Poems of Edward de Vere, 17th Earl of Oxford Edward De Vere 2017-09-07

Once an acclaimed poet and playwright of the Elizabethan Era, Edward de Vere, the 17th Earl of Oxford (1550-1604) had fallen into obscurity. Attention to his biography and writings returned with the publication of J. Thomas Looney's "Shakespeare" Identified in 1920. The collection here is of his early and few poems the majority of scholars believed to have been written by him. Much of his mature work (post 1576 when Oxford stopped signing his name to works) has been lost or has possibly been assigned to other poets/playwrights. His absence from the page and from Elizabeth's court has naturally been explained away as him remaking himself as the author of Shake-Speare. Historians have wondered what would the callow works of Shakespeare look like? Perhaps these poems are the best example of that as many in the Shakespeare Author Debate try to prove that

there was another "shake-scene in a country".

Napoleon's Red Lancers Ronald Pawly 2012-03-20

The legendary Dutch 'Red' Lancers - the 2nd Light Horse Lancers of Napoleon's Imperial Guard - were formed in 1810 after the emperor annexed Holland and its army to France. The former hussars of the Dutch Royal Guard got a handsome new uniform, a new weapon, and a hard-driving new colonel in Baron Edouard Colbert. His lancers distinguished themselves in Russia in 1812, at huge cost; in Germany in 1813, and in the Low Countries in 1814. When Napoleon returned from exile in 1815 the Red Lancers were with him until night fell over Waterloo. Ronald Pawly is the world's leading expert on the archival and pictorial record left by this regiment; his detailed text is illustrated with rare portraits and photographs, and eight glowing colour plates of a surprisingly wide variety of uniforms.

**From Moscow to Stalingrad** - Yves Buffetaut  
2018-04-19

An account of the most crucial period of fighting on the Eastern Front, from the defeat of Germany at the gates of Moscow to their crushing loss at Stalingrad. The path from Moscow to Stalingrad was littered with successes and losses for both the Red Army and the Wehrmacht, culminating in one of the harshest battles of the Second World War. Part of the Casemate Illustrated series, this volume outlines how it was that, less than a year after their defeat at Moscow, the German army had found a way to make the Soviet troops waver in their defense, with their persistence eventually leading to the Battle of Stalingrad. The successful expulsion of the German troops from Moscow in the winter of 1941 came at a cost for the Red Army. Weaknesses in the Soviet camp inspired the Wehrmacht, under Adolf Hitler's close supervision, to make preparations for offensives along the Eastern Front to push the Russians further and further back into their territory. With a complex set of new tactics and the crucial aid of the Luftwaffe, the German army began to formulate a deadly two-pronged attack on Stalingrad to reduce the city to rubble. In the lead-up to this, Timoshenko's failed attack on Kharkov, followed by the Battle of Sebastopol in June 1942, prompted Operation Blue, the German campaign to advance east on their prized objective. This volume includes numerous photographs of the ships, planes, tanks, trucks, and weaponry used by both sides in battle, alongside detailed maps and text outlining the

constantly changing strategies of the armies as events unfolded. "The wonderful photos and illustrations make this book entertaining."

**Armour Modelling** - John Prigent 2006-11-28

This book sets out to answer a wide range of modelers' 'how-to' questions. It begins by showing all the things that need to be done to build a first model. Paints, glues, knives and other basic tools are introduced. Then it moves on to the use of accessories - etched metal sets, turned metal gun barrels, and simple resin conversions. Here the more specialised tools, such as those made for work with etched metal, are discussed. The book includes sections covering working safely with resin, adding camouflage finishes by brush, spray can and airbrush, and ways of reproducing the German anti-magnetic Zimmerit finish that troubles many modellers. The various types of replacement tank tracks are shown with ways to build and paint them, and the different challenges of modeling wheeled vehicles are also addressed. The book continues with demonstrations of how to build a complex conversion or a complete resin kit as well as more simple scratchbuilding (working from raw materials rather than prefabricated kit parts). Researching and making decals for markings when there are no ready-made ones available, display bases and figures are also covered. Everything is straightforwardly explained and clearly illustrated by numerous photographs of steps in the various processes and of finished models.

**Building a WWII Jeep** - Sean Dunnage  
2021-05-30

The Jeep as we know it from WW2 news reels, big screen movies and television shows such as M.A.S.H. or The Rat Patrol was the result of the US War Department's requirement for a light command-reconnaissance car to meet the US Army's needs under the threat of a looming European war. After only a few weeks of development the Jeep would end up in all of the

Allied armies of the world courtesy of Bantam, Willys and Ford. Many of the Jeeps built during the war would go on to serve for over 60 years in various parts of the world in both military and civilian use. This book is a basic guide to building a WW2 Jeep using restored, rebuilt and modern reproduction parts for those who have never done it before, just as I hadn't either. You'll find a clear step by step process used to build a truly historical vehicle. Combined with the other books and websites that will be noted in this volume as well as some basic auto mechanical knowledge on your part you should be able to have your own piece of Jeep history rolling in no time.

*The Vintage Years of Airfix Box Art* Roy Cross  
2009-08-01

Airfix has been commercially producing plastic kits since 1952 and its models have been made by successive generations of young boys and men alike. In the 1960s, a talented graphic artist called Roy Cross was commissioned to paint some of the box art for Airfix, and for a ten-year-period he provided many of the glorious paintings seen on the boxes, setting new standards for realism and accuracy. Many are still being used today, a full four decades later. Inside the pages of this book are some of Roy's best artworks, shown here in full format and in superb detail, with many reproduced here in book form for the very first time. As well as his vintage box art, Roy has included many sketches and alternative versions of his Airfix box art. After Roy left Airfix in 1974, the company went through a turbulent time. The present owners are Hornby, who have ambitious plans for Airfix and the other brands it acquired including Scalextric and Corgi. The decade that Roy Cross worked for Airfix, though, could be classed as their vintage era, with some of their finest models being produced then in their millions, ready for eager youngsters to build up into detailed miniature models of their favorite aircraft, ships and locomotives.

Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). **Luck of a Lancaster** - Gordon Thorburn  
2013-08-19

No 9 Squadron of Bomber Command converted from the Wellington to the Lancaster in August 1942. W4964 was the seventieth Lanc to arrive on squadron, in mid April 1943. She flew her first op on the 20th, by which time No 9 had lost forty-one of their Lancs to enemy action and another five had been transferred to other squadrons and lost by them. No 9 would soon lose a further thirteen of the seventy. All of the remaining eleven would be damaged, repaired, transferred to other squadrons or training units,

and lost to enemy action or crashes except for three which, in some kind of retirement, would last long enough to be scrapped after the war. Only one of the seventy achieved a century of ops or anything like it: W4964 WS-J. Across all squadrons and all the war, the average life of a Lancaster was 22.75 sorties, but rather less for the front-line squadrons going to Germany three and four times a week in 1943 and '44, which was when W4964 was flying her 107 sorties, all with No 9 Squadron and all from RAF Bardney. The first was Stettin (Szczecin in modern Poland), and thereafter she went wherever 9 Squadron went, to Berlin, the Ruhr, and most of the big ops of the time such as Peenemunde and Hamburg. She was given a special character as J-Johnny Walker, still going strong and on September 15 1944, skippered by Flight Lieutenant James Douglas Melrose, her Tallboy special bomb was the only one to hit the battleship Tirpitz. During her career, well over two hundred airmen flew in J. None were killed while doing so, but ninety-six of them died in other aircraft. This is their story, and the story of one lucky Lancaster.
