Using mentor texts as the cornerstone for how best to teach grammar, this book provides teachers with almost everything they need to get kids not only engaged but excited about learning grammar.

Through "Your Turn Lessons," conversations, conferences, and drafting, revising, and editing exercises, students will learn not only specific concepts but also how to reflect upon and transfer what they have learned to other writing tasks, no matter the subject. The "Treasure Chest of Children's Books" provides an extensive list of both fiction and nonfiction books that fit naturally into grammar instruction. Eight appendices provide even more resources, including information on homophones, using mentor texts to teach grammar and conventions, checklists, comma rules, help for ELL students, and a glossary of grammar terms. Ashes Under Winter - Michael McCarthy 2014-10-07

The untold story of the worst disaster on the Great Lakes in U.S. History. On July 24th, 1915, Chicago commuters were horrified as they watched the SS Eastland, a tourism boat taking passengers across Lake Michigan, flip over while tied to the dock and drown 835 passengers, including 21 entire families. Rockefeller, Morgan, and Carnegie had bought into the ship business in the Midwest, creating a boom market and a demand for ships that were bigger, longer, faster. The pressure-filled and greedy climate that resulted would be directly responsible for the Eastland disaster and others. As dramatic as the disaster was, the subsequent trial was even more so. The public demanded justice. When the immigrant engineer who was being scapegoated for the accident was left out to dry by the ship's owners, penniless and down-on-his-luck Clarence Darrow decided to take his case. The defense he mounted, which he was too ashamed to even mention in his memoirs, would be even more shocking.

Critical Race Theory in Education - Gloria Ladson-Billings

This important volume brings together key writings from one of the most influential education scholars of our time. In this collection of her seminal essays on critical race theory (CRT), Gloria Ladson-Billings seeks to clear up some of the confusion and misconceptions that education researchers have around race and inequality. Beginning with her groundbreaking work with William Tate in the mid-1990s up to the present day, this book discloses both a personal and intellectual history of CRT in education. The essays are divided into three areas: Critical Race Theory, Issues of Inequality, and Epistemology and Methodologies. Ladson-Billings ends with an afterword that looks back at her journey and considers what is on the horizon for other scholars of education. Having these widely cited essays in one volume will be invaluable to everyone interested in understanding how inequality operates in our society and how race affects educational outcomes. Visible Learning - John Hattie 2008-11-19

This unique and ground-breaking book is the result of 15 years research and synthesises over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers - an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools.

It's

eight years after the Great War shattered Bennett Grey's life, leaving him with an excruciating sensitivity to the potential of human violence, and making social contact all but impossible. Once studied by British intelligence for his unique abilities, Grey has withdrawn from a rapidly changing world—until an American Bureau of Investigation agent comes to investigate for himself Grey's potential as a weapon in a vicious new kind of warfare. Agent Harris Stuyvesant desperately needs Grey's help entering a world where the rich and the radical exist side by side—a heady mix of the powerful and the celebrated, among whom lurks an enemy ready to strike a deadly blow at democracy on both sides of the Atlantic. Here, among a titled family whose servants dress in whimsical costumes and whose daughter conducts an open affair with a man who wants to bring down the government, Stuyvesant finds himself dangerously seduced by one woman and—even more dangerously—falling in love with another. And as he sifts through secrets divulged and kept, he uncovers the target of a horrifying conspiracy, and wonders if he can trust his touchstone, Grey, to reveal the most dangerous player of all . . .
