The Origin of Competitive Strength Akira Kawahara 2012-12-06

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in *Nikkei Sangyo Shimbun* (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the *Topeka Capital-Journal* and the September 13, 1983 issue of the *Asian Wall Street Journal*. The *Topeka Capital-Journal* headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

Sabra & Shatila, Inquiry Into a Massacre - Amnon Kapeliouk 1984

The evidence presented here by Amnon Kapeliouk, the testimony given at the Kahan Commission, and the independent news reports about the massacres raise serious questions regarding the legal culpability of the principal Israel and Lebanese actors in the slaughter in Sabra and Shatila camps. These questions of criminal, as opposed to political culpability, remain to be dealt with. The Palestinian people are the most aggrieved party, but have no ability to initiate criminal prosecution proceedings. They have no state which can become a party to the several Conventions relating to crimes against humanity. - Foreword.

Vindicated Jose Canseco 2009-03-17

In 2005, Jose Canseco blew the lid off Major League Baseball's steroid scandal--and no one believed him. His New York Times bestselling memoir *Juiced* met a firestorm of criticism and outrage from the media, coaches, clubs, and players, many of whom Canseco had personally introduced to steroids--with a needle in

the ass. Baseball's former golden boy, Rookie of the Year, onetime Most Valuable Player, and owner of two World Series rings was called a liar. In *Vindicated*, Canseco picks up where *Juiced* left off, revealing details even more shocking than in his controversial first book. He spills never-before-implicated names--arguably the biggest in the game of baseball--and explores the mystery of one celebrated player about whom key information was suddenly excised from *Juiced* at the last minute. He talks candidly about what the Mitchell Report did--and didn't--get right, why steroid use became so rampant, and how his life has changed since he tore the lid off Pandora's box.--From publisher description.

Inside IMSA's Legendary GTP Race Cars - J. A. Martin, Michael J. Fuller

Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched--in body shape or chassis/engine combinations or engine size. But what about an all-out competition, in which one team's idea of the fastest race car could be pitted against another's, regardless of mechanical "parity"? This was what the International Motor Sports Association's (IMSA) Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993, and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different--and passionate--ideas about what might be the fastest way around a track: the V-12 with its better ground-effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely-restricted ground-effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering free-for-all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings and first-person accounts from the men who built them, *Inside IMSA's Legendary GTP Race Cars* offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Palestine in the Arab Dilemma (RLE Israel and Palestine) - Walid W. Kazziha 2015-05-22

For a long time the understanding of the Palestinian question has been dominated by the views offered by the Arab governments on the Israeli establishment. But any close examination of the policies of the Arab regimes would reveal that they have done very little to alleviate the plight of the Palestinians. Since the defeat of the Arab regime in June 1967, an increasing number of Arab scholars and intellectuals have been seriously and independently involved in reassessing the political and social conditions of their societies. This book, first published in 1979, is part of that more general attempt to discover the deep-rooted causes of defeat and the general state of socio-economic underdevelopment of the Arab region. The central theme of the four essays in this study pertains to the fluctuating relationship between the Arab regimes and the Palestinian Resistance Movement. It is within this context that the first essay examines the various factors which shaped the relationship at different intervals. The second then goes on to present a case study of how the contradictions between the Arab regimes and the Resistance Movement operate in a crisis situation and reach the level of an armed confrontation. The third essay examines the prospects for peace and war in the region in the light of the political conditions given before Sadat's visit to Israel. And finally the fourth essay is concerned with Sadat's peace initiative and its consequences on the relations between Egypt and the Palestinian Resistance Movement.
