Practitioners are becoming increasingly interested in understanding the science that allows them to develop better marketing and managerial programs designed to enhance the quality of life of tourists. Tourism bureaus and government agencies are increasingly interested in issues of sustainable tourism, specifically in understanding and measuring the impact of tourism on the quality of life of the residents of the host communities. This handbook covers all relevant topics and is divided into two parts: research relating to travelers/tourists, and research relating to the residents of host communities. *Native Tours* Erve Chambers 2019-06-20

Previous editions of Native Tours provided a much-needed overview and analysis of anthropology's contributions to tourism as an emerging field of study. Such a cultural perspective illuminated key ideas surrounding worldwide host-guest relations and informed discussions of political and economic influences and the impacts, both negative and positive, of tourism as one of the world's largest industries.

Applying a characteristically uncluttered, authoritative writing style alongside an exceptional command of the relevant literature, Chambers updates, refines, and extends his earlier work. He retains a focus on the social, cultural, economic, and environmental consequences of tourism, and provides a framework for understanding tourism initiatives in their particular circumstances. Three detailed case studies originating in the American Southwest, the Tirolean Alps, and Belize illustrate the varied costs and benefits of tourism.

**Kazan, Russia** - Caleb Gray 2019-12-09

Kazan, Russia. Travel and Tourism, Guide. Kazan (meaning 'cooking pot' in Tatar) is the Istanbul of the Volga, a place where Europe and Asia curiously inspect each other from the tops of church belfries and minarets. It is about 150 years older than Moscow and the capital of the Tatarstan Republic (Республика Татарстан) the land of the Volga Tatars, a Turkic people commonly associated with Chinggis (Genghis) Khaan's hordes. Tatar autonomy is strong here and is not just about bilingual street signs. Moscow has pumped vast sums into the republic to persuade it to remain a loyal part of Russia. It also ensures that Tatarstan benefits greatly from the vast oil reserves in this booming republic. Although Tatar nationalism is strong, it is not radical, and the local version of Sunni Islam is very moderate. Slavic Russians make up about half of the population, and this cultural conflux of Slavic and Tatar cultures makes Kazan an all-the-more-interesting city. People are proud of their culture and try to save it, which is also encouraged on the state level. For example, Tatar language is official; all students must learn it at school. All signs in Kazan are written both in Russian and Tatar. It is more common to see the Tatar flag than the Russian flag. You will probably find here more mosques, than churches

**Tourism Research Methods** - Brent W. Ritchie 2005

Within the tourism industry there is a growing consensus on the need for research to investigate the economic, social and environmental impacts of tourism. However, existing research methods texts are based solely on either the business approach or the social science approach to tourism. They often fail to

provide real world examples of how to plan, implement or analyse tourism related research. This book aims to address this divide by integrating theory with practice through the inclusion of specific tourism research case studies alongside research theory. It considers a wide range of research issues, approaches and techniques with contributions from both experienced and new researchers.

**Liechtenstein Travel Guide** - Jesse Russell 2019-11-19

Liechtenstein Travel Guide. Tourism. A pocket-sized principality in the heart of Europe, Liechtenstein rarely tops anybody's bucket list of continental must-sees. Yet this tiny, landlocked nation offers more than you'd imagine: from long-standing history to sky-high mountains; cliff-hanging castles to odd cultural quirks. Many of Liechtenstein's historical highlights are located in the capital, Vaduz. While this tiny town may only have around 5,000 inhabitants, it also boasts an array of fascinating museums and galleries including the Liechtenstein National Museum, the Museum of Fine Arts and the FIS Ski and Winter Sports Museum as well as the atmospheric Prince's Wine Cellars and the neo-Gothic Vaduz Cathedral. All these attractions are watched over by the pretty Vaduz Castle, which remains the official residence of the Prince of Liechtenstein. Vaduz isn't Liechtenstein's only town of historical note. The second town,

Schaan, is actually larger than Vaduz, and comes with its very own impressive church and Roman remains, while Balzers in the south west boasts what is perhaps Liechtenstein's most arresting fortification. There are also beautiful chapels to be found in lesser-visited villages like Triesen and Planken. And yet the true star of Liechtenstein is the remarkable nature. This country has arguably the most impressive landscape in Europe. Most of the peaks in Liechtenstein soar more than 2,000m (6,562ft) into the sky, making Liechtenstein a premier destination for skiing, hiking and mountain biking. Its shimmering lakes are also a big draw for swimmers. As well as its permanent attractions, Liechtenstein also excels when it comes to unusual events. Some of the fun annual highlights include the Monster Concert (where troupes of musicians and dancers dress in outlandish costumes and bang drums), the Cattle Drive (where cows and sheep are festooned in colourful garments and adorned with bells) and the LGT Alpine Marathon (where competitors from around the globe run for 26 miles through the mountains).

**Overbooked** - Elizabeth Becker 2016-02-23

"Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of

this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month--then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways"--

**Slow Travel and Tourism** - Janet Dickinson 2010-09-23

It is widely recognized that travel and tourism can have a high environmental impact and make a major contribution to climate change. It is therefore vital that ways to reduce these impacts are developed and implemented. 'Slow travel' provides such a concept, drawing on ideas from the 'slow food' movement with a concern for locality, ecology and quality of life. The aim of this book is to define slow travel and to discuss how some underlining values are likely to pervade new forms of sustainable development. It also aims to provide insights into the travel experience; these are explored in several chapters which bring new knowledge about sustainable transport tourism from across the world. In order to do this the book explores the concept of slow travel and sets out its core ingredients, comparing it with related frameworks such as low-carbon tourism and sustainable tourism development. The authors explain slow travel as holiday travel where air and car transport is rejected in favour of more environmentally benign forms of overland transport, which generally take much longer and become incorporated as part of the holiday experience. The book critically examines the key trends in tourism transport and recent climate change debates, setting out the main issues facing tourism planners. It reviews the potential for new consumption patterns, as well as current business models that facilitate hyper-mobility.

This provides a cutting edge critique of the 'upstream' drivers to unsustainable tourism. Finally, the authors illustrate their approach through a series of case studies from around the world, featuring travel by train, bus, cycling and walking. Examples are drawn from Europe, Asia, Australia and the Americas. Cases include the Eurostar train (as an alternative to air travel), walking in the Appalachian Trail (US), the Euro-Velo network of long-distance cycling routes, canoe tours on the Gudena River in Denmark, sea kayaking in British Columbia (Canada) and the Oz Bus Europe to Australia.
