6th International Conference on the Conservation of Earthen Architecture - The Getty Conservation Institute 1991-02-28

On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATERRE-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

Incentives to Improve Teaching - Emiliana Vegas 2005

Latin America faces tremendous challenges, particularly those of development, poverty, and inequality. Education is widely recognized as one of the most critical means of defeating these challenges. Democratizing education, by improving both its coverage and quality, is critical to overcoming the social

and economic inequality that plagues Latin America. Ensuring that all children have the opportunity to learn critical skills at both primary and secondary level is paramount to overcoming skill barriers that perpetuate underdevelopment and poverty. A growing body of evidence supports the intuitive notion that teachers play a key role in what, how, and how much students learn. Attracting qualified individuals into the teaching profession, retaining these qualified teachers, providing them with the necessary skills and knowledge, and motivating them to work hard and do the best job they can is arguably the key education challenge. 'Incentives to Improve Teaching' focuses on education reforms that alter teacher incentives and the impact their on teaching quality and student learning. The reforms explored in this volume represent efforts by several countries in the region to increase teacher accountability and introduce incentives to motivate teachers to raise student learning.

*Caminos* - Joy Renjilian-Burgy 2007-08-01

The Student Activities Manual contains workbook, lab, and video activities that provide important additional practice of topics in the text. The Workbook section, which parallels the organization of the units in the text, includes activities to reinforce the vocabulary and grammar learned in class as well as practice to help develop reading and writing skills. The Lab section contains a variety of listening activities for each unit to build comprehension of spoken Spanish. The Video section of the SAM provides pre- and post-viewing activities that correspond to each episode of the Caminos del jaguar video.

Public financial management in Latin America - Mario Pessoa 2015-08-24

The efficiency, effectiveness, and transparency of public financial management in Latin America is critical for the supervision of public resources, fiscal stability, and sustainable economic development. In recent years, the countries of Latin America have embraced reforms in public financial management and have made many important advances; however, many challenges remain. This book brings together the knowledge and experiences of IMF and IDB staff and representatives from 16 governments in the region to document these reforms, and examines the experiences and lessons learned. It is a valuable resource for those looking at issues in public financial management.

**International Handbook of Mathematical Learning Difficulties** - Annemarie Fritz 2019-01-30

This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it's time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

**The World Bank Glossary** - World Bank 1996

This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in

Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

**The World Bank's Experience with Post-conflict Reconstruction** - 1998-01-01

Clearing landmines, rehabilitating and integrating of excombatants, rebuilding the infrastructure, coordinating aid sources—these are just some of the issues confronting the Bank in post-conflict reconstruction. The explosion of civil conflicts in the post-Cold War world has tested the World Bank's ability to address unprecedented devastation of human and social capital. This study covers post-conflict reconstruction in nine countries, assessing relevant, recent Bank experience. It also presents case-studies for ongoing and future operations, which analyze: 1. the Bank's main strengths or comparative advantages; 2. its partnership with other donors, international organizations, and NGOs; 3. its role in reconstruction strategy and damage and needs assessment; 4. its role in rebuilding the economy and institutions of governance; 5. its management of resources and processes; 6. implications for monitoring and evaluation.

**bookdown** - Yihui Xie 2016-12-12

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including

LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Technology, Sustainability and Educational Innovation (TSIE) - Andrea Basantes-Andrade 2020-01-02

This book presents the proceedings of International Conference on Knowledge Society: Technology, Sustainability and Educational Innovation (TSIE 2019). The conference, which was held at UTN in Ibarra, Ecuador, on 3-5 July 2019, allowed participants and speakers to share their research and findings on emerging and innovative global issues. The conference was organized in collaboration with a number of research groups: Group for the Scientific Research Network (e-CIER); Research Group in Educational Innovation and Technology, University of Salamanca, Spain (GITE-USAL); International Research Group for Heritage and Sustainability (GIIPS), and the Social Science Research Group (GICS). In addition, it had the endorsement of the RedCLARA, e-science, Fidal Foundation, Red CEDIA, IEEE, Microsoft, Business IT, Adobe, and Argo Systems. The term “knowledge society” can be understood as the management, understanding and co-creation of knowledge oriented toward the sustainable development and positive transformation of society. In this context and on the occasion of the XXXIII anniversary of the Universidad Técnica del Norte (UTN), the Postgraduate Institute through its Master of Technology and Educational Innovation held the I International Congress on Knowledge Society: Technology, Sustainability and Educational Innovation - TSIE 2019, which brought together educators, researchers, academics, students, managers, and professionals, from both the public and private sectors to share knowledge and technological developments. The book covers the following topics: 1. curriculum, technology and educational innovation; 2. media and education; 3. applied computing; 4. educational robotics. 5. technology, culture, heritage, and tourism development perspectives; and 6. biodiversity and sustainability.

**The Last Colonial Massacre** - Greg Grandin 2011-07-30

After decades of bloodshed and political terror, many lament the rise of the left in Latin America. Since the triumph of Castro, politicians and historians have accused the left there of rejecting democracy, embracing communist totalitarianism, and prompting both revolutionary violence and a right-wing backlash. Through unprecedented archival research and gripping personal testimonies, Greg Grandin powerfully challenges these views in this classic work. In doing so, he uncovers the hidden history of the Latin American Cold War: of hidebound reactionaries holding on to their power and privilege; of Mayan Marxists blending indigenous notions of justice with universal ideas of equality; and of a United States supporting new styles of state terror throughout the region. With Guatemala as his case study, Grandin argues that the Latin American Cold War was a struggle not between political liberalism and Soviet communism but two visions of democracy—one vibrant and egalitarian, the other tepid and unequal—and that the conflict’s main effect was to eliminate homegrown notions of social democracy. Updated with a new preface by the author and an interview with Naomi Klein, *The Last Colonial Massacre* is history of the highest order—a work that will dramatically recast our understanding of Latin American politics and the role of the United States in the Cold War and beyond. “This work admirably explains the process in which hopes of democracy were brutally repressed in Guatemala and its people experienced a civil war lasting for half a

century.”—International History Review “A richly detailed, humane, and passionately subversive portrait of inspiring reformers tragically redefined by the Cold War as enemies of the state.”—Journal of American History

**College Physics, Volume 1** - Nicholas Giordano 2012-01-01

COLLEGE PHYSICS: REASONING AND RELATIONSHIPS motivates student understanding by emphasizing the relationship between major physics principles, and how to apply the reasoning of physics to real-world examples. Such examples come naturally from the life sciences, and this text ensures that students develop a strong understanding of how the concepts relate to each other and to the real world. COLLEGE PHYSICS: REASONING AND RELATIONSHIPS motivates student learning with its use of these original applications drawn from the life sciences and familiar everyday scenarios, and prepares students for the rigors of the course with a consistent five-step problem-solving approach. Available with this Second Edition, the new Enhanced WebAssign program features ALL the quantitative end-of-chapter problems and a rich collection of Reasoning and Relationships tutorials, personally adapted for WebAssign by Nick Giordano. This provides exceptional continuity for your students whether they choose to study with the printed text or by completing online homework. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
