationship between efficiency and risk within the banking industry in China. Chapters examine how efficiency has been affected by different types of risk-taking behaviour and how risk has been an important determinant of bank efficiency in the context of the series of reforms impacting banks in China since 1978. The author begins by unpacking these reforms and proceeds to explain relevant theories of efficiency and bank risk before reviewing empirical literature in evaluating risk and efficiency in the banking industry. He then investigates the issues of efficiency and risk in the Chinese banking industry using a number of modern econometric techniques. The final chapters present the results of original empirical

research conducted by the author, and provide valuable implications to Chinese government as well as banking regulatory authorities to make relevant policies.

The U.S. Banking System - Felix I. Lessambo 2019-12-18

The U.S. banking system differs from many countries both in the range of services supplied and the complexity of operations. Meanwhile, the U.S. financial markets have become the attraction of worldwide investors. This book explains the three key aspects of the industry: the laws governing the banking institutions, the regulations thereof, and their economics and financial statements in a manner not covered by any competitive publications, of interest to both professionals and scholars who want to better grasp this industry. Auditing a bank and/or liquidating a bank require a set of rules not always well understood. The book provides such an overview.

Administrative Monopoly In China: Causes, Behaviors, And Termination - Hong Sheng 2015-03-05

Administrative Monopoly in China: Causes, Behaviors, and Termination is a further work of our previous book, China's State-Owned Enterprises: Nature, Performance and Reform. This new book analyzes the SOEs with respect to monopoly, and focuses on six industries: telecommunication, petroleum, railway, salt, banking and football. The book tells the history of how administrative monopolies were formed in China, analyzes the factors responsible for this, describes the behaviors of administrative monopoly, enterprises, and individuals against the monopolistic background, and presents data on the losses brought about by the administrative monopolies.

Of beaming and organization of effective functioning of innovation sphere of economy enterprise, industry, the complex - Isaeva, Patimat Gadzhievna 2013-06-27

This collection includes materials of the international scientific conference "Of beaming and organization of effective functioning of innovation sphere of economy enterprise, industry, the complex", held in Austria, Salzburg, 28-30 April 2013 The main objective of the conference - the development of the community of scholars and practitioners in the

economic sphere. The conference brought together scientists and experts from Russia, Dagestan, Sakha Republic, Kazakhstan. The international scientific conference was supported by the Publishing House of the International Centre of research projects, editors of peer-reviewed scientific journals "Modern control technology", "Regional Economics and Management: Electronic scientific journal", "Economic growth and development», «Social & economic innovations».

The Euro Financial Crisis - Hummel, Detlev 2013

Long-Term Commitment, Trust and the Rise of Foreign Banking in China - Qing Lu 2007-09-30

The rapid growth of foreign banks has aroused a growing interest in the academic field and specifically as regards to the question of why foreign banks exist. This book aims to establish the relationship between trust as contextual knowledge capital built between the Chinese government and foreign banks and foreign banks. knowledge capital and the relationship between the former and foreign banks. long-term commitment. By investigating the development strategy of foreign banks and by examining and explaining the importance of foreign banks. long-term commitment to their development, this book has demonstrated that foreign banks established branches in China not only to follow their home-country customers in order to retain their knowledge capital but also to gain market access. Trust as contextual knowledge capital built between foreign banks and the Chinese government could assist their knowledge capital retention and their market access strategy. Foreign banks. long-term commitment could help them to achieve this contextual knowledge capital. This book thus has major implications for the development strategy of foreign banks in a government-oriented economy with a controlled banking sector. The first book covering the relationship between the governments trust and support and the rise of foreign banks in China Few studies have analysed the development of foreign banks from the standpoint of government, i.e. the supply side of the banking licence, and the relationship between the development of foreign banks and the trust built between foreign banks and the

government The first book showing how some big foreign banks in China, such as HSBC, built relationship with the Chinese government
Banking Reforms and Globalisation - Mohan Prasad Shrivastava 2007
Contributed articles with reference to India.

Western Bankers in ChinaJane Nolan 2018-10-10

When China's economic reforms were beginning, there was an expectation in the west that China's financial markets would be opened to western banks and that China's banks would be reformed along western lines. Joint ventures between Chinese banks and western banks, minority shareholding by western banks and the involvement of western banking personnel in assisting Chinese banks with their reforms were all seen as moves towards reform along western lines. This book analyses the role which western bankers have played in China's economic reforms, focusing on their influence on institutional change and corporate governance. Based on extensive original research, the book shows that while components of western models of corporate governance have been widely adopted, the motivation for these changes seems to have been legitimacy-seeking by Chinese banks, and that whilst there has been relatively rapid change in the formal legislative environment, informal organisational practices are changing at a much slower pace. Alliances between Chinese and western banks are woven with contradictions and power games and so many actors in the Chinese banking sector seek to resist manipulation by their western counterparts. The financial crisis weakened the idea that western banks are a universally correct model and strengthened China's resolve to keep control of its banking sector and manage it along Chinese lines.

Human Resource Development in the Russian Federation - Alexandre Ardichvili 2015-05-08

Unlike Brazil, India, or China, prior to the beginning of market-oriented reforms in early 1990s, Russia maintained a high level of human capital and possessed a highly developed system of vocational education, continuous education, and management development institutions sponsored by the government. However, after the beginning of the market reforms many state-sponsored programs were disbanded and

individual enterprises and newly emerging private educational institutions found themselves in a position of having to provide training and professional development services for future and current employees. Both government-level policies in support of HRD and enterprise-level HRD systems have emerged fairly recently in the Russian Federation, and are still in a stage of change and development. This book provides an in-depth analysis of the current state of HRD in the Russian Federation. It covers country-level policies, organizational-level programs and strategies, and individual-level educational and training efforts. While the study is focused on Russia, its conclusions will be of value to scholars, students, and practitioners examining similar issues surrounding the emergence and development of HRD systems in emerging countries. Furthermore, the authors' framework for analyzing HRD on multiple levels and across various parts of the adult and vocational education and development systems offers a unique and important contribution to the theoretical debate on comparative educational systems outside the HRD and HRM communities.

The Changing Fortunes of Central Banking - Philipp Hartmann
2018-03-29

Understanding the changing role of central banks and their recent novel policies is essential for analysing many economic and financial issues, ranging from financial regulation and crisis, to exchange rate dynamics and regime changes, and QE and prolonged low interest rates. This book features contributions by the world's leading experts on central banking, providing in accessible essays a fascinating review of today's key issues for central banks. Luminaries including Stephen Cecchetti, Takatoshi Ito, Anil Kashyap, Mervyn King, Donald Kohn, Otmar Issing and Hyun Shin are joined by Charles Goodhart of the London School of Economics and Political Science, whose many achievements in the field of central banking are honoured as the inspiration for this book. The Changing Fortunes of Central Banking discusses the developing role of central banks in seeking monetary and financial stabilisation, while also giving suggestions for model strategies. This comprehensive review will appeal to central bankers, financial supervisors and academics.

China's Centralized Industrial Order Chen Li 2014-11-13

This book is about the political economy of China's industrial reform and the rise of a group of Chinese big businesses under the Communist Party and the central state's control. It examines the origins, evolution and institutional configuration of this centralized system in governing the 'commanding heights' of the Chinese industrial economy. Shaped by persistent industrial policies to develop China's 'national champions' enterprises, the core parts of China's central industrial ministries and mono-bank system have been transformed into a 'national team' of giant modern business firms in industries such as oil, power generation, telecommunications, aerospace, aviation, nuclear, shipbuilding, mining, construction, automobile and banking. Through an adaptive process of learning, experimentation and restructuring, the bedrock of the authority relations and control mechanisms among the Party, government bureaucracy and firms has been consolidated rather than dismantled in the system's transformation. This alternative view of China's industrial reform presents a direct challenge to the neo-liberal transition model of China's institutional development and the mainstream Western conceptions of Chinese big business.

Reserve Bank of India Bulletin - Reserve Bank of India 2005

Trade, Investment and Competition in International Banking
O'Connor 2005-11-01

Banks' business is increasingly international and an élite group of global banks is emerging. This book outlines the influences on the evolution of international banking and analyses trade and investment in the international banking industry, covering cross-border trade in banking services, foreign direct investment by banks, international financial centres, capital movements, and competition between banks. Focusing on competitive advantage, it compares the leading banks' international business. This book is of interest to academics and students as well as to bankers. It provides a transversal and truly comprehensive overview of the international banking industry, focusing on the organization of the industry and the influences on it, rather than on the functions of banks

themselves.

Globalization, Gating, and Risk Finance - Unurjargal Nyambuu
2018-01-16

An in-depth guide to global and risk finance based on financial models and data-based issues that confront global financial managers. Globalization, Gating, and Risk Finance offers perspectives on global risk finance in a world with economies in transition. Developed from lectures and research projects investigating the consequences of globalization and strategic approaches to fundamental economics and finance, it provides an approach based on financial models and data; it includes many case-study problems. The book departs from the traditional macroeconomic and financial approaches to global and strategic risk finance, where economic power and geopolitical issues are intermingled to create complex and forward-looking financial systems. Chapter coverage includes: Globalization: Economies in Collision; Data, Measurements, and Global Finance; Global Finance: Utility, Financial Consumption, and Asset Pricing; Macroeconomics, Foreign Exchange, and Global Finance; Foreign Exchange Models and Prices; Asia: Financial Environment and Risks; Financial Currency Pricing, Swaps, Derivatives, and Complete Markets; Credit Risk and International Debt; Globalization and Trade: A Changing World; and Compliance and Financial Regulation. Provides a framework for global financial and inclusive models, some of which are not commonly covered in other books. Considers risk management, utility, and utility-based multi-agent financial theories. Presents a theoretical framework to assist with a variety of problems ranging from derivatives and FX pricing to bond default to trade and strategic regulation. Provides detailed explanations and mathematical proofs to aid the readers' understanding. Globalization, Gating, and Risk Finance is appropriate as a text for graduate students of global finance, general finance, financial engineering, and international economics, and for practitioners.

Governance of International Banking - Dirk Schoenmaker 2013-03-05
Global governance of international banks is breaking down after the Great Financial Crisis, as national regulators are withdrawing on their

home turf. New evidence presented illustrates that the global systemically important banks underpin the global financial system. This book offers solutions for the effective governance of global banks.

Open Innovation Ecosystems - Daniel Fasnacht 2018-11-19

Sharing information and knowledge, co-innovating with clients, communities, and competitors and adopting cognitive technology, robo advisors, crowdfunding, and blockchain reflect current socio-economic behaviour. Emerging growth regions in Asia, demographic shifts, intergenerational wealth transfers and increasing regulations are other trends that amplify each other, disrupt the client journey, and affect the entire economy. Moreover, unprecedentedly, new market entrants outside the financial sector, be it Amazon, Apple, Google, or Facebook, are increasingly expanding their scale and scope to offer financial services. Featuring case studies of Chinese business ecosystems, such as Alibaba/Ant Financial, that have transformed from displaying domestic and organic growth to rapid global expansion, this highly readable book gives you glimpses of how banking services are evolving. We break down everything you need to know about the foray of challenger banks into the financial services. You learn how they link health to wealth data and gain advantages through analytical capabilities in the race to attract sophisticated clients with highly personalized experiences. The next level of creating and capturing value for clients and businesses involves platform models embedded in cross-sector ecosystems. Digital platforms are the crucial entry point to global markets, creating value for multiple sides. They leverage self-driving ecosystems that go beyond linear value chains applied in traditional business models as the sources of growth in an interconnected world are collaboration and network effects. The winners will be those who open up and engage themselves in an ecosystem that transcends organizational boundaries and performs without sector borders because every actor contributes to the value constellation of the system. The book provides practitioners and scholars with new insights into open and holistic business models, where competition in future will be between ecosystems rather than at the company level. It encourages leaders to expand their skills and think

through the lens of the ecosystem theory while developing compelling strategies to serve the next-generation clients.

Research Handbook on Law and Ethics in Banking and Finance - Costanza A. Russo 2019

The global financial crisis evidenced the corrosive effects of unethical behaviour upon the banking industry. The recurrence of misbehaviour in the financial sector, including fraud and manipulations of market indices, suggests the need to establish a banking culture that conforms to the highest standards of ethical and professional behaviour. This Research Handbook on Law and Ethics in Banking and Finance focuses on the role that law should play and the effectiveness of newly introduced regulations and supervisory actions as a driver for ethical conduct so as to reconnect the interests of bankers and financiers with the interests of society.

The Sharing Economy in Europe Vida Česnuitytė 2022-01-21

This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.

International Financial Instability - Douglas Darrell Evanoff 2007

This book explores the potential and problems of bank safety and efficiency arising from the rapidly growing area of cross-border banking in the form of branches or subsidiaries with primarily only national prudential regulation. There are likely to be differences in the treatment of the same bank operating in different countries or of different banks from different home countries operating in the same country with respect to deposit insurance provisions, declaration of insolvency, resolution of insolvencies, and lender of last resort protection. The book identifies these protection problems and discusses possible solutions, such as greater cross-border cooperation, harmonization and organizations. The contributors to this book include experts from different countries and from a wide range of affiliations, including academia, regulators, practitioners, and international organizations. Sample Chapter(s). Chapter 1: Cross-Border Banking Regulation OCo A Way Forward: The European Case (68 KB). Contents: Special Addresses: Cross-Border Banking Regulation OCo A Way Forward: The European Case (Stefan Ingves); Remarks before the Conference on International Financial Instability (Sheila C Bair); Benign Financial Conditions, Asset Management, and Political Risks: Trying to Make Sense of Our Times (Raghuram G Rajan); International Financial Instability: Cross-Border Banking and National Regulation Chicago OCo Dinner Remarks (Jean Pierre Sabourin); Landscape of International Banking and Financial Crises: Current State of Cross-Border Banking (Dirk Schoenmaker & Christiaan van Laecke); Actual and Near-Miss Cross-Border Crises (Carl-Johan Lindgren); A Review of Financial Stability Reports (Sander Oosterloo, Jakob de Haan, & Richard Jong-A-Pin); Discussion of Landscape of International Banking and Financial Crises (Luc Laeven); Causes and Conditions for Cross-Border Instability Transmission and Threats to Stability: Cross-Border Contagion Links and Banking Problems in the Nordic Countries (Bent Vale); Currency Crises, (Hidden) Linkages, and Volume (Max Bruche, Jon Danielsson & Gabriele Galati); What Do We Know about the Performance and Risk of Hedge Funds? (Triphon Phumiwasana, Tong Li, James R Barth & Glenn Yago); Remarks on Causes and Conditions of Financial Instability Panel (Garry Schinasi);

Prudential Supervision: Home Country versus Cross-Border Negative Externalities in Large Banking Organization Failures and How to Avoid Them (Robert A Eisenbeis); Conflicts between Home and Host Country Prudential Supervisors (Richard J Herring); Cross-Border Nonbank Risks and Regulatory Cooperation (Paul Wright); Challenges in Cross-Border Supervision and Regulation (Eric Rosengren); Government Safety Net: Bagehot and Coase Meet the Single European Market (Vitor Gaspar); Banking in a Changing World: Issues and Questions in the Resolution of Cross-Border Banks (Michael Krimminger); International Banks, Cross-Border Guarantees, and Regulation (Andrew Powell & Giovanni Majnoni); Deposit Insurance, Bank Resolution, and Lender of Last Resort: Putting the Pieces Together (Thorsten Beck); Insolvency Resolution: Cross-Border Resolution of Banking Crises (Rosa María Lastra); Bridge Banks and Too Big to Fail: Systemic Risk Exemption (David G Mayes); Prompt Corrective Action: Is There a Case for an International Banking Standard? (María J Nieto & Larry D Wall); Insolvency Resolution: Key Issues Raised by the Papers (Peter G Brierley); Cross-Border Crisis Prevention: Public and Private Strategies: Supervisory Arrangements, LOLR, and Crisis Management in a Single European Banking Market (Arnoud W A Boot); Regulation and Crisis Prevention in the Evolving Global Market (David S Hoelscher & David C Parker); Derivatives Governance and Financial Stability (David Mengle); Cross-Border Crisis Prevention: Public and Private Strategies (Gerard Caprio, Jr.); Where to from Here: Policy Panel: Cross-Border Banking: Where to from Here? (Mutsuo Hatano); Remarks on Deposit Insurance Policy (Andrey Melnikov); The Importance of Planning for Large Bank Insolvencies (Arthur J Murton); Where to from Here: Policy Panel (Guy Saint-Pierre); Some Private-Sector Thoughts on Home/Host-Country Supervisory Issues (Lawrence R Uhlick). Readership: Academics and upper-level undergraduate or graduate students in the areas of financial institutions, banking, financial regulation, or international financial markets; financial regulators, policy-makers, and consultants."

Information Systems and Outsourcing - M. Lacity 2008-11-19

A new look at nearly 20 years of theoretical and practical research on IT

outsourcing. The book explores how good IT outsourcing theories shape practice and how effective IT outsourcing practices inform theory. It highlights the importance of examining theories borrowed from economics, strategy, and sociology to study IT outsourcing.

The Chinese Banking Industry - Yuanyuan Peng 2007-08-18

This book provides detailed systematic micro-level analysis of the historical development of the Chinese banking industry, focusing in particular on the development of the Bank of China (BOC) in the period 1905 to 1949. Banking reform is a key area of China's economic transformation, and this book, bringing a vast amount of material to a Western audience for the first time, provides a detailed evidence of the key challenges faced by a major Chinese bank. The book addresses important issues in its evolution, including corporate governance government intervention, foreign competition and white-collar crime evaluates how the challenges in these areas were met considers the results of its efforts draws lessons for policy making today.

Britannica Book of the Year 2010 - Encyclopaedia Britannica, Inc. 2010-03-01

The Britannica Book of the Year 2010 provides a valuable viewpoint of the people and events that shaped the year and serves as a great reference source for the latest news on the ever changing populations, governments, and economies throughout the world. It is an accurate and comprehensive reference that you will reach for again and again.

Borrowing Credibility - Jana Grittersova 2017-07-28

Explores multinational banks' role in enhancing monetary credibility, revealing the importance of market confidence in an interconnected world

The Rise of the People's Bank of China - Stephen Bell 2013-06-01

The People's Bank of China surpasses the Federal Reserve as the world's biggest central bank. In the first comprehensive account of the evolution of central banking and monetary policy in reform China, Stephen Bell and Hui Feng show how the PBC's authority grew from a Leninist party-state that once jealously guarded its control.

The Offshore Interface - Mark P. Hampton 2016-07-27

This book opens up the secret world of tax havens and offshore finance centres (OFCs), a vast offshore business valued at over one trillion US dollars. It is a timely and original analysis of the role of OFCs in the emerging global economy. The book discusses who uses OFCs, how OFCs work and what drives their development. Extensive use of case study material from Jersey illustrates the growth of a successful OFC and its impact upon a small island.

Innovative Business Development—A Global Perspective - Ramona Orăștean 2018-11-13

This proceedings volume presents the latest trends in innovative business development theory and practice from a global, interdisciplinary perspective. Featuring selected contributions from the 25th International Economic Conference Sibiu (IECS 2018) held in Sibiu, Romania, it explores various topics in the areas of economics, business, finance and accounting, including tourism, marketing and Islamic banking and finance. Written by researchers from different regions and sectors around the world, it offers significant insights into the emerging shifts that characterize the fields of innovative economics and global development, innovative business practices, as well as innovative finance and banking, and provides organizations, managers and policy makers with new reliable solutions and opportunities for innovative development and growth within and between organizations around the globe.

Islamic Finance and Africa's Economic Resurgence - Muhammad Al Bashir Muhammad Al Amine 2016-06-08

This book analyzes Africa's unprecedented economic growth, the state of its financial sector, and the varied opportunities for Islamic finance investors. It considers the role - potential and realized - of Islamic finance in fostering financial inclusion in areas such as banking, microfinance, capital market development, insurance, and private equity business. The book stresses that investing in Africa through Islamic finance will open new markets, ensure higher profit margins, diversify risk, and create business competition; and that these changes that will provide financial products that can satisfying the desires and beliefs of all consumers and unlock the real potential of the continent's financial

system. The book also looks into the rise of international interest in Africa and concludes by scrutinizing the challenges impeding further economic growth, as well as the specific barriers that need to be addressed in order to promote the implementation of Islamic finance. Investors, policymakers, and academics ready to confront these challenges will find much of value in this book.

RAGE OF THE RISK GOD - Ray Echebiri 2012-03-22

Rage of the Risk God chronicles in the broadest conceptual language, the impact of the catastrophic global economic crisis of 2008/09 on the Nigerian banking industry, and the concomitant regulatory intervention, which had had more than mere tangential effect that as yet is reshaping the industry and the national economy in a way not exactly predictable. It contextualises the motivations, rationale, and the impact of the banking reforms embarked upon by the Central Bank of Nigeria under Mallam Lamido Sanusi, who is fondly referred to as the "risk god" by his professional colleagues in the banking industry because of his unmatched mastery of risk management.

Global Urban Analysis - Peter J Taylor 2012-06-25

Global Urban Analysis provides a unique insight into the contemporary world economy through a focus on cities. It is based upon a large-scale customised data collection on how leading businesses use cities across the world: as headquarter locations, for finance, for professional and creative services, for media. These data - involving up to 2000 firms and over 500 cities - provide evidence for both how the leading cities, sometimes called global cities, are coming to dominate the world economy, and how hundreds of other cities are faring in this brave new urban world. Thus can the likes of London, New York and Hong Kong be tracked as well as Manchester, Cleveland and Guangzhou, and even Plymouth, Chattanooga and Xi'an. Cities are assessed and ranked in terms of their importance for various functions such as for financial services, legal services and advertising, plus novel findings are reported for the geographical orientations of their connections. This is truly a comprehensive survey of cities in globalization covering global, world-regional, and national scales of analysis: - 4 key chapters outline the

global structure of the world economy featuring the leading cities; - 9 regional chapters covering the whole world also feature the level of services provided by 'medium' cities; - 22 chapters on selected countries and sub-regions indicate global-ness and local-ness and feature an even wider range of cities. Written in an easy to understand style, this book is a must read for anybody interested in their own city in the world and how it relates to other cities.

A Global History of the Financial Crash of 2007-10 A. Lybeck
2011-10-13

We have just experienced the worst financial crash the world has seen since the Great Depression of the 1930s. While real economies in general did not crash as they did in the 1930s, the financial parts of the economy certainly did, or, at least, came very close to doing so. Hundreds of banks in the United States and Europe have been closed by their supervisory authorities, forcibly merged with stronger partners, nationalized or recapitalized with the tax payers' money. Banks and insurance companies had, by mid 2010, already written off some 2000 billion dollars in credit write-downs on loans and securities. In this book, Johan Lybeck draws on his experience as both an academic economist and a professional banker to present a detailed yet non-technical analysis of the crash. He describes how the crisis began in early 2007, explains why it happened and shows how it compares to earlier financial crises.

International Investment Management Kara Tan Bhala 2016-04-14
International Investment Management: Theory, Practice, and Ethics synthesizes investment principles, Asian financial practice, and ethics reflecting the realities of modern international finance. These topics are studied within the Asian context, first through the medium of case studies and then via the particular conditions common in those markets including issues of religion and philosophy. This book has a three part structure beginning with the core principles behind the business of

investments including securities analysis, asset allocation and a comprehensive analysis of modern finance theory. This gives students a comprehensive understanding of investment management by going through the theories, ethics and practice of investment management. This text provides a detailed overview of International Banking Law and International Securities Regulation, alongside legal and ethics case studies which are located in the practice section of the book. This book is an essential text for business and law school students who wish to have a thorough understanding of investment management. It is also perfect as a core text for undergraduate finance majors and graduate business students pursuing a finance, and/or business ethics concentration, with particular focus on Asia.

Making a Killing - Ian Michael Oxnevad 2021-10-15

The international financial system is not only economic, but political. Making a Killing explores the often-overlooked world of terrorist financing and the involvement of the international banking system. In order to address the threat of terrorist organizations in a post-9/11 world - and how they are funded and financed in particular - the international community has constructed a vast architecture of counterterrorist finance laws, policies, and institutions. Connecting the fields of security studies, political economy, and finance, Ian Oxnevad argues that a bank's institutional link to a state (as a state-owned bank or a bank with strong state connections) will protect it from any enforcement action for violations of anti-money laundering and counter-terrorism financing regulations. In the face of states blocking such enforcement actions, these regulations prove ineffective in preventing the financing of terrorism, as the state's self-interest supersedes its interest in preventing terrorist financing. Making a Killing seeks to assess how effective new laws and regulations have been, as well as to identify best practices for future attempts to counter the financing of terrorism.
