American Chew - Matthew Lippman 2013

Poetry. "Matthew Lippman's poems know how to love as only a heart knows how to love. Swelling with rage, candor, humor, and empathy, his lyrics embrace vulnerability and grit that navigate the mire that the world lays before us each day. Their music makes singular reconciliations where anxiety and angst are lent a tough and tender grace."—Michael Morse "Reading a Matthew Lippman poem is like encountering an unstoppable force—or forces. One moment you're walking down Broadway next to an old friend who's talking a mile a

minute—he's on a tear, he's manic but eminently likable, and his monologue is heating up to the point of combustion. Another moment you're listening to a voiceover spoken by a hardboiled and vaguely hypnagogic private eye. And yet another moment you're at the Tamarack Lodge in a Catskills of long ago listening to a crazed Borscht Belt comedian. And finally you're listening to a mystic intoning prophecies from deep in the reaches of a dream. I love poetry that takes me through such a range of voices, guises, poses, intensities, and diapasons, yet also manages to make me feel that I am in the presence of a truly human and truly real and singular personality. These poems were written by a man who takes much pleasure in moving through this mysterious world in language and in a body. He wants to share this pleasure with us—and that is generous, and as good a reason for writing poems as any I can think of."—Geoffrey Nutter "Matthew's poems wake us up with brutal honesty and humor. If you think poetry has lost touch with everyday life, this book will restore your faith and welcome you back."—Rob MacDonald

Learning with Information Systems Simon Bell 2013-02-01

In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent.

Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

[The Ethos of the Climate Event](#) - Kellan Anfinson 2020-12-30

This book develops a politico-ethical response to climate change that accounts for the novelty and uncertainty that it entails. This volume explores the ethical dimensions of climate change and posits that one must view it as a social construction intimately tied to political issues in order to understand and overcome this environmental challenge. To show how this ethos builds upon the need for new forms of responsiveness, Anfinson analyzes it in terms of four features: commitment, worldly sensitivity, political disposition, and practice. Each of these features is developed by putting four thinkers - Kierkegaard,

Nietzsche, Schmitt, and Foucault respectively - in conversation with the literature on climate change. In doing so, this book shows how social habits and norms can be transformed through subjective thought and behavior in the context of a global environmental crisis. Presenting a multidisciplinary engagement with the politics, philosophy, and science of climate change, this book will be of great interest to students and scholars of climate change, environmental politics, environmental philosophy and environmental humanities.

[Radar Instruction Manual](#) - United States. Maritime Administration 2005

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Daniel James Webb - Daniel James Webb 2011-12-16

LATE NIGHT, EARLY MOURN-ING SAT-HER-DAY I wrote this book of prose n poems after I moved to Cape Cod to take a job n live by the ocean after leaving the Maine-lands with 7 years of bar hoping, basket

passing coffee houses, walking the cobblestone parking lot of Portland, Maine where I saw poetry in motion three hundred and sixty five days per year and I walked naked and flowing in the moment all over that beautiful city. Of course it takes true happiness to write happy and snappy and low down blues to play this game. "DANIEL JAMES WEBB" is a book of poems n prose n journal-eskkk freight train rambles. It stars the true American boy as our narrator and through his experiences and visions and illuminations, we walk across American culture where it belongs, in the mind of a sharp, cynical, angry, mad, existing poet of the mountains. This blue book blows bugles n balcony riddles, crying in the midnight moonlight trying for so many years to please the paper, the people, the mind, the love struck poet in Cape Cod puddles, babe, drunk without worry or wicked sins deep down in six feet of ground, boy, cause I've got a woman I can love. Lord, Lord, tell the whole world what I can do! I've been so wild baby! It seems the talks all over town -Daniel James Webb Cape Cod, Ma

Spatial Variation of Seismic Ground Motions - Aspasia Zerva 2016-04-19

The spatial variation of seismic ground motions denotes the differences in the seismic time histories at various locations on the ground surface. This text focuses on the spatial variability of the motions that is caused by the propagation of the waveforms from the earthquake source through the earth strata to the ground surface, and it brings together the various aspects underlying this complicated phenomenon. Topics covered include: Evaluation of the spatial variability from seismic data recorded at dense instrument arrays by means of signal processing techniques Presentation of the most widely used parametric coherency models, along with brief descriptions of their derivation Illustration of the causes underlying the spatial variation of the motions and its physical interpretation Estimation of seismic ground-surface strains from single station data, spatial array records, and analytical methods Introduction of the concept of random vibrations as applied to discrete-parameter and continuous structural systems on multiple supports Generation of simulations and conditional simulations of spatially variable seismic ground motions Overview of the effects of the spatial variability of seismic motions on the response of long structures, such as pipelines, bridges and dams, with brief descriptions of select seismic codes that incorporate spatial variability issues in their design recommendations This book may serve as a tutorial and/or reference for graduate students, researchers and practicing engineers interested in advancing the current state of knowledge in the analysis and modeling of the spatial variation of the seismic ground motions, or utilizing spatially variable excitations in the seismic response evaluation of long structures.

The Maghrib in the Mashriq - Maribel Fierro 2021-01-18

This is a pioneering book about the impact that knowledge produced in the Maghrib (Islamic North Africa and al-Andalus = Muslim Iberia) had on the rest of the Islamic world. It presents results achieved in the Research Project "Local contexts and global dynamics: al-Andalus and the Maghrib in the Islamic East (AMOI)", funded by the Spanish Ministry of Science, Innovation and Universities (FFI2016-78878-R AEI/FEDER, UE) and directed by Maribel Fierro and Mayte Penelas. The book contains 18 contributions written by senior and junior scholars from different institutions all over the world. It is divided into five sections dealing with how knowledge produced in the Maghrib was integrated in the Mashriq starting with the emergence and construction of the concept 'Maghrib' (sections 1 and 2); how travel allowed the reception in the Maghrib of knowledge produced in the Mashriq but also the transmission of locally produced knowledge outside the Maghrib, and the different ways in which such transmission took place (sections 3 and 4), and how the Maghribis who stayed or settled in the Mashriq manifested their identity (section 5). The book will be of interest not only for those whose research concentrates on the Maghrib but more generally for those who want to understand the complex and shifting dynamics between 'centres'

and 'peripheries' as regards intellectual production and circulation.

Compact Utility Tractors - Dennis David 2013-06-01

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.
