**Incredible Teachers** - Carolyn Webster-Stratton 2012-01-01

Europe in Transition - Arvind Sinha 2010-01-01

The developments in Europe from the late 15th till the end of the 18th century represented a crucial phase in the emergence of the modern world. Scholars refer to this period as "early modern" and this expression is often associated with the rise of the modern West. The pace of change gained momentum during this period undermining the roots of the feudal society. The economic transformation pushed Europe towards capitalism. The forces of change could be located in the diverse spheres of human activities although the scale of change varied from one region to another. The transformation of local economies into the larger European market economy, the geographical discoveries, and the new sea routes resulted in the creation of colonial empires based on new forms of exploitation. The rise of nation-states under absolute rulers replaced the decentralized feudal structure. Discoveries in arts and sciences and the religious movements opened up new mental horizons that gave birth to new social attitudes, cultural patterns, and scientific outlook. At the same time, the negative trends during this period such as the rise of slave trade, new forms of exploitation, and a wild craze for witch-hunting are also included in the discussion. This book adopts an interpretive approach and tries to explain what led to the dislocation of centuries-old social order and the emergence of new social classes.

**City, Street and Citizen** - Suzanne Hall

2012-06-25

How can we learn from a multicultural society if we don't know how to recognise it? The contemporary city is more than ever a space for the intense convergence of diverse individuals who shift in and out of its urban terrains. The city street is perhaps the most prosaic of the city's public parts, allowing us a view of the very ordinary practices of life and livelihoods. By attending to the expressions of conviviality and contestation, 'City, Street and Citizen' offers an alternative notion of 'multiculturalism' away from the ideological frame of nation, and away from the moral imperative of community. This book offers to the reader an account of the lived realities of allegiance, participation and belonging from the base of a multi-ethnic street in south London. 'City, Street and Citizen' focuses on the question of whether local life is significant for how individuals develop skills to live with urban change and cultural and ethnic diversity. To animate this question, Hall has turned to a city street and its dimensions of regularity and propinquity to explore interactions in the small shop spaces along the Walworth Road. The city street constitutes exchange, and as such it provides us with a useful space to consider the broader social and political significance of contact in the day-to-day life of multicultural cities. Grounded in an ethnographic approach, this book will be of interest to academics and students in the fields of sociology, global urbanisation, migration and ethnicity as well as being relevant to politicians, policy makers, urban designers and architects involved in cultural diversity, public space and street based economies.

**Bambini** - Lella Gandini 2001

This volume is a timely contribution to the burgeoning dialogue on the Reggio Emilia approach, and features the work of prominent scholars, policy-makers, researchers, administrators, and practicing teachers who have created and directed the infant-toddler care systems in four cities in Italy. Joined by American educators and researchers (including Ron Lally, Rebecca New, and Jeanne Goldhaber), their work builds upon and extends inclusionary and family-centered philosophies. It combines missions of care and education, and produces innovations in space and environments. This collection is filled with dozens of examples of experiences with dynamic, open systems of organization that support emotional and cognitive development of infants and toddlers—and respect the delicate relationship between parents and their young. Also included are photos, some in color. Topics include: Complementary family-centered systems of early care, education, and intervention Practical experimentation and teaching strategies like the *inserimento* (first transition of child and family into the center), and *diario* (memory book), as well as explanations of the rationale behind them Best practices for quality care programs with broad implications for reflective teaching in America's early care programs “Bravo for a splendid book! Leading figures in Italy's famous preschool movement (plus a few well-informed

foreigners) provide vivid descriptions not only of pedagogical practices, but also of the evolving politics of decentralization that has kept Italy's preschools under local community control with no sacrifice of standards. Compulsory reading!” —Jerome Bruner, New York University “This book is simply wonderful—every page!

Throughout the sixteen chapters—written mostly by the Italians themselves—practices, policies, reflections, and research on how best to serve infants and toddlers and their families are shared.” —Lilian G. Katz, University of Illinois, Urbana-Champaign “Though the Italian experience cannot simply be transplanted to the United States, by staying in the conversation, we will deepen and sharpen our understanding of what we want for our infant-toddler parent-teacher programs and may even discover some strategies for getting them there.” —E. Z. Tronick, Harvard School of Education and Harvard Medical School
